

DEPARTMENT OF EDUCATION

Peter Weir, Minister
Rathgael House, Balloo Road
Bangor, BT19 7PR

Claire Sugden MLA
Parliament Buildings
Ballymiscaw
Stormont

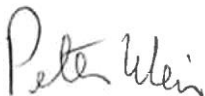

6 May 2021
AQW17624/17-22

Claire Sugden has asked:

To ask the Minister of Education to detail the youth work initiatives his Department has facilitated in order to reach the most vulnerable and hard to reach young people in each of the past five years in (i) East Londonderry; and (ii) Northern Ireland.

ANSWER

I have arranged for this information to be placed in the Assembly Library.

Peter Weir MLA

6 May 2021
AQW 17624/17-22

Claire Sugden has asked:

To ask the Minister of Education to detail the youth work initiatives his Department has facilitated in order to reach the most vulnerable and hard to reach young people in each of the past five years in (i) East Londonderry; and (ii) Northern Ireland.

The EA has collated details of all initiatives within East Londonderry and Northern Ireland in each of the past five years that provided services to children and young people within the category of vulnerable, as defined for service provision during the first lockdown and inclusive of all outreach and detached provision and thematic provision to Section 75 groups.

Also provided is additional information on key essential services available specifically for vulnerable young people during the pandemic.

To ask the Minister of Education to detail the youth work initiatives his Department has facilitated in order to reach the most vulnerable and hard to reach young people in each of the past five years in (i) East Londonderry; and (ii) Northern Ireland.

Name of Area: East Londonderry

2016-17

Overview of Street Based Intervention

SelectYourOriginalProposal_Label StreetBasedResponse_PleaseProvideAnOverviewOfTheInterventionIncludingItsSuccessesAndChallenges

07/04/21 15:00-17:00 2 Group of 11-14 year olds. First group (2male, 2 female) was throwing stones around the play park area, were approached by staff, the group was reluctant to engage but did stop throwing stones following some minimal conversation they moves away from the area. Second group (10 male) were around the shop on bikes team engaged with the group in friendly 'banter' before the group moved off. 08/04/21 14:00 - 19:00 Engaged with a group of 11-14 year olds (8 males) on bikes around the Marina apartments (same group as yesterday), local security identified the group had been giving them bother, staff engaged with the group and were able to move them away from the apartments and the security team. In chatting team identified opportunities to come down into the YMCA. Some of the group were the same ones as on the 09/04/21 14:00 - 18:00 Engaged with a number of young people in the area ones and twos passing through, main engagement around the skate park (3 males 11-14 and 8 males 15-18), where an argument had started between to males, staff managed to diffuse the situation and the two males seperated and moved on. 10/04/21 15:00 - 18:00 Engaged with 2 groups of young people, one group in the Skate park (5 males 1 female 15-18). and one group around the leisure centre pond park (6 males 11-14) who had been in the centre the previous evening, positive conversations some youg peopel were known to staff in both groups no issues.

Ballyduff/New Mossley/Monkstown Area at request of PSNI, engaged with 18 young people(aged 13-15) hanging out around Mossley Pavilion; none gave any cause for concern.

New Mossley/Ballyduff/Monkstown at request of PSNI, 12 young people engaged with at Mossley Pavilion. They were hanging out and no indication of any issues.

Outreach presence to inform any young people on the streets that Ballykeel Youth Centre was open. In the end the arranged march did not take place and the streets were quiet. 6 young people did avail of Youth Centre during the evening.

Rathcoole - linked with local church via local Councillor; provided refuge for 18 young men who played football over the course of the evening.

Rathcoole Area On request of PSNI, engaged with young people at Cloughfern Corner scene of recent rioting. The priority for intervention was to deter young people from becoming involved in ASB and to disperse large crowds in a bid to prevent tensions rising in the area. This was successful with outreach staff monitoring the groups and encouraging those who live outside of Antrim town think about making their way home.

The session was purely about keeping you g people safe and diverting them from interface violence. We engaged with a number of groups. We phoned parents and filed the bus with children who were will to access the youth centre. We also loaded with local Inspector, perpetrator, EA and developed a strategy that included opening the centre and putting staff into the crowd to highlight risks and dangers.

the two dates mentioned above were a youth work response to security alerts in the local area there were large numbers of young people on the street engaging in risk taking behaviour and getting involved in incidents involving high risk behaviour. the youth work teams were on the street to engage with young people to promote safety and try to divert the young people away from the area while promoting safety and stability. Due to the nature of the incident that night and the high tensions in the area, we have placed all young people at "in conversation" in the deatched framework. A lot of young people were willing to talk to us and appeared to listen to our concerns but still stayed at the scene of the disturbance. However we were successful in breaking the larger groups up and moving away "spectators" so we could try to identify the young people who may need extra support in the coming days and weeks

The young people said they will call in and ask the ardoyne staff how they can join.

Tonight staff engaged with young people in the yellow yard regarding a Union Jack being flown at half masked on the mem. One member of the group was particularly frustrated, this young people was also drinking. We had a chat with the young people as to why this was happening and that it shouldn't affect or annoy them due to locations. Staff were walking past the fly over and some young people threw glass bottle at PSNI. We asked other young people in the area to move back to avoid being harmed. PSNI moved on and young people moved away. It was good to be back out on street and engaging with young people, interactions where positive with some general conversation with young people. Whilst in embrington we noticed a young person who seemed to be highly intoxicated, we spoke to her group of friends, explaining our role and if they needed any help. The other members of the group seemed not to be drinking and they explained to us that they where taking her to a taxi.

Tonight the district was very quiet. There were no young people hanging about, assuming was due to the bad weather conditions tonight's. All hotspots were covered tonight. Before finishing up we engaged with a group of 7 young people in Flax Street who were heading home. Had a brief conversation around anti social behaviour. We made them aware of the health an safety around hanging around the interface.

Tonight the streets were quiet compared to previous nights. We covered all the hotspots in the area. We engaged with two groups of young people tonight. The first group we met were sitting outside the flats on Flats St. They were full of questions as to when the centre will be open again, they're eager to get back. We made the young people aware about lockdown and encouraged them to stay at home. The second group were at one of the main hotspots at the minute at the side of Holy Cross Boys. This was an older group and most of them are members of the youth club. We had a positive intervention around arranged fights that's been happening in

the are recently. Made them aware of the dangers of this happening. Few from the group assured us they wouldn't get involved.

Tonight we engaged with a large group of young people at flax street area, approximately 30+ young people age 12-16. Some young people were consuming alcohol and we had some positive engagements around the risks and safety of them. We also had engagements with young people around the pandemic and reminded them that we are still in lockdown. Police arrived at flax street area, where young people were drinking and playing loud music. They did not engage with the young people and young people decided to throw stuff and then left flax street area. We engaged with children aged 8-11 around marrowbone area, who were playing games. We had positive engagements and looking forward to the youth club opening again. Again we reminded young people of health and safety.

We told the young people about the drop in at the AYC. As there wasn't much happening at the interfaces! So they moved on easy enough!

Addressing needs of vulnerable young people through street based response.

A quiet evening . Early part was very wet but as evening dried more young people emerged. Engaged in casual conversation with a number of the small groups. One specific intervention with young person with emotional stress from family situation. There was a car set on fire in Greenland Street at the side of our centre. While a small crowd came to see the commotion they caused no bother, engaged in conversation and dispersed with no hassle. Lidl area quiet.

Addressing needs of vulnerable young people through street based response.

Anti-social behaviour within the Ross Street and Albert Street lighting fires and attacking police driving through the area this is an on-going issue with the area again partnership work needs to be highlighted more to prevent further damage and life changing impacts with young people as in criminal justice system and targeted within the area. Although prevention and damage with staff has been limited this is still an on-going issue since pre-xmas.

Addressing needs of vulnerable young people through street based response.

Area dead within the Saturday evening engagement made around the community however, due to the limited young people within the area the staff team didn't open up centre for young people to feel safe. Majority of the engagement made in the second half of tonight in terms of the streets starting to fill back up. However, with the conversations with young people in terms of building and maintaining relationships.

Addressing needs of vulnerable young people through street based response.

Area was quite for the first half of bespoke intervention tonight second half seen the Ross street and Albert Street group back to attacking cars increasing the police with eggs. Engage with Station Commander of the Fire Services to put groups in place to prevent further attacks on the fire services. Group in the park appeared in the park late due to the increase patrols of both PSNI/BCC. The group engaged well with staff.

Addressing needs of vulnerable young people through street based response.

CCYC is seeking permission to have detached youth workers on the street for the week beginning 26th March. The rationale is the ongoing safety issues regarding vulnerable young people who continue not to follow the covid19 guidelines and who continually put themselves in conflict with PSNI, community groups, family and other agencies. The staff will target young people who are already dealing with particular barriers to education but who have particular challenges that can increase their potential for self harming behaviours, bad decision making and engaging in conflict with PSNI, community activists and other agencies including BCC and the local community. The result is that young people can be vulnerable to exploitation and coercion and this can increase their vulnerabilities. We aim to have staff on the street Tuesday-Sunday night from 7-10pm and sometimes beyond, given the challenges within the Ballymurphy community. Our staff will focus on particular hot spots including Falls Park, Whiterock Childrens Park and other hot spots in the Upper Springfield Area. We will coordinate our response through the EA officer and will contribute to a coordinated and impactful process that helps young people stay safe and become more aware of the risks and consequences of their actions.

Addressing needs of vulnerable young people through street based response.

Colin detached teams worked across Lenadoon and Andersonstown focusing upon targeted groups in each zone seeking to keep conversations going with identified young people known to stat youth services from the following youth providers (CYDC, ST.AGNES & ST.MICHAELS). Teams worked in collaboration with both voluntary and statutory sector providers, alongside PSNI in responding to an incident involving a targeted group of young people within Andersonstown that had been identified as being involved in confrontation with a local retailer and negative behaviours in community as a result . Seeking to decrease their vulnerability and introduce a proactive way of responding to their addressing relationships with community, staff agreed a response with both the PSNI and retailer and engaged in a meaningful and welcomed conversation with the young people and have agreed to meet with them again 12/03/21 to move things forward and slowly address conversations and dialogue needing to be had between them the community and retailers . This will be done through a targeted intervention programme within St. Agnès Youth Centre of which they are members .Building upon their ability to evidence efficacy and create a sense of belonging and reduction in their associated behaviours identifying them to be vulnerable .Scaffolding upon this further will be as future intended outcome to engage in conversations with parents as they are known to both the retailer and centre staff as having been an ongoing concern due to their being the first home that is visited when an alleged incident occurs ,Sy1 and SY3 will give appropriate guidance and support to staff to do this sensitively and constructively . With both covid and health and well being frameworks. Community safety from Andersonstown appreciated the collaborative response from EA stat services to the identified young persons . Further positive engagements took place between EA and community providers, alleviating fears that things were escalating in area, further ongoing engagements with community providers and PSNI will take place and open channels of dialogue are in place . Team sizes across the 3 dates are reflective of the targeted groups that are spread across the 2 areas of Lenadoon and Andersonstown and previously detailed hotspots that the groups are gathering in . Two of the teams are seeking to move the young people engaged with onto the next stage and progressing into target groupwork within both St. Michaels and ST.Agnes . Staff teams focused on an intended target group that had moved from Lenadoon to Old La Salle site for potential alleged fights and engaged with intended target group of 14 young people. Engaging in further conversations around impact upon community and planned further contact for the 12th and diverted them away

	<p>from intended fight that evening . Appropriate refresher training took place for staffing from both St.Agnes and St. Michaels who have not previously participated in detached covid street based youth training to ensure their safe and active participation in interventions and all expressed increased confidence in method of engagement with members building upon their existing skills set. Community mapping took place and appropriate induction and reconnaissance of area conducted with new staff to improve outcomes and ensure a more proactive response to the identified vulnerable young people .</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Covered Shankill area, Dover Park, Woodvale, Lidl , Hillview, Old Park , Carlisle Circus Shankill Estate. Lot of young people out from Lanark Way area to Woodvale Park. Several trying to get alcohol to head to the Glen and Cavehill areas. Spent time talking with them about their intentions and the dangers /legal aspects of this. Tried to discourage them both to not go to these areas with large crowds and not purchase the alcohol. While they did not purchase there and then guess they just went som else. They seem not to have any concerns that Covid is still a risk. Met a few young people who were struggling with their low mental health. Chatted with them and supported them. SpAgreed to follow up with them. Met a parent of one of the young people and suggest possible places for support for them as a parent.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Engagement was very positive young people engage with staff to go into the centre to begin youth work to build relationships in terms of personal and social development and to support young people whom are at risk/ high risk and vulnerable. Session finished at 21:15 young people are eager to start group work during the next couple of weeks.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Engagement with young people was positive overall, building relationship and informing young people of positive decision making within Dunville park small fire inside a bin which was put out via water and engagement with young people on throwing stones and bricks within the Falls Road area via park targeting police cars and jeeps. Young people engaged well with staff and talked about opportunities of coming back to the centre to do small group face to face work relationships and trust still need to be built on within this group. Ross Street and Albert Street was more fires set alight to attract police within the area. Three fire engines and station commander car deployed young people were aiming to throw stones and brick at the service but staff engaged with group and resolved the intervention. Police arrived and young people started running further engagement and relationships need built up with this group of young people and community coordination with voluntary and stationary sector needed to resolve this issue. Overall the positive engagement and intervention made via staff resolved this situation from getting worse.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Entered into conversation with young people to highlight that Nubia Yc was open for young people to come into the centre. Challenge was that young people were going to nearby bonfire and interface. In partnership with staff from Nubia Yc young people came off the streets and into the centre</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>General walk around local community with request from neighbourhood Police to go to Waterworks. There had been a fight in Waterworks - sectarian based. Small group in Waterworks which left the park along with youth workers. Local community was reasonably quiet with small groups about. One group agreed to meet with staff to look at possible project in the local park when restrictions are lifted.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Informal education around alcohol and drug misuse within the weekend around the area especially with young people in the Danville park drinking. Positive engagements around staff being back on the streets reengaging with young people and developing relationships to hopefully provide further support and group work with groups engages as vulnerable. Each number of young people engaged tonight would be considered as a vulnerable case at high risk/ at risk behaviours in the area. Group of young people in Ross street breaking up bricks within the area and throwing at abandoned block of flats.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Key staff where leaving the centre last night (9.30pm) and a group of young people had lit a fire up against the Flats railings Staff provided engagements and interventions in relation to positive decision making, developmental thinking skills and keeping safe as the young people self destructive behaviours where putting them at significant risk or harm. The young people had gained access to ground floor flat and where trying to get in to light a fire, while the other fire was burning. Large amounts of rubble had been broken away from the building and the young people had piled it up waiting for Police to come in Through conversation/dialog and negotiation with the young people in their space, staff supported the young people in attempting to resolve and manage feelings and emotions that are fuelling these self destructive behaviours NIFRS came to put out the fire, staff and throughout this process staff and young people discussed the implications of the impacts and present dangers of the fire getting out of control and the life changing impacts of serious injuries Staff with the permission of the young people stayed at Ross Road for a while after this in conversations around The risk to themselves Impacts on families The negative and potential threat from the community How they are feeling Rights and responsibilities of socialising in their spaces One young person disclosed that just before we came he had been verbally abused by a PSNI Auto Crime team officer in relation to a family member - this young person was struggling to process his emotions/feelings (Incident Form recorded) Key staff in communication with CIT CSO coordinator Lisa Lynn.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Lot of vulnerability of young people. Young people taking drugs and alcohol, cannabis and alcohol. Very good engagement with cross community groups at Lidl, groups from Woodvale, Shankill and Ballysillian. Flax street and Lidl is a hot spot for potential anti social behaviour. Engagement with a lot of young people from Ardoyne Youth Club, AYE and John Paul II youth club. 60 males and female young people engaged with and a group of 30 female young people as well. Loud music coming from the Bone Hills but didnt have access to the Bone Hills.</p>
<p>Addressing needs of vulnerable</p>	<p>One route through the estate with zero young people within the walk up to Dunville park, Dunville park was filled with young people and other community organisations. Young people participating in alcohol and drug misuse staff provided number of interventions during the night activity. Police moved young people from the</p>

young people through street based response.

park creating further issues within the falls road area number of police cars and jeeps attacked. Young people remained on the road until 11pm. Again the number of issues and interventions is policing issues that can't be resolved with youth workers. However, due to nature of St. Patrick day the day/ night operations went as smoothly as they could off. (Still being restricted to limited services well continue to have a negative impact of behaviours within the area.)

Addressing needs of vulnerable young people through street based response.

Session began with limited engagements. Numbers grew over the session. Engaged with young purple who were gathering close to Tigers Bay Interface. Linked in with EA staff in detached.

Addressing needs of vulnerable young people through street based response.

Several of the young people staff had made contact with on the previous night out were expecting SOPYC staff, which definitely seems positive. Staff spoke to them about various outside activities they would be able provide down the line and young people were very positive about this. Staff met some older young people (aged approximately 18 years), who insisted they were "too old" to go into the youth club. Staff spoke to them about the possibility of organising street abased games (adhering to social distancing etc); they were eager for this to materialise. Staff were accompanied by 2 plain clothed PSNI Officers (Stevie & Simon). Initially staff were slightly cautious regarding this situation, but a check in meeting was held between youth club staff and PSNI before hand, which ironed out any concerns. PSNI were met positively by the young people.

Addressing needs of vulnerable young people through street based response.

Successes took place with 84 young people over the two days having initially engaged in conversation with a small number of them during session on the 25th and maintained contact with them and targeted others over next two days. Majority were largely receptive to conversations with staff and open to a longer term intervention . Expressing such issues as low moods and continued negative engagement with community , discussing further concerns for their safety following the attack which they eluded to previously having been carried, staff encouraged them to report it and discussed ways in which to do this safely . A number of potential weapons were able to be negotiated off a group gathering in by Woodburn police station for what was disclosed as being a pre arranged fight . Group dispersed and fight did not take place . Staff to follow up with community representatives to ensure this does not repeat this week and become heated between Lenadoon young people and blacks road young people as this is legacy build up of conflict amongst communities leading up to St. Patricks day . Young people inn Andersonstwon were also receptive to longer term interventions and arrived to arranged engagements with EA staff over these two dates and this week with seek to scaffold upon this with respective identified EA centre staff present . Offering these young people covid safe programme responses as this group contains a number of vulnerable young people who had appeared on PSNI missing persons page over last few months and resulted in their being moved to alternative family member homes . EA teams to follow up with phone support to family members who are now this young person responsible adult as they are known to the centre . QR codes were also given to the young people to help them build a tool kit of support leading them to PHA and Flare sites . This will continue to be monitored and aim to encourage them to engage in a possible FLARE referral at an appropriate time . Further success would be feedback from PSNI in that they had less recorded incidents o anti social behaviours with these two hot spot areas. Contact was made also with voluntary providers, times coordinated to avoid duplication etc .

Addressing needs of vulnerable young people through street based response.

Successes:- With reference to the bespoke targeted interventions in the wider Colin Area all of those identified as being vulnerable were engaged with by the EA teams operating over the initial stages in meaningful conversations. Each group of young people welcomed the approach of youth workers at various levels based on each ones previous levels of participation and distance travelled in terms of skills gained and degree to which they had been involved in influencing and decision making processes. Majority of groupings were diverted away from becoming further involved in negative behaviours. A number of the young people in quite vulnerable states were escorted home and parents contacted with agreed follow up actions and engagements to reduce levels of behaviours that will lead to extending or adding to existing restrictions in place for some individuals . Diversion of groups away from unhealthy risks ensured that a de-escalation of a situation was made preventing the PSNI having to send in the TSG unit as response to the growing crowds and levels of anti social behaviours . At various stages all were largely found to be engaging in or having returned to risk taking behaviours increasing their levels of vulnerability to the taking of alcoholic & behavioural changing substances. re restablising a coordinated partnership approach over the three days to avoid duplication and antagonising if the young people, whilst adopting a collaborative de escalating approach. Identified challenges as follows :- Targeted young people coming into direct conflict with PSNI & Community , resulting in a substantial amount of fires being dealt with throughout the three days. However the third day was the largest amount of destruction with staffing team sizes and times of operation now being revised to best respond to the identified levels of vulnerability. Covid safe travel will be re established due to the volume of groups in various vulnerable states arriving from outside localities into Colin area, EA teams have worked across west during covid so knew quite a number of these individuals also from having worked in their schools . Challenges and a target will be to continue engagement and seek to move proactively into a targeted groupwork response . continued challenge will be to ensure that there is a proactive response to encouraging lawfulness behaviours and that the PSNI have reinforced what is not a youth workers role , outlining our response is to reduce the vulnerability of key young people .

Target groups are small groupings of young males & Females across the above areas that are known to CYDC & EA youth services. Identified as being Vulnerable and at risk through behaviours which has resulted in their becoming known to PSNI. High potential for substance misuse and mental health difficulties. Identified also are that their families are under increasing pressures due to covid impact, potentially contributing to their vulnerability. Several of the young people would be known also to support services and have appeared on PSNI public pages due to their safety being of a concern. Having previously engaged with detached teams are now

<p>Addressing needs of vulnerable young people through street based response.</p>	<p>noted as having no positive connection with community and are identified as becoming more exposed to harm from negative behavioural choices and influences of others Intended outcome would be to re-engage the young people and encourage their participation in a centre-based target group intervention. Parents are known to youth services and will be engaged with should any further risks become known. Staff engaged with identified target group of young people in conversation, all are known to stat service providers in the area (st.Michael's & Area Project staff) discussions took place around previous attempts to engage in blended groupwork which none were able to do due to acces to internet or no available devices. Young males approached were receptive to engagement and conversation with staff. Further conversations were had around covid safety and its impact upon their well being as a result of this lock down. Detailing areas which they had socialised and ones who were previously part of the group have moved onto other risk taking behaviours in nearby communities. A group member detailed having been attacked in area earlier in week and was fearful of disclosing details around reasons why this may have taken place .They shared details around it being quite physical and from a much older male. Staff further discussed options of potential programmes to divert them away to a place of safety and away from risk taking behaviours . Engagement ended with an agreed meeting the following week, encouragement was also given for the young people to share information around the attack to promote a sense of safety and lawfulness. Creating a platform in which they can begin to sense their potential to influence decision making regarding outcomes for themselves . strategies put in place to develop ongoing contact .</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>team did a routine walk around the area engage positively with young people. Ross Street group engage with staff to come into centre to develop on-going relationships with young people and therefore to engage with group work. Tuesday group notified of FRSNI visiting and is looking forward to the group session.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>The area was quiet although a number of young people were in the parks. We engaged in mean conversations around self confidence, lack of trust etc. One young person was very low and lacking confidence to go back to school feeling less confident than before lockdown and fearful of how she would cope. This young person is traumatic by events she witnessed during lockdown. 3 11 year olds were climbing into the hammer park where they wanted to hide.... encouraged them out of there and talked to them about why they were hiding and plan follow up work with them.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>The area was very quiet. Not many young people out although we did have some significant engagements. One young man was glad to talk to us. He is has a history of self harm. He is known to medical / mental health carers. He is keen to engage in further contact possibly support group for mental support. Young people were generally out because they were fed up having been in lockdown for so long....we "just need to get out". Chatted with some young people about yesterday's "social engagements " in the area and the wisdom or lack of. There were some conversations with a small group about paramilitaries today.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>The staff got out later than usual this evening and came across a group of young people who they had previously engaged with. The young people advised that they were heading home shortly and they would be out earlier next week. One of the young people also advised that if the staff were to come out about an hour earlier, there would definitely be more young people around estates such as Rathkeelan and Ardross.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>There were a couple of small groups in wood vale park. One group were engaging in antisocial activity throwing stones at the psni vehicles as they passed .After the psni car turned around approach the park the group began to run away. This happened as staff were approaching the group. Staff chatted with the group about their behaviour and other relevant conversations and dispersed without any more incidents. The second group were just hanging out in the park . Some were bored and two young men were in low mood. They are known to staff and the team chatted with them helping to boost their self esteem.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Tonight was very cold and wet yet young people were out as they still struggle with the Covid lockdown. Several of the young people we engaged in conversations were openly talking about the negative impacts they are experiencing from the lockdown. We had conversations with some of them about support in going forward. We gave out a couple of cards with contact numbers of support organisations who could help support them. We also discussed possible future work when we are allowed to reopen. Will follow up these contacts. We also encouraged 1 young person to contact their and another to talk to their CAMS support.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Very positive reception from the majority of the young people staff spoke to. Several young people were in an area which is renowned for drug dealing. Although this is the case there was no sign of drug use nor paraphernalia It was apparent to staff they were suspicious of them and did not want to engage. Staff explained their role and objectives and ensured the young people knew when they would be back out again, should they wish to engage. The weather was bad, snow and rain showers and a high wind. Staff believe that as the weather gets better they will see more young people out on the streets</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>While there were a lot of young people out there were no antisocial issues. Young people engaged well and very relaxed.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Young people engage in alcohol and drug misuse within the Dunville park young people engaged well however, this group of young people have been engaging positive over the recent two weeks this is still prevalent within the Saturday session with increased numbers. Ross Street and Albert Street again small fires within the block of destroyed flats. This young people engage well with staff but remain set in the ways of attacking the police when they drive within the area. Linked in with St. Peters Immaculata Youth Centre but again further planning and holistic approaches is needed to resolve the deep-rooted issues within the area and to put interventions in place to promote positive decisions and to enhance the life opportunities of this group of young people again this is increasing every night with more young people involved in this activity.</p>
<p>Addressing needs of vulnerable young people through street based response.</p>	<p>Young people engage in alcohol and drug misuse within the Dunville park young people engaged well however, this group of young people have been engaging positive over the recent two weeks. Ross Street and Albert</p>

Addressing needs of vulnerable young people through street based response.	Street again small fires within the block of destroyed flats. This young people engage well with staff but remain set in the ways of attacking the police when they drive within the area. Linked in with St. Peters Immaculata Youth Centre but again further planning and holistic approaches is needed to resolve the deep rooted issues within the area and to put interventions in place to promote positive decisions and to enhance the life opportunities of this group of young people.
Addressing needs of vulnerable young people through street based response.	young people engaged well with staff during the outreach session and wanted to come back to the centre to enjoy a Friday night within the centre, this has shown the young people relationship building up over the last couple of weeks. The squad of young men would normally engaged in anti-social behaviour and vulnerable activity staff was extremely impressed by the young people's positive choices tonight.
Addressing needs of vulnerable young people through street based response.	Young people engaged well with staff team tonight positive engagement and conversation around alcohol and drug misuse during the engagement young people where talking about how early they would start the activity in the Dunville park fire was set tonight in the play-park before staff entered the park within the swing area and staff had conversations with the groups in the park and young people said it was junior age young people creating small fires. No fires around Ross Street flats small engagement with young people around Ross Street/ Albert street staff felt young people wanted to pull away from activities and not having staff members around them.
Addressing needs of vulnerable young people through street based response.	Young people engaged well, Group up in Dunville park alcohol and drugs misuse still on-going issue police engaged with group of young people Ross Street and Albert Street staff ensured young people where safe during the night.
Addressing needs of vulnerable young people via a street based response	Highlighted Proposed Interface Tension between Suffolk and Lenadoon area - intervention with young people in Suffolk Community at wooden built hut in estate. Engagements with young people regarding safety and highlighting keeping safe at contentious times, challenges were around alcohol misuse, small fire and slipping/jumping over fire and safety around materials and metal cage at fire. Engagements with community representation in area. Positives that young people were informed about youth centre opening in area, building relationships with young people, raised awareness of alcohol.
Addressing needs of vulnerable young people via a street based response	Responsive to various requests tonight due to the nature of ongoing activities. Waterworks was packed with approx. 150 young people and assisted in getting young people to leave area after sectarian clashes. No issues with young people in general but one arrest due to ongoing behaviour of young person. Issue with TSG and how they handled situation. Neighbourhood police very good with young people. Issues in Limestone/ Alexandra park and responded to request from community. Young people agreed to make less noise and be more respectful Antrim Road(facing Waterworks) very busy with young people for period after being removed from Park. More of a safeguarding issue in relation to traffic
Addressing needs of vulnerable young people via a street based response	The area was generally very quiet although a number of young people were moving up and down the main Shankill road in small groups then meeting others in woodvale park and glencairn area heading to the red bridge. We intervened to prevent a number of them going up. A small group in the Earl evening had been chased by some very young people at the bridge. One had a shovel as a tool to wield but thankfully no one was hurt. I spoke with some of the parents where the young people had travelled up from the lower shankill about theCovid risks and generally about the dangers of their young person's safety in where they were "hanging out". We worked very specifically with a number of young people whose mental health is low and supported them in being positive ...as best they could at that stage. Walked 2 home to ensure they were safe and again spoke with the parents about how the young person was feeling. These youth are already know to social services and gateway.
Ardoyne Bespoke Intervention	
Ardoyne Bespoke Intervention	Staff engaged with young people who were in the area and spoke to them about the anti social behaviour that took place on St. Patrick's day and made them aware of the on going pandemic the dangers involved in gathering in crowds. There was also a crowd in marrowbone park who were under the influence of alcohol and drugs but staff could not engage with them due to the gate being locked which is not safe as young people are forced to climb over the gate under the influence. There are also dog walkers who have a key to the park and young people are following them in when they open the gate. Staff engaged with the young people they could who were under the influence and made them aware about personal safety.
Ardoyne Bespoke Intervention	Young people had been throwing glass bottles at each other. Staff had conversations with the young people and made them aware of dangers of being hit with glass. The young people took on board the advice from staff and stopped. Staff had been made aware of organised fights at Jamaica street when staff arrived many of the young people had run off.
Ardoyne Collaborative Approach	It was very quiet on the streets, We did run into some young people and engaged around different street work and what they got up to on Stage Patricks day.
Ardoyne Collaborative Approach	Most of the engagements took part on flax street, we met up with a group of young people who are previously engaged in a programme AYE are running we then ran into another crowd who were throwing eggs and one of them threw an egg at a man and the man was intoxicated and tried to run after them. We met back up with the young people and challenged them on their actions. We went into the new lidl site were we meet up with a group of young people from the Shankill and ended up talking to them for a while about potential projects we could do with them and about the Ardoyne area and being part of their communities, the young people said they will come back when we are out to talk more about it and see what other opportunities there are for them. We ran into another group of older lads we we spoke to about a new project coming up and if they had any interest which will be followed up by AYE.
Ardoyne Collaborative Approach	N/A
Ardoyne Collaborative Approach	Our team engaged with a group of young males aged 11-13 at Hillview retail park who were attempting to raise tensions between the areas of Ardoyne and Woodvale. It was a challenge trying to engage with these young

Ardoyne Collaborative Approach	people at first, however, we were successful in encouraging the young people to move to a safer area. Our team also engaged with large groups of young people along Ardoyne Avenue. These young people were aged between 11-16 years old, our team spoke to these young people about the dangers of gathering in large groups and the risk of covid-19, we encouraged these groups to disperse into smaller groups. Finally, our team challenged a group of young people engaging in anti-social behaviour in the Marrowbone Park. As the park gates were locked it proved very difficult for our team to create any success in this intervention. Again, our team highlighted the importance of health and safety to the young people.
Ardoyne Collaborative Approach	The start of the night was quiet but with good conversations around schooling youth programmes and OCN's. There was a crowd at flax street on their bikes but were just hanging out, hillview retail park got a new security guard who is at the gates and it seems there hasnt been trouble since.
Ardoyne Collaborative Approach	The streets were mainly quiet but there was a large group of 24 young males standing on flax street and they were getting backies on a moped. We had a concerned resident shouting at the window talking to us that no one can get any rest as they constantly flying up and down beside the boys pitches. When walking down the young person on the moped came full speed at us and tried to scare us but they stopped before they hit us. I finally got to the young person and tried to engage but he was having none of it.
Ardoyne Collaborative Approach	The streets were quiet enough, there was young people mostly in youth centres or playing hunts on the streets. We did bump into some older ones who were chatting about work and when they can go on a residential.
Ardoyne Collaborative Approach	The streets were quiet which could be due to the weather, with the young poeple we did engage with a few had been a bit up set with boys making fun of them about periods. Youth workers engaged and spoke with them.
Ardoyne Collaborative Approach	There was a group of 8 Males at the new Hillview retail park throwing objects across the Crumlin road to fight with the 10 boys standing on the other side. We spoke to them about the impacts of their actions and moved them onto flax street where we spoke to them about groups and schools as they were finding schooling hard and their subject choices for GCSE's. We spoke to 4 further females about mentoring they have been participating in with yeha and how it was going. We came across a large group of people standing outside the NB housing on Flax street who were running in and out of the building when approached they backed off but didn't remove themselves from the building after exhausting all avenues.
Ardoyne Collaborative Approach	There was a large group of young people playing hunts which was great to see, any other young people who were engaged was going into the youth centres apart from 2-4 young people who were drinking.
Ardoyne Collaborative Approach	Tonight was quiet with very little young people in the streets. We walked around the Ardoyne and Marrowbone area tonight and it was quiet. After 8pm a good few young people came out of the AYC and we were chatting to them about school and some of them going on to university to do a degree in September. No issues tonight
Ardoyne Collaborative Approach	Tonight we had plenty of great engagements with young people relating to groups we had running between both AYC and AYE. We were able to challenge young people's thinking about different situations tonight when a man in his 20s was hanging around young people aged 11-15. The man was giving some of the young people money and also giving them cigarettes. We also witnessed this man take drugs not too far away from the young people. We warned the young people who he was about with around the danger about strangers and challenged them on why they thought it was ok for someone to do that. We engaged with young people at hillveiw tonight as there was a big crowd hanging around there and there were young people there from both sides (Woodvale and Ardoyne). We engaged with these young people and got the young people from Ardoyne to disperse, then we phoned NBAP to get youth workers up into the area with a better relationship for the young people from Woodvale. We also engaged with young people in Flax Street aged 7-11 and they chatted to us about he young people are going about beating other kids so they can get into peoples friend groups. While we were chatting to these young people, a few of them started throwing stones at police jeeps. We challenged their behaviour and chatted to them around the danger of others around them. At the end of the night we were engaging with that group of young people at Flax Street when 2 motorbikes went past speeding (60mph) doing wheelies but when the 2 bikes reached the bottom of the street, they swerved as they seen in the police, and then one off the bikes crashed into a parked car. A big crowd then gathered around at what happened as they police were arresting the two males. We chatted to the young people who were there and also defused arguments that some of them were trying to have with the police. We stayed in this area until the crowd dispersed.
Ardoyne Collaborative Approach	We had 10 young people who we talked with about jobs, opportunities and school and referred 2 to other organisations that could help with with what they wanted. We came across a large group of young people at the new Hillview centre who were throwing eggs and stones across the Crumlin Road, one of them hit a girl on the head and another got hit up the side of the head with a stone, we asked them was everything ok, we spoke to them for abit more and a car pulled up with two women coming from combria street and started shouting at them whilst we were there. Again we stood talking to them about what could happen if this keeps carrying on and they engaged with us back telling it was them who started it and text them to come down for a fight. We moved them on and then this was followed up by police shortly after which we told them what happened. We then took a walk and came back down to find the same crowd running back out and tried to re engage with them again but they weren't listening and didn't want to talk and turned on us instead. We got a call from the Ardoyne shops that there was a crowd gathering with planks of wood when we arrived there were already councillors and they were quickly dispersed, we followed to see where the crowd went but most of them went home.
Ardoyne Collaborative Approach	we had great conversations tonight around consent and the age of consent tonight and the young people seemed to have lots of questions. W had a death rider on flax street who nearly knocked down a child and he was arguing with one of our workers around it. apart from that it was great engagements with the young people. Young people in bike not wearing reflective gear staying off roads spoke to young people about potential

Ardoyne Collaborative Approach	programmz
Ardoyne Collaborative Approach	Young people were drinking throughout the district. We had spoken to different off licenses about keeping an eye on people buying drink for young people. We also came into contact with police around issues in Marrowbone park regarding young people drinking and Death riders
AYC Response Work	Flax street area- We engaged with 40+ young people around this area. We engaged with young people between 12-16, we made young people aware of health and safety issues and our concern around under age drinking. This became difficult as they were based outside an elderly home and was upsetting local residents. Challenges of this was the young people were in big crowds and were consuming alcohol. Around the marrow bone park area, we engaged with local council and PSNI who asked young people to leave the park which then they located into ardoyne. Young people we engaged with was 30+ between 9-16. We had positive engagements with young people who understood the risks of the global pandemic and getting involved in online youth work.
AYC Response Work	Our team engaged with two different groups of young people the first was a large group of young people aged 11-13 years old. The young people where in the Marrowbone Park that was currently closed. We engaged with the young people where they told us that they had climbed into the park. We spoke to the young people about the health and safety issues of them being the park late at night unattended and also highlighted the importance of remaining at home with the ongoing risk of covid-19. The second group of young people we engaged with were aged 10-12 years old, situated at Alliance Avenue. These young people included some past members who we encouraged to get involved with some of the online activities that we are currently providing. Successes of tonight's engagements are the young people at the Marrowbone Park took our advice in leaving the park. Also, success on engaging with past members hoping they get involved in generic youth work again. Some challenges with tonight's interventions include groups of young people are still gathering in our local parks that can become dangerous at night. It is clear also that parents are continuing to allow young people to socialise with other households.
AYC Response Work	Tonight we engaged with 2 groups of young people. 1 group in flax area were they were under the influence. We made young people aware of the pandemic. One young females parents as she was left alone and was under the influence and in a very vulnerable position. Parent came and collected young person and follow up will be done. The other group of young men were engaging with conversation about getting involved with genetic provision within the centre and were advised to go home because of the covid-19 and possibility of spreading the virus.
AYC Response Work	We engaged with 4 groups of young people in the area during our time on the streets. We firstly engaged with a group of young people on flax street close to the youth club who have been previously involved with provision in AYC. We reminded the young people of Covid regulations and reminded them of measures to keep themselves and others safe whilst also encouraging them to go home. Our second engagement was with young people at the marrowbone park who were passing by the park. The young people explained they were going home due to the weather and we provided them with some information on current online work they can get involved in with ayc. Our third engagement was with a group of young people who are currently engaged in youth provision with ayc but who are frequently gathering in crowds at the top of Ardoyne road. We reiterated again the importance of keeping safe during Covid and encouraged the young people to go home to which they responded very well too. The young people voiced they are struggling without face to face provision and with online learning in school and youth work provision. Our final engagement with a group of young people was on the oldpark area in which we provided some details of programmes young people can avail of to past participants of ayc. The young people were eager to get involved as they stated they are on the streets most nights during the week with no routine. The challenges of our engagements is not being able to provide young people with an alternative to being on the streets. Having no face to face provision is limiting as not all young people are keen on online youth work.
Ballymena - Dunfane and Wakehurst Detached	no young people about Wakehurst area 7 young people engaged in conversation sitting on wall outside Dunfane playing pitches. No drinking just talking.
Ballymena - Dunfane and Wakehurst Detached	Wakehurst: Meeting with group of youths (9). Engaged in conversation, no real issues going on. Interested in developing contact with local area worker. All were comfortable in engaging Dunfane: Meeting with group of youths (10). Engaged in conversation, no real issues going on. Playing a bit of basketball. Met some of these guys over Halloween time Interested in developing contact with local area worker. All were comfortable in engaging
Ballymena - Harryville and Dunfane	7pm wakehurst Proceeded to wakhurst area by foot next to community centre no young people. Repeated this again, no young people. 8pm dunfane playing fields No young people in sight at the pavilion. A group of 11 young people. Approximately 4 females 7 males walked passed the shop towards dunclug. We weren't able to engage becuase of this. No drink being carried or other anti social behaviors involved. 9pm return to wakehurst. Area quiet. 5 young males carrying bottles of cider. They proceeded to walk towards ballee. We attempted to engage and walked towards the park were we believed they were heading . The young people walked further out of our remit. We stayed in the car park next to the community centre until 9.30. No young people. Point of discussion. No contact from psni.
Ballymena - Harryville and Dunfane	Wakehurst 7pm Repeated area of interest twice. No young people. Dunfane 8pm Repeated area of interest twice. No young people Wakehurst 9pm Completed area of interest. No young people Points of discussion. - Communities amongst both areas were generally quiet with no young people on the streets. Weather wasn't great and unlikely to bring any young people out. - No contact from psni or sighting of officers in areas.
	Quiet night on the streets, heavy rain continued all night so there was not alot of young people visable. a group of 15 young people where congregating at the new LIDL site on crumlin road. the group engaged in

Bespoke streetwork	<p>conversations with detached workers around some of the interface issues which were happening there and spoke about their concerns of underachieving in school this year due to lockdowns etc. relationships developing between staff and young people which will hopefully continue until the opportunity arises to engage them in some face to face group work.</p>
Bespoke streetwork	<p>Staff engaged with a small group of young people who were drinking on the street. Staff advised the young people to go home due to the poor weather conditions and the on going pandemic. The young people told staff they were going home soon and left shortly after.</p>
Bespoke streetwork	<p>Staff engaged with groups of young people who were lighting a fire in marrowbone park and encouraged them to stop lighting the fire and leave the area. Staff also made young people aware of the dangers of lighting fires and how they can cause damage to themselves and others. Staff also worked with groups of young people around flax street who were gathering due to "boredom" and "nothing to do" staff encouraged them to stay positive and hopeful of the future.</p>
Bespoke streetwork	<p>Staff engaged with young people at lidl who were planning on fighting another group of young people from woodvale. Staff moved the group away from the area. Staff also engaged with a group who have been disturbing members of the local community with a moped. This group have been annoying members in the local old peoples home with the noise of the moped. Staff spoke to the young people and made them aware of the dangers of being on the moped and told them about the consequences of their actions. Staff also built a positive relationship with many of the members of this group which they look to build on in the future. .</p>
Bespoke streetwork	<p>Staff engaged with young people at lidl who were suppose to be fighting another group from woodvale. Staff moved young people from the area and prevented a potential fight. Staff also engaged with a group of young people who have been disturbing people in the local community and in a local old peoples home. They have been riding around on a moped making lots of noise and disturbing people in the area. Staff made young people aware of the dangers of these actions and the possible consequences. We also spoke to young people about how there actions impact other peoples lives.</p>
Bespoke streetwork	<p>Staff engaged with young people gathered in a crowd of 40 who were lighting fires, attacking the police and disturbing the local shop owners. Young people also put themselves in danger of being knocked down, being hit by objects that were thrown at the police, and being caught on fire. Staff spoke to young people about the dangers of this anti social behaviour to themselves and the people around them and tried to move the crowd from the area which they did after a while. Staff also put out the fire and spoke to local shop owners about the situation. Although there was a lot of issues staff built a lot of positive relationships with the young people and the young people showed the staff respect throughout all of this.</p>
Bespoke streetwork	<p>Staff engaged with young people who attacked a police land rover with a glass bottle and managed to get them to stop and move from the area. Staff also made young people aware of the dangers they are putting themselves under while engaging in anti social behaviour. Young people in the area were also aware of the recent attack on a young person in the old park area and were anxious about this. Staff spoke to the young people and tried to support them as they do not feel the streets are safe. Also there was a small crowd in the bone hills but staff could not engage with them as the gate was locked.</p>
Bespoke streetwork	<p>The teams made young people aware of the dangers of being out during a pandemic and reminded them of the risk they are putting themselves and others in and advised the young people to go home. Teams also made young people aware of the dangers of drinking and lighting fires and tried to move crowds away from hot spots and also advised young people to go home. A small number of young people listened to this advise and went home shortly after. Young people also stated that they would be interested in engaging in a targeted programs.</p>
Bespoke streetwork	<p>Tonight was very quiet and there were no issues due to bad weather there was not many young people in the area and most of them were just walking around. No anti social behaviour or other issues.</p>
Bespoke streetwork	<p>Very Busy night on the streets. PSNI made contact with NBAP staff and requested support in tackling a number of illegal gatherings and anti-social behavior issues across North Belfast. 70 + young people at the waterworks park engaging in underage drinking and drug misuse, multi-agency response on the scene. Around 30-40 young people lighting fires and engaging in underage drinking in the woodvale park which resulted in police, fire service and ambulance arriving on the scene, staff had no access to woodvale park as all access points were locked. police requested support in dealing with a group of around 20 young people aged 13-16 at Ardoyne interface who were throwing stones, and running back and forth across the road. staff successfully engaged these young people in a conversation around safety and were able to move the group away from risk.</p>
Bespoke streetwork	<p>We have had plenty meaningful positive conversations and engagements with young people</p>
Bomb Scare	<p>Key staff leasing with CIT co Ordinator and Local elected representatives after they were made aware of a pipe bomb left at a families home Key staff offered support for displaced families collective decision made that families would transfer to Grovenor recreation centre while key SPIYC would provide a youth work response in and around the area/home of the bomb Staff promoting positive decision making and keeping safe methodoglies supporting young people in developmental thinking skills</p>
Bomb Scare	<p>Key staff received phonecalls from CIT CSO and elected Reps A suspected pipe bomb had been left at another families home. Staff supported young people in positive decision making the development of thinking skills The young people engaged for around 35 minutes at the cordon - then moved up to the centre with key staff. Key staff in contact throughout the remainder of the night in phone contact with CIT worker Elected Reps</p>
CMYC Safeguarding on the street	<p>A large crowd had gathered along the interface at Lanark Way with the majority of young people from outside the area, they engaged in riotous behaviour for a number of hours and staff done their best to prevent them from doing so and focused primarily on the younger children taking part. It got extremely dangerous when the gates to Lanark Way were broken and young people engaged in hand to hand contact. Young people attacked Police further up the Springfield Road at 1 point but the vast majority was focused on the gates at Lanark Way.</p>

<p>CMYC Safeguarding on the street</p>	<p>It was relatively quiet all weekend, there was some concern on Friday evening about young people going to Innovation Factory area but when we were there it was quiet. We spoke with a number of young people who had been congregating on Saturday evening but were going out of the area, they did not tell the staff where they were going. There seemed to be a lot of young people away from the area on Saturday evening which made the staff think that they were elsewhere in Falls Park or something because Dunville was also quiet. The staff had good engagements with young people around current guidelines and are all looking forward to getting back into the centre.</p>
<p>CMYC Safeguarding on the street</p>	<p>It was very busy with a large number of young people at Clonard Shops and the Black Wall beside Millennium Way, young some young people were engaging in at risk behaviours with Alcohol and we had conversations around their behaviour, there was a visible police presence in the area and young people moving around the area. There was no real instances of any ASB and young people.</p>
<p>CMYC Safeguarding on the street</p>	<p>Spoke at length with a number of young people that are or have been members of the youth centre regarding being in large crowds and lockdown restrictions, we made them aware of possible consequences and the impact that their choices can have on their future. We also spoke with them regarding their wellbeing and how they are coping during COVID, how online learning has been and what they are looking forward to the going back to school.</p>
<p>CMYC Safeguarding on the street</p>	<p>Very explosive night at the interface, a large crowd had gathered to take part in a riot. It escalated with police deploying water canon. It was at this point that staff finished and withdrew from the area. It was manic all night with a lot of tension in the area and clashes amongst young people with adults. Staff done their best to direct younger children away from the clashes but a lot of the time we were unsuccessful.</p>
<p>Colin Detached argeted street-based response to vulnerable young</p>	<p>11/03/21:Initial engagement leading to successful intervention with group of young people allegedly involved in ongoing ASB. 12/03/21: Continued conversations with young people previously identified as disengaged with their community. 13/03/21:Further positive street based interventions led to reduction of alleged ASB by targeted groups of young people. Positive outcomes successfully discouraging risk taking behaviours through meaningful conversation.</p>
<p>Colin Detached argeted street-based response to vulnerable young</p>	<p>19/03/21 Noted reduction in numbers of targeted groups of YP engaging in alleged ASB following St. Patrick's Day interventions. Continued positive conversations with young people previously identified as disengaged with their community, progressing further towards targeted centre-based group work. Further engagement with young people targeted upon Glider with visible attitudinal improvements towards public transport employees. Continued engagement with young people previously identified as disengaged with their peers, bespoke intervention proposal to be submitted to progress to centre based group work activities to reduce vulnerability through increasing risks of isolation. 20/03/21 Continued family intervention resulting in positive outcomes when staff assisted YP home to safety. Relationships with targeted high-risk groups of YP through meaningful conversation continued, with Intended outcome to re-engage and encourage participation in centre-based target group intervention.</p>
<p>Colin Detached argeted street-based response to vulnerable young</p>	<p>25/03/21 Staff engaged with established intervention group, final progression stage now towards centre based planned engagement through issue-based sessions IN collaboration with NIFS. Newly engaged Identified vulnerable group YW team engaged with small group of YP recently identified as vulnerable through risk-taking and challenging behaviours. Developing contact through street-based interventions with the aim to integrate into targeted centre-based interventions Follow on engagement from St. Patrick's Day 1 to 1 support with vulnerable young person and parent, family support provided and engagement to take place with Social services as enhancement to a whole family intervention 26/03/21 Continued engagement with targeted YP whose risk-taking behaviours had resulted in becoming known to PSNI. Street based interventions agreed with YP and met approval with SYW. 27/03/21 Ongoing engagement with a number of YP who were subsequently assisted in journey home due difficulties boarding public transport as a result of possible alcohol consumption. Contact to be made regarding centre-based interventions with respective youth work teams in relevant areas regarding these young people, who presented as vulnerable due to on-going risk-taking behaviours. Target for this group has been discussed and agreed with SYW, as pending submission group work proposal to re-integrate group into centre-based provision post Easter break.</p>
<p>Colin Detached argeted street-based response to vulnerable young</p>	<p>Multiple conversations with the aim promoting positive choices thus reducing vulnerability. Positive outcomes from multiple interventions with yp deescalated several potentially high risk situations. Continued interventions and reduced levels of vulnerability by diverting yp away from negative behaviours regarding PSNI. Further successful engagement with targeted groups of yp encouraging positive choices led group to not engage in risk taking behaviours or consumption of alleged substances.</p>
<p>Colin Detached Targeted Covid Response</p>	<p>Met 10 young people at the summer hill shops in twin brook. They were playing two man hunt so they only wanted to engage for a short period of time. They asked when the club would open again as they are missing it. They can't wait to get back to normal as they are very bored as there is very little to do. On the top road beside the shops there was 7 young people outside the shops. Two of those young people were you fighting but it looked like it was getting serious, so we engaged to find out if everyone was ok. Both young people didn't want to talk very much other than to explain that they were only playing. The 7 young people didn't stay very long after the intervention and moved on towards the Colin Bus hub. There was a fire started at Woodside due to young people. Me and Pauline made our way up we're we met another 5 young people who attend the club. We talked them into moving away from the fire as it was very dangerous and unsafe. The 5 young people moved away with us and made our way to the petrol station close by. There was another crowd of young people which we didn't know. They didn't engage and due to the situation being unsafe we decided to move on the the 5 young people that we knew. Not long after that the police and fire service turned up to to put out the fire. We engaged another 6 young people at the river path. These young people have never attended the youth</p>

Collaborative Outreach Provision SMYC	club but had heard of it. We discussed with them what we offer in the centre, our services and the benefits. They seemed very interested and said that they would follow us on Facebook to keep updated on our services. Staff were contacted about a possible incident over at south way. When staff responded there was no issue or many young people over there . Young people engaged well with the staff had conversations around when the service may be reopening.
Collaborative Outreach Provision SMYC	Street work was a success. Young people were curious as to when the club would be open again and some where asking about engaging in small group work. The girls where informed about the groups occurring on international women's day. There was reports of young people taking rubbish out of a skip and throwing it on the road. We went and had conversations with them young people about the dangers of throwing things on the road as they could cause an accident.
Collaborative response SMYC	During our outreach within the creggan area, there was no concerns or issues during our street work session. we engaged with young people who were socialising within the area. general discussions held with these groups
Collaborative response SMYC	Tonight's engagements were positive young people engaged well with staff. Staff engaged with large groups as part of the collaborative response team.young people anxious of when the services will reopen as we have no news for them just yet.
Collaborative response SMYC	Was a quiet not many young people as usual. The conversations tonight were based on International women's day. Few young people gathered about the shops no issues.
Continuing Raising Awareness of Covid Restrictions	plenty of contacts, one group reluctant to engage but once they were aware we were youth service and not local police or wardens they were willing to engage. one large group were hanging out outside a house and we positively encouraged them to move along which was a good intervention. about five members from the large group were said to be from Creggan. speaking with adults along the route they were aware from Linda (Caw Nelson Drive Action Group) that the Caw Youth Team were about and about to support young people.
Continuing Raising Awareness of Covid Restrictions	The 6 YP we spoke with in the added pathway were at first reluctant to talk to us, but they did respond positively to us after discussing their reason for being there & Keeping safe. Due to the bad weather the rest of the area was significantly quieter than Monday.
Creggan Outreach	No major incidents to report. Police got out of their jeep and chased a few young people up the chapel lane after they had thrown a stone at the jeep. The rest of the young people engaged where just hanging about different areas playing or cycling.
Creggan Outreach	The outreach team were conduction walking routing area while engaging with young people socializing with peers, positive engagements throughout the night. Young people engaged with the youth team, showing interest in developmental work.
Creggan Outreach	throughout our walks tonight we had positive engagements with all young people. There was no issues tonight. Some good conversations with YP who were happy enough to chat to us as they are beginning to get to know & trust us better. A big proportion of the YP we are seeing on the streets are not from Caw, but from Tullyalley & Clooney.
CYC SBYW 24/03/21	Caw was very quiet tonight but the young people we did see were very happy to engage with us.
CYC SBYW 30/3/21	Quieter tonight and YP were happy enough to talk with us.
CYC SBYW 30/3/21	Quieter tonight and YP were happy enough to talk with us.
CYC SBYW w/b 15/03/21	First group of YP we engaged with were all known to staff & were all 18+ & drinking - The engagement was good with YP being happy to catch up with us & discuss their personal & group safety & responsibilities while drinking. We later spoke with a group of 8 younger YP who were not from Caw & were not drinking but were gathering up on the new Estate - when we checked by with them later there were 16 younger YP & we observed from a distance that they were engaged in a verbal altercation with 2 adults who live in the houses where they were gathering outside - Once it calmed down & the adults had left we approached the group of YP to try to encourage them to leave the area but they were refusing to go so we left to engage with other Yp we could see arriving to join in. The adults returned & the situation re-escalated so we moved further away where we could keep an eye on what was happening & were able to successfully deter other YP from joining the situation. It further escalated & we could see a lot of Adults gathering arriving in vehicles at which point we left to call 101 but the PSNI arrived as we were leaving so we continued on our route back to the centre. Apart from situation above, the session was a success with all YP being willing to engage with us.
CYC SBYW w/b 15/03/21	Some great interactions tonight - Lots of Yp on the streets in large groupings most of whom were happy enough to engage with us - Just hanging about, spending time together. Unusually there was no abuse from any YP tonight. All asking when the club will be open again. 2 X YP in the woods guarding the wood for the Bonfire. YP were challenged about none use of face masks & social distancing. A lot of Very young People smoking & using ecigs - This was challenged & YP were asked where they get them - Shops & Online.
Detached provison within the Short Strand interface areas	Our Bespoke intervention programme is in response to a recent paramilitary show of strength in East Belfast closed to the Short Strand Interface area that raised tensions in the community. Throughout the evening we kept in touch with both the PSNI and EBAYP staff team to update and debrief on any points of information. There were some young people out mostly early on in the evening although they weren't causing any problems. We engaged with them and shortly afterwards they headed home.
Detached provison within the Short Strand interface areas	Our Bespoke intervention was planned out of concern for young people after a recent show of strength by a paramilitary organisation in inner East Belfast a few days ago. This same area is close to an interface that has historically seen a range of anti social issues including pre arranged fights amongst young people and outburst of sectarian violence. As part of our intervention work we had a team of local youth workers covering the streets within the Short Strand side of the interface and ensuring any young people out were provided with support and advice.
	The main reason for our Bespoke intervention tonight was as a result of a recent paramilitary show of strength

<p>Detached provision within the Short Strand interface areas</p>	<p>in the Pitt Park area of East Belfast and an increase in tension within the community. This same area is close to the Interface with Short Strand and we wanted to make sure that any young people out were kept safe and given advice to return home as with the Covid 19 restriction still in place. Throughout the evening our Youth workers made contact with both the police and staff from the EBAYP to provide updates and share information. There was a greater number of young people out that in the previous few nights. We engaged with around 18 young people who were all local and had a short conversation with them mainly about being bored and the news that was on social media.</p>
<p>Detached provision within the Short Strand interface areas</p>	<p>Throughout the evening we made contact with both the PSNI and staff from the EBAYP to provide updates and share information. We engaged with a few groups of young people who were all local and know our staff really well. They informed us they were out because they were bored and fed up sitting in the house. One of the groups raised the issue of the trouble in Pitt Park and said they were just worried about it spilling over into the Short Strand. In all we listened and acknowledged their concerns, we also spoke to them about the Covid 19 restrictions and the need for them to go home as soon as possible. They engaged positively with our team and with the weather being really bad it probably helped to also influence their decision to head off home as well.</p>
<p>Divis Street Work</p>	<p>Afternoon session - effective communication in relation to ongoing issues/concerns that staff have with reactive policing gestures/attitudes/behaviours towards young people and staff The roles and responsibilities of each community/Stat/Snow roles in relation to the wider community. Positive outcomes achieved with further engagement/planning at a date to be confirmed Evening Session : Staff supporting young people in positive decision making and thinking skills with a core group of young people at the Ross Road flats meaningful effective outcomes achieved in supporting young people in the spaces that they socialise in Core group of young people engaged and interventions provided with a core group at Dunville park - promoting harm reduction and keeping safe methodologies</p>
<p>Divis Street Work</p>	<p>detached methodologies in the Greater Lower Falls and Dunville Park area Staff engaging and providing interventions at the Ross Road Flats/Alberts. Staff supporting young people in positive decision making and keeping safe methodologies Staff engaging and providing interventions in Dunville Park 3 core groups engaged and interventions provided Key staff dealing with 2 critical incidents and disclosures of CSE - All child protection and keeping safe policies and procedures followed Key staff member in liaisoning with PSNI - serious CSE situation One vulnerable young person seriously physically assaulted - Both young women taken home PSNI Parents aware Follow up tomorrow/Monday morning</p>
<p>Divis Street Work</p>	<p>Detached methodologies in the Greater Lower Falls area Dunville Park Staff were made aware earlier in the day that there was a possibility of a pre arranged fight and made a decision to begin the detached session a half an hour earlier (6.30pm) (Throughout the session in conversations and discussions with various groups of young people this didn't happen) Staff promoting positive decision making/keeping safe and harm reduction in the Dunville Park - due to young people (30) being displaced from their space in Falls Park a number peer groups were socialising in the Dunville Park Staff providing at risk crisis support for a young women who had disclosed she couldn't keep herself safe for a 30 minute period (actively suicidal) - 2 further disclosures of self harming and SE with physical violence (All child protection policies and procedures fully implemented and recorded) Key staff had a prior relationship with this young person and in full consent with the young person she was brought home to her grandmother - all fully aware of the pressures and traumas this young person is dealing with on a daily basis. Key staff in communication with Angie Quirke (EA) in relational to this young person. Staff supporting young people to socialise in a risk free environment this evening promoting positive decision making and development of thinking skills in relational to a fire being lit at the bottom of the park (Detached staff were supported to put the fire out) Harm reduction methodologies and keeping safe Young people and staff actively participating in discussions and resolutions in relation to The speakers and conflict with local residents Encouraging and supporting a group of young people in relation to positive decision making and possible consequences of throwing bottles out onto the Grovensor Road - the impact of this in relational to entering the Justice system Staff promoting PHA guidelines - Supporting 13 young people to access masks and hand sanitiser with 3 young women accessing personal care packs.</p>
<p>Divis Street Work</p>	<p>Detached Methodologies in the Greater Lower Falls area and Dunville Park key staff engaging and providing interventions with with 3 core groups Group of young males engaged and interventions provided at Ross Road Flats - key staff using teambuilding and ice breaker games as an alternative to self destructive behaviours the young people had been given paint that adults had thrown out and wrote names of the NPT on the walls of the flats/Albert street - key staff supporting young people to develop their thinking skills and making positive decisions. Group are extremely frustrated and angry at limited provision to youth centre/then coming under increased negative pressure and attention at their social space - staff supporting the young people in managing feelings/emotions Core group engaged and interventions provided at the Dunville park Key staff supporting the reduce the Use group supporting the young people in processing, understanding and coping with the consequences of St Patricks day (keeping safe methodologies put in place) Staff providing interventions and engagements with 2 other core groups in park keeping safe harm reduction and conflict resolution methodologies</p>
<p>Divis Street Work</p>	<p>Detached methodologies in the Lower Falls/Dunville Park Staff promoting and providing harm reduction keeping safe methodologies and promoting positive decision making and thinking skills Key point of contact Geraldine In communication with Lisa Lynn (CIT CSO) and PSNI Davy (NPT sergeant) in relation to a group of young people accessing the building site at the Divis Back path - key staff engaged and provided strength based approaches via conversations and alternatives to socialising in this space</p>
	<p>Detached methodologies in the Greater Lower Falls area and Dunville Park Staff promoting and providing positive decision making, thinking skills, and keeping safe methodologies with 3 core groups of young people.</p>

Divis Street Work

Ross Road flats/Albert street - staff promoting alternatives via the outreach process using teambuilding/ice breakers games to promote simulates and keeping safe Dunville Park - staff supporting young people in keeping safe harm reduction methodologies, staff providing interventions with young people struggling to articulate/manage feelings and emotions - lack of empathy and respect in relation to attitudes and actions towards young women. Staff promoting keeping safe and meaningful engagements/interventions at the front of the road (outside the park) - staff again using alternatives and positive challenging to support young people in the development of their thinking skills.

Divis Street Work

Detached team providing and promoting positive decision making/thinking skills/harm reduction and keeping safe methodoglies staff engaging and providing interventions at Ross Road/Albert street with 15 young people, the group where trying to gain access to the derelict flats and had told staff that they where going to set them on fire - someone had given them pallets staff spend a period of time engaging the group in conversations around behaviours at their space a decision was then taken to bring the group into the centre (group where spilt into 3 groups of 5) as a response to keeping this group of young people safe. key staff in contact with Lisa Lynn around the removal of the pallets while the group was engaged with staff Key detached team engaging and providing interventions at the Dunville Park a group of young people where socialising in the play area staff spend time engaging and supporting the group in developing thinking skills - when 2 young people from outside the group came into conflict with the group apparently over a bottle of alcohol. 5 members of group tried to attack the 2 young people and the rest of the crowd pushed forward. Key staff intervened physical to de escalate the violence and keep all young people safe. Key staff supported the 2 young people to access public transport Then followed up with the larger group of young people - the group active participated in a session lasting an hour in the playpark looking at The implications of being caught up in group violence The contributions of alcohol/drugs in decision making The impact on their lives and the 2 young people if staff hadn't have been there to intervene Staff where confident when leaving the park that the fight had been resolved and that this would not continue into community/family setting No young people injured in this incident.

Divis Street Work

Key staff had engaged a group of young males in and around the Ross Road Flats/Albert Street area, Key staff in contact with Lisa Lynn (CIT CSO) / communication with PSNI CNPT via Lisa When staff arrived a bin had been set on fire, staff used positive decision making and thinking skills approaches and methodoglies to put out the fire. Staff continued to engage and provide interventions using teambuilding games and ice breakers (PHA restrictions adhered too) supporting young people to find an alternative to boredom/conflict with residents and increase simulism in the space they were socialising in Un beknown to staff - apparently a resident(s) had reported to PSNI/NIFRS that the flats were set on fire TSG units were send in to accompany NIFRS Staff stayed with the young people to ensure their safety and support them in keeping safe methodoglies as staff the jestures and attutudes of the Police were provocative towards the young people

Divis Street Work

Key staff in communication with Lisa Lynn CIT CSO who had been contacted by some parents who had concerns around a pre arranged fight Staff engaged and provided interventions with a 3 core groups of young people who had came to Dunville park from Springfield Road and Bally murphy staff supporting young people in positive decision making understanding languages and inappropriate gestures/languages staff delivered an outreach group work with the group supporting the young people in understanding and developing thinking skills in relation to actions and consequences bullying impacts of prearranged fights and bullying Staff engaging and providing interventions with 2 core groups at Ross Road Flats One young person had thrown a brick threw a residents windows - this had escalated into conflict with the young people - staff using negotiation skills to ensure young people are kept safe. A large fire had been lit at the base of the front entrance of the flats (there is one resident left in the flats and is being rehoused later this week) Staff liaising with NIFRS staff stayed at Ross Road site providing outreach style group work session in supporting the young people in developmental thinking skills impacts of self destructive behaviours on their life chances, families community

Divis Street Work

Last night was a. more positive night. Staff engaged young people on the Springfield Road and diverted them from violence on the interface. Staff phoned parents and had young people collected. We opened the youth centre for the 9-13 year olds and this was very positive with 47 young people in attendance.

Divis Street Work

Staff engaged and provided interventions with 2 core groups in Flats at Ross Road and Dunville Park Ross Road Flats/Albert Street - Staff supporting young people in positive decision making and the development of thinking skills, the group is struggling with managing feelings/emotions in relational to Intimidation in their social space, (anger at PSNI/NIFRS a lack of simulism/limited access to services. Staff used teambuilding games/ice breakers to create a safe environment to begin to get the young people to begin to look at their feelings/emotions in the space and environment where the confrontation is occurring. Staff promoting and providing engagements and interventions in the Dunville Park and Grovensor Road area (Side of Dunville Park) Staff supporting young people in harm reduction and keeping safe methodoglies/approaches staff and young people actively participating in teambuilding activity and ice breakers to develop and build trust.

Divis Street Work

Staff felt tonight's session achieved meaningful outcomes Core group of young people engaged in the Dunville Park staff promoting PHA guidelines, keeping safe and positive decision making methodoglies - (access to PPE for 7 young people) Staff in communication and liaising with Llsa Lynn - 2 core groups at the Maureen Sheehan centre /Ross Road flats /Albert street the young people had set materials up against the Flats and tried to set fire to them. Staff supporting young people in thinking and positive decision making skills Staff supporting young people to challenge their frustrations and emotions when PSNI arrived to deal with the incident. Key staff stayed in Ross Road/Flats supporting young people and providing an alternative to conflict in their space

Staff promoting and providing positive decision making, keeping safe and harm reduction methodoglies. Detached session broken up into 2 sessions Staff engaging and providing interventions in Ross Road Positive

Divis Street Work	<p>decision making skills/thinking skills supporting the young people in finding an alternative to self destructive behaviours, staff also using negation skills between young people, local residents and PSNI. Staff used teambuilding skills and supplied the young people with a football (PPE equipment) as a simulas, group headed up to the Park to use the green space. Staff providing interventions/engagements in Dunville Park harm reduction methodoglies positive decision making in relational to levels of alcohol etc key staff supporting a core group of young males in keeping safe - 'community/political reps on the ground with key staff and CIT CSO working as buffer to prevent serious conflict/contention Staff supporting vulnerable young people to get home (2x young women) Follow up with these 2 young women agreed for Friday.</p>
Divis Street Work	<p>Staff promoting PHA guidelines, keeping safe and positive decision making methodoglies staffing engaging and providing interventions with 3 core groups at Dunville Park Ross Road/Albert Street Building site at the back paths Key staff member liaising with Tina Black/Lisa Lynn in relation to phone calls from PSNI that young people gathering in Dunville park - staff provided a youth work response, positive engagement with the group, staff using teambuilding/ice breaking games to reduce boredom. Positive meaningful outcomes achieved in tonight's session in Keeping Safe Harm reduction increased participation reduction of crime</p>
Divis Street Work	<p>Staff providing and promoting harm reduction keeping safe methodoglies in the Greater Lower Falls/Dunville Park community Staff engaged and provided interventions with 3 core groups of young people Ross Road flats/ Albert Street Dunville Park Grovensor road Key point of contact for Lower Falls Geraldine in communication with Lisa Lynn (CIT CSO) in relational to issues and frustration of local residents with this core group at the Ross Road/Albert Street. Staff supporting young people in positive decision making and developing thinking skills - staff using team building/ice breaking games to promote an alternative to conflict/contentious in the young people's space. 2 Core groups of young people engaged in Dunville park - staff promoting PHA guidelines and distributed hand sanitiser and face masks 2 personal hygiene packs also distributed. Staff promoting positive decision making/ thinking skills to support young people in using alternativities to lighting fires and becoming a focus from residents PSNI/BCC Core group of young people engaged in Grovensor back field - materials dumped on back field by adults had been set alight staff engaged with group of young people and used a outreach group work style approach in supporting the young people to promote social action, development of thinking skills</p>
Divis Street Work	<p>Staff supporting young people in keeping safe and de-escalating potential violence A stolen car was being chased in the area this evening and loss control at the corner of Albert Street and hit a wall - Staff promoting and providing positive decision making and keeping safe through engagements and interventions to support Staff supporting a group of young people at the Ross Road flats - using team building as an alternative to becoming caught up in potential conflict with PSNI and residents</p>
Divis Street Work	<p>Staff were out in the community engaging young people in identified hotspots (Dunville Park, Ross Road, Back Path) staff used detached methodologies in promoting positive decision making and harm reduction. Staff engaged a group of young people in Dunville park, young people told staff that they had been chased earlier from the park by community reps, many of the young people were under the influence of alcohol checked-in with young people throughout the night in making sure they weren't putting themselves in any danger. Staff were informed of a group of the young people at Ross Road who had been throwing eggs at houses and passing cars, staff engaged the group in conversation in discussing the possible consequences of their actions young people and the implications this could have on themselves, their families and community.</p>
Divis Street Work	<p>This intervention was in response to young people being demonised within the community for their behaviours and attitudes, YP have been in conflict with the community and statutory providers. During this session staff focused their engagments at local hotspots as the weather had seemed to keep most young people at home, Staff nagged 2 groups of young people in the local park, Young people expressed interests pf joining the youth centre when Covid ends, Young people were freindly and inviting for staff, conversations consisted of the following: School work and education. Support Friendships Having something to look forward to engagements were positive and staff were able put some foundational relationship building work to intentionally have more positive relationships with young people in a detached situation</p>
Divis Street Work	<p>Tonight was a much quieter night. Had 47 young people in the centre and the Members Forum were volunteering. Had a call from NOT Sargent to help with one particular group who we were able to engage and bring them back to the centre. Staff held a meeting with them.</p>
Divis Street Work	<p>Tonights session is in response to a number of ongoing issues with young people regarding residents and the PNSI/NIFRS This session enabled staff to engage young people in the spaces that they occupy to promote safeguarding and personal safety of young people while also engaging in discussions highlighting the impact of decision making and antisocial behaviour in the community Staff responded to a referral from the Community safety officer for lower falls highlighting a safety issue in relation to young people and fire at a local hotspot area, staff engaged young people and waited in the NIFRS attending to put out the fire at this situtaion staff encouraged young people to engage with the NIFRS staff when it was safe to do so. Following up on this we have co-ordinated with the community safety co-ordinior and local cclr to arrange a workshop with the NIFRS in St peers YC the following Wednesday to develop a community relationship with NIFRS and promote Personal safety and community cohesion</p>
	<p>Tonights session was in response to a number of contentious issues and challenges regarding young people from the lower falls with Residents and PSNI, This session enabled staff to engage young people in their space in wet and windy evening, Some young people gathered outside the Youth centre and attempted to gain access, Unfortunately we were at full capacity due to the restrictive nature of our operations at present, Staff engaged in conversation with young people highlighting the weather as a rationale to go home and stay safe, staff also engaged keeping staff methodologies by advising and providing accurate information from PHA</p>

Divis Street Work	around guidelines, Staff also supported young people at local hotspot in positive decision making regarding anti-social elements to their behaviour and were able to secure positive outcomes for young people deciding to go home and not risk being placed into the YJA, Some discussions consisted of young people wanting to become involved on more targeted and developmental programmes and actives with ST Peters YC when restriction ease Staff agreed to follow up with young people if/when they meet again in a street based situation Staff also engaged in a existing partnership initiative with Falls Partnership Initiative developing and providing food parcels and packages to some of our most vulnerable families
Divis Street Work	We had street staff working Dunville and Ross Road from 4-9pm. Opened the centre 6.30-9pm and had 49 people present. Took a large group out of Dunville park back to the centre. Had two fire brigade call outs at 6pm and 9pm.
Downpatrick Street Response	there was heavy rain, no body out on the streets
Downpatrick Street Response	We spoke to two young men hanging out outside BM Bargains, they appeared to have been drinking, introductions where made, then an older couple came out and engaged with young people appeared to be related.
Downpatrick Street Work 2	Young people met were hanging out age range 10-15, we successfully engaged them in first contact, and 16 off young people we met availed off the free pizza provided by PCSP. this time allowed staff to get to know young people a little better, most off the group are due to begin high school in September.
DYP: Street Based Project	Engagement over all three venues was brilliant all seventeen young people interacted well only challenge we encountered was at BT12 4EA when we came across some of the of the young peoples older peers where on the street which made some of them unwilling to engage with us
East1	EA Bespoke Youth intervention work in Inner East Belfast is a direct response to the paramilitary show of strength on Tuesday 2-2-21. Throughout the night we were in contact with Doyle detached team and Nicky PSNI community police providing updates and sharing information. Nicky informed us that there would be a stationary police presence at Pitt Park due to the ongoing tensions with in the area. We engaged with small groups throughout the night in different locations. Young people that we engaged with were out visiting local shops , McDonalds or exercising on bikes. Our brief conversations were about lockdown, current restrictions, going home and staying safe. We met up with Youth Initiatives detached team at Connswater walkway and discussed routes for tonight's work and the weekend. Weather - It rained on and off all night. Lower Newtownards road /Short Strand quiet tonight.
East1	EA Bespoke Youth intervention work in Inner East Belfast is a direct response to the paramilitary show of strength on Tuesday 2-2-21. Throughout the night we were in contact with Doyle detached team DI Strand town PSNI and Nicky PSNI Community police providing updates and sharing information. We were informed that there would be a stationary police presence at Pitt Park due to the continued tensions within the area. We engaged with small groups tonight around CS Lewis square and Lower Newtownards road ,some young people were out at shops and others were out due to being bored in the house. We tried to engage with a group of 7 aged 15-17 at CS Lewis square who were drinking alcohol, they ignored us and walked on. Our brief conversations were about lockdown, current restrictions and staying safe. We were in contact with Youth Initiatives detached team who were covering Outer East Belfast tonight .Lower Newtownards road/Short Strand quiet tonight.
East1	I contacted Nicky community police saying we had 2 detached teams out tonight, one covering Short Strand area and the other Lower Newtownards road/Pitt Park. We engaged with 2 small groups of males aged 12-16 and 1 small group of 3 females 12-14 years old. There was consistent heavy rain throughout the night ,we discussed the weather and Covid 19 restrictions ,while encouraging the groups to go home and stay safe .The 2 male groups that we engaged with, were coming away from Pitt Park on the walkway going towards McDonalds and inner East. The female group were at the bridge /subway and said they were out for a walk and were going home. We stayed in contact with Doyle Detached team throughout the night and Short Strand area was quiet. We were made aware that fireworks were being fired in East Belfast from a face book post but were not sure where it was. We were at Pitt Park and it was quiet..
Emergency Detached Response - LC - 10/4/21	Positive engagement and conversations with young people across key hotspot areas covering the following topics: relationships, challenges with parents, alcohol and drug use, friendships, school, emotions and feelings about returning to school, staying safe and safety around water, current protests and riots and staying away from potential risky situations.
Emergency detached response AND 10.04.21	Positive conversations with young people on the street at key hotspot areas across Bangor Town Centre. Young people were engaged in discussing the current situation with regard to the recent unrest and impact of actions, alcohol and drug use. Further engagement in youth service opportunities, employment, youth leadership and the role of youth services and PSNI
Emergency Response Detached Youth Work LC	Planned detached work in response to protest at Longstone Roundabout in Lisburn. EA co-ordinated detached response with 3 voluntary partners enabling 6 detached teams to respond. Good partnership working and co-ordinated response with PSNI. The evening passed off peacefully. Approx 100 adults and people congregated at the roundabout for approx 1 1/2 hours and then gradually dispersed. Good engagement with young people and PSNI throughout the evening.
Feb 26/27 response	Friday night's interventions focused mainly on the Falls Park and Whiterock Park sites which had been highlighted as ASB hotspots. Young people very engaging and willing to have conversations and take advice, etc. onboard. Potential for follow ups was established with several young people. Saturday night's interventions were more testing in that a much older and larger group of around 100 were present in the City Cemetery site and apart from a select few were not prepared to engage in conversation at all. A vast majority of this group appeared to have been drinking for a considerable period of time but had only entered the graveyard around

	<p>6.30 or so. Drug use was also very prevalent and quite open. A number of individuals in the group (aged approximately 20+ years) were somewhat confrontational and bordered on aggressive. After multiple attempts to engage were mostly rebuffed and a dynamic risk assessment was undertaken (in phone conversation with the Senior Youth Worker) a decision was taken to withdraw staff from the cemetery and to concentrate efforts in the park, around the playground and to respond to a group of young people gathered in Monagh Road.</p>
GDI SBYW	<p>at the beginning of the night engagement with yp was very positive, all yp were between green and Amber on rag status. There were a few drinking but no major concerns until psni approached from lower Nassau Street which sent the yp running towards the glen estate a heavily populated area. Youth staff tried to de-escalate and disperse the group with success until psni appeared again in marked cars and land rovers which escalated the situation again. At this stage youth staff stood down as no positive engagement could be made and there was too high a risk of injury to staff with flying debris</p>
GDI SBYW	<p>met a few of our members who were sitting outside a residents house being a bit loud and asked them to move on, no problems with that and 3 new young people who were with others that we knew</p>
GDI SBYW	<p>much older crowd drinking in the glen field tonight but a few of the younger yp were with them and around the park, no real issues they were pleasant and took part in conversation with us and also agreed to turn down their music after we received complaints from residents</p>
GDI SBYW	<p>our main success tonight was that we were able to get the young people to move on and head home earlier than they had initially planned, we also provided emotional support to a couple of young people who were a bit worse for wear and made sure they were safe to get home. Main challenge was the vast number of young people in the Glen field and the lack of lighting in the area.</p>
GDI SBYW	<p>staff were on the street to engage with YP staff were on the street when residents rang about a group gathering outside their house, we went and successfully engaged with this group one main challenge is we have nothing more to offer than quick conversations due to club not being fully open.</p>
GDI SBYW	<p>two groups of 11-15 year olds just standing about close to residents houses, no issues, we talked to them briefly, checked they were all ok and asked them to move away from the houses and reminded them about a zoom call they were due on at 9pm. All bar 2 joined the call from their homes shortly after. Others were junior age group trying to climb into the local park and we engaged briefly to check in and advised them not to climb into the locked park!</p>
GDI SBYW	<p>yp were actually trying to get the police out and were waiting for them to arrive so they could attack the vehicles however our intervention prevented the need for psni to attend and we moved the group on. the general area seems quiet now and yp have all headed home.</p>
Glen Parent Bespoke Outreach	<p>Throughout the week the staff were delivering a series of street based bespoke interventions with young people in the greater Lenadoon area who were at risk of getting involved in risk taking behaviour. The street based youth work was very effective having engaged with over 60 young people and encouraged them to get involved in the online youth work that the centre was currently offering. The feedback on social media and other online platforms from parents of young people and residents throughout the area was amazing, They stated that they were delighted to see staff encouraging young people to get involved in the online activities and they had also stated that they had witnessed a reduction in the amount of risk taking behaviour since the staff were deployed on the street based intervention strategy.</p>
Group Work START 1	<p>Very little young people on street tonight as there was still snow on the streets. The young people that we did engage with we're frustrated with our services being limited. Explaining to them that we are still available through zoom/messenger was a comfort to them. Positive engagement over all with the young people. No real issues.</p>
Lurgan Town Bespoke Intervention 18.03.21	<p>Lurgan Town Bespoke Intervention. Very positive intervention with young people in Hill Street and Lurgan Park area. In the Hill Street area we spoke at length with four young people who were deemed vulnerable and at risk of CRN by the PSNI. Positive discussions with these young people on living in safety and stability and discussions regarding positive behaviour in the community. At Lurgan Park we spoke to one young male who had been identified as at risk and vulnerable due to previous behaviour. Again we spoke at length regarding living in safety and stability and positive behaviour. Other engagements were additionally very positive and in total we engaged 18 young people all aged 14-18. Great relationship building with these young people and scope for further work to be carried out following liaison with other agencies.</p>
Lurgan Town Bespoke Intervention 18.03.21	<p>The intervention was positive in terms of making contact with young people who had been identified as vulnerable and at risk of receiving CRNs. Positive engagement took place with a group of 4 young people in the Mark Court area of Hill Street regarding living in safety and stability. Positive discussions were had around alcohol consumption. Additionally, in the Lurgan Park area contact was made with a young male who has been at risk of lawlessness and a positive engagement was had regarding safety and stability. In terms of challenges- the lack of sustained contact with young people in these areas from youth workers make detached youth work harder as lockdown continues. Overall 18 young people engaged. All aged 14-16.</p>
Mar 12/13th response	<p>Weather on Friday night undoubtedly played a role in numbers present at the key sites - Whiterock Playground is not presenting a major cause for concern and could possibly come off the radar, in terms of a hotspot site. Older male group (aged in their early 20s) still very much present in the areas on both nights but remaining not keen on engagement with staff. Saturday night number seemingly impacted by this coming Wednesday being St. Patrick's Day with lower numbers than normally expected; weather may again have played a role also. Much talk about St. Patrick's Day and impending large numbers predicted to be present. No key behaviours arising that caused concern and contact maintained throughout with PSNI personnel. Friday evening was again much quieter than Saturday; although we did spend more time around the general area of the BT11 8EL postcode after an altercation earlier that day in Laganside Court House between 2 local</p>

Mar 5th/6th response	families after the sentencing for the one-punch killing at Helen's Bay. Thankfully there were no further incidents between regarding this except for a car being driven erratically around the area, which we reported to the Inspector on duty. 2 groups totalling 17 young people were present at the top of City Cemetery and happily engaged for a period of time with staff - they were there prior to attending a house party and there were no issues arising from this. Saturday evening very busy in the Falls Park site and again open gates contributed to this we believe. Staff engaged with approximately 200+ young people in this site throughout the course of the session and contacted 3 parents around their children being intoxicated and extremely vulnerable - this was followed up with all 3. 1 young person engaged for a considerable period of time with a staff member and has been referred into our counselling project as a result. Positive engagements with PSNI Inspector all evening on Saturday.
March 19/20 Response	Friday evening was again much quieter than the Saturday evening. On the Saturday evening there was a heavy police presence due to a visit by the Chief Constable which had a major impact on the area - with repeated attacks on police jeeps from Whiterock Playground by groups of young teenagers. Our staff spent considerable time trying to mitigate this and at one stage were placed between the road the young people in an attempt to curtail these actions. Young people moved regularly between the City Cemetery and the Falls Park as they eluded police and council personnel all evening.
N.Belfast 10/3/21	Conversation with young people about safety.
N.Belfast Sat 20th March	Young people were going into the old Grove waste ground site, we had conversations with them on the outskirts of the ground, chatting about safety of climbing into site and making sure young people were safe. Young people at one stage were throwing stones over the railings to the PSNI, we had discussions with young people about this once it was brought to our attention.
nbap detached	Limestone RD and north queen ST very quite Adam ST their were lots of young people gather they had build a hut and had a fire going concern that the young people have to climb over the gates to get in due to police locking gates. Lidl carpark (crumlin road) young people on bikes in car park police frequently in area as young people from both communities meeting at gates staff engaged with young people and police.
NBAP detached	Challenges were that there was alot of adults, some of them watching, some of them participating in the disturbances, alot of them with masks and weapons. This created an obvious intimidating atmosphere for staff and for the young people we engaged. A lot of the young people we engaged with were there because of the excitement of the situation and it was difficult to encourage them away from the danger they may be in. We were able to engage in a positive way with a lot of the 11-14 year olds at the scene and encourage them to at least withdraw to a safe space, we also encouraged a lot of them to leave the area and visit the hammer youth club. We spoke with some adults at the scene and they were largely supportive of our actions in trying to move young people away from danger. The engagement with other youth provision was also a success, we were able to co ordinate a plan of trying to get to young people before they got the heart of the scene, with teams deployed in the streets above and below lanark way and a team actually on lanark way. Communication was constant through out the evening.
NBAP detached	We engaged with a large group of young people, whom we have met on many previous occasions on the street, some are part of our online engagement processes and some we met for the first time. We had a good conversation with them about how they were feeling, checked in around their mental health and general health and wellbeing. One of the challenges was that some of the group had climbed into an abandoned site which they had to scale a fence to get in and out of which was fairly dangerous.
New Lodge Detached	Busy night young people were welcoming and engaging in conversation
New Lodge Detached	Low engagement tonight because of very poor weather but engagements had were positive
New Lodge Detached	Quiet evening on the streets of the New Lodge. We engaged with 1 group of young people that were engaging with us but had recently stopped , we asked why and they said they have had enough of zoom through school and just want to get back to face-to-face work and want to wait until that can happen before re-engaging as a group with the Youth Centre.
New Lodge Detached	Quiet night with not much engagement but the engagement had was positive
Newington	Engaging young people who were on interface. Young people mainly unknown to staff. Those known parents contacted and informed of young persons whereabouts. Young people had also engaged with residents who were quite focal about them being on the interface. The initial information from PSNI said stones being thrown but when staff present there was no evidence of it . Young people agreed to leave the area.
	The first session of the week was a very positive one and the team engaged with a total of 33 young people on the night and which when broke down consisted of 27 males and 6 females. Our first engagement took place at the leisure centre at 5pm where we initially made contact with 8 young males aged 14- 17 hanging out at a local shop. On approaching these it was realised that some of the young males where known from previous engagement but had disengaged since the latest lockdown measures where imposed. Through conversation all of these young people openly admitted to also disengaging from school work and to being involved in some of the recent ASB in the area, which they suggested, stemmed from boredom and a lack of things to do. Asked if they had a ball they all replied "no" and all agreed they would like to have one. The team then suggested that we could get a ball and give it to them, which was met with great enthusiasm! On receiving the football all young people went to the pitch directly over the road from shop and started to play. Within ten minutes of this, an additional 4 males and 2 females aged 15-17 joined the group at the pitch. The team took the next 40 minutes as an opportunity to have conversations with as many young people present as possible. The group in general where very open and willing to talk and all agreed that the year past had been difficult especially having no where to go and having nothing to do. There was also a consensus that recent incidents had stemmed from this and was seen as a "bit of craic". After about an hour and before moving on, four young men aged 14-17

Newry city intervention initiative

arrived at the far goal posts and proceeded to spray an aerosol can on them to set a-light. The team held back from initiating contact with these young people but they quickly moved on after a couple of minutes towards the direction of the town centre where they had originally come from. it should be noted however that whilst not engaging some of the young people known to have been taking part in recent ASB criticised what was taking place, which all staff where quick to recognise and to also then encourage them to refrain from taking part in such activities in the future. There was also an openness about drinking regularly and the use of marijuana amongst the group, but again they mainly put this down to the lack of anything else to do. A number of young people recognised that the recent issues had caused tensions in the area but thought it had been blown out of proportion. A number of those present also showed an interest in getting involved in youth provision when it resumes. The team then proceeded to head towards the white gates shop in the meadow where at 6.30pm they engaged with two females aged 10 and a male aged 13 hanging outside the white gates community centre. During conversation with these young people a discussion took place about return to school and all said they where looking forward to it but did feel they had fallen behind. They also said how they felt bored a lot of the time and talked a bit about bullying which sometimes happens in the area. Staff give advice on how to best deal with this and also suggested that they all should get involved with the local Bosco youth club when things open up which they thought sounded like a good idea. From here, the team moved towards the Drumgullion area where at 7pm another 5 young men aged 14-16 where engaged with whilst playing football. One of these had previously been engaging with youth provision but had disengaged since the latest lock down measures where imposed. All young men had previously hung about the leisure centre but recent ASB in the area had led to them either not being allowed or not wanting to visit there at the present time. These young men also suggested they where trying to keep up with their school work but still found it hard to do from home and said they spent most of the time kicking ball in the kickabout area, although they felt it did need lights for the darker evenings. Again they all showed interest in getting involved in youth provision when it returns. Our last two engagements took place in the playpark area of Derrybeg. First we Stopped to talk to 7 younger children aged 10-13 who where running around the area. These where all very hyper and displaying boystrich behaviour throughout with little enthusiasm for conversation , although it was noted that some of the language and phrases used in references to drug use was above what you would find normally in this age group and was challenged a couple of times by staff present. The team then engaged with four males and two females aged 15-18 who where siting on a bench in the area. All young people again complained about the boredom and showed excitement around news restrictions are soon being eased. This group were also open about the use of alcohol and marijuana but said they were not regular users. This group also showed a reluctance to head towards the leisure centre due to the recent issues and the reputation they felt young people now had in the area , with one suggesting "they are blamed on everything even when it isn't them". again these young people showed interest in becoming involved in youth provision when it resumes.

Newry city intervention initiative

The second session of this initiative was quieter than the first and in total a total 15 young people where engaged with throughout. During the first hour there was no interaction as the streets were very quiet. Our first interaction came about 5:40pm in the Derrybeg area , were the team engaged with ten young males aged 13-16 who had gathered in the playpark All young people where in good spirits and engaged easily with some recognising the staff from previous outings. Young people again complained about boredom and the lack of anything to do and linked this to some of the ASB that had taken place in recent weeks. Staff encouraged those present from taking part in ASB and reminded them that restrictions where soon to ease and it would be hoped that youth provision can resume as normal in the near future . A number of those present showed real interest in taking part when the time came with staff promoting not only their service but a number of voluntary organisations also that they might wish to look into. Moving on around 6:35 pm the staff headed back toward the leisure centre through sandy hill and noticed the fire brigade putting out a fire in the Meadow area. Just after this, an interaction took place when three youths aged 14-15 who where running past and stopped when recognising staff. Here, the staff asked about the fire and advised those present not to be taking part in such activities explaining the burden on the tax payer, risk to others in the area and implications for those involved if caught. Staff also took this opportunity to highlight the recent issues young people had been blamed on and continued to advise those present from getting caught up in such activities. These young people although quite giddy did seem to take on board the message being relayed and agreed at times with what staff where saying The last engagement took place around 7:35pm in the same area after the team had done another lap and were returning to their vehicles . Here 2 males aged 16-17 who were walking past staff and with one recognising them a short conversation took place . The young people had said that they were on the way to get alcohol and staff advised that it was maybe better to just go home rather than to do that with both disagreeing . Staff pleaded that if they where going to continue with their plan to they stay safe and not to be over doing it explaining the risks to themselves in the now and their long term future if binge drinking takes place from a young age whilst highlighting also that underage drinking was an illegal activity. the young people somewhat listened and chatted for about twenty minutes before they continued on their way towards the city centre.

NLYC Detached March 21

NLYC Detached March 21

Limited intervention tonight , the only intervention had was with 2 girls who we introduced ourselves to and told them the organisation we were from.

North Belfast

Engaged in conversations in Lidt car park with young people about safety, as this is currently a area of tension. Engaged with young people outside of the waste ground at Adams Street, again talked about safety, as young people had a fire lit and they were climbing over the fence to enter this waste ground. Engaged with young people in Alliance Ave, no risk taking behaviour, spoke about safety.

We engaged with young people on the limestone road interface, following an incident that a young boy was assaulted in the area the tensions among the group was high. We managed to talk them down with the help of

north belfast detached 11 march	the psni who had stopped because of the large group. The PSNI were very helpful in assuring the group that the incident was being dealt with in the proper way
north belfast detached 17 march	North Queen Street - Positive engagement with young people from Tigers Bay area, spent some time with 2 groups of young people, 1 from younger age group 11-13, the other with older teenagers. conversation around the Adam St bonfire and it seems the young people are happy that we giving them a voice in the process and there is a good level of trust between young people and youth workers. Waterworks - large crowds in the waterworks park, young people aged 14-18 mostly, around 200 of them at its peak. mostly congregated in the same area of the park, drinking involved, young people blocking the path for park users and some litter. In partnership with staff from holy family the NBAP team engaged with young people, ensuring safety, advising them to not throw litter in the water or bushes, staff provided some bags for litter, checked with the small groups scattered in the immediate area and generally were managing the situation as best they could with the focus of safe guarding. discussions with some of the members of the youth centres and area project about up and coming projects. Staff assisted some young people locate lost items, advised some young people about there alcohol intake, assisted in clearing the path for passers by, moved some of the young people away from the path into the bushes area. It was a challenging situation but it would have been alot worse if youth staff had not have been there. It is my opinion the situation was far from ideal but it was the preferred option to having the young people spread far and wide and roaming the streets. The challenges of the situation were that a large crowd had been moved from Marrowbone park and they ended up at waterworks, this meant alot of the young people there were unfamiliar to the staff, were as, if they had of remained at the marrowbone site the local workers there could of engaged better and with a smaller number and hence a reduced number at waterworks also. The police and council intervned around 7pm and moved the young people of the park.
north queen street	Quite night spoke to a few young people disused how they were coping with lockdown and home schooling and what if anything we could to supported them give them information on some zoom group that were coming up. small fire on the limestone road at the steps called fire service
oscy streetwork	Street shift covered all estates in Skeoge at start of the shift. Areas of Knockena and Glenabbey were very quiet with no youths around. Clonelagh had a group of x6 early teens and we engaged in conversation with them (all males). General issues, bored, asking about drop in and other programmes and missing school. Fernabbey estate we also engaged with a group of 9-11 year olds (x6 - 3 male and 3 female). Conversational engagement again. No issues or concerns. Galliagh Park, Moss Park, Glengalliagh, Carnhill and Leafair were then visited and all areas had no presence of young people tonight. Weather was quite damp with heaby showers and cold which would have contributed to this.
oscy streetwork	tonight was a very wet and cold night on street meaning that there wasn't very many out and about. We had some short conversations with young people who were moving on as they didn't wanna stay in the cold or wanted to be soaked. We managed to cover plenty of areas tonight but did not mange to see many out and about. We put this down to the weather.
oscy streetwork	tonight was very wet and windy and there was no young people on street
oscy streetwork	Tonight we started the shift by seeing a small crowd gather near the co-op so we went over and engaged and had a brief chat. After this we then moved on then later that evening we had a phone call to say that there was a fire at moss park roundabout and when we got up the fire was out and we had a chat with the young people who were around at this time and got them to move away from the area.
Outer North SBYW - Week Beginning 22nd March 2021	Quiet night tonight possibly due to the rain and young people returning to school. Great to have the Our streets team (Cara, Paul and Conor) tonight supporting staff. Some young people were surprised to see them working in the area and had relationships with them which benefitted the discussions and interactions had. Small group of YP possibly drinking at the tunnel but they all seemed to be safe and interacted positively with staff. Report of young people throwing stones at the community centre, staff approached area and spoke with yp n the area, they informed us it wasn't them and we discussed them making sure they aren't involved in this type of behaviour as it is their centre. Giving the young people a sense of ownership to the centre seemed to work well and we hope this will stop any negative behaviours happening again. Great relationships strengthened and made tonight with young people and youth work staff from our streets tonight.
Outer North SBYW - Week Beginning 22nd March 2021	Really quiet night tonight assuming this is due to the bad weather. A residents in Clon Elagh stopped us to inform us of a group of YP that had been knocking on his door over the last few nights and this has been scaring his children that have underlying health conditions. We walked around the area but there was no YP in the area and we assured him we would pass on the information and if we make contact we will chat with the young people.
Outer North SBYW - Week 4	Extremely quiet night no engagements had, this could be due to bad weather conditions. There was a small fire inside of Carnhill tunnel with a small group of young people inside it for shelter. We did not engage with these young people as we assist the situation and decided as a team it was too dark and smoky around the tunnel to try and engage in conversation.
Outer North SBYW - Week 4	Positive engagements with all young people tonight. Small numbers of young people on street with no issues or concerns to report.
Outer North SBYW - Week 4	Quite night tonight we assume do to the bad weather. Very small amount of engagements but all positive. No issues tonight
Outer North SBYW - Week 4	The night was really quiet which is unusual for the area but the weather is cold. The collaboration with our Streets was good getting a chance to work with others and keeping the street work going. Staff in the area enjoyed getting to venture out to skeoge, fernabbey etc to reach further young people.
Outer North SBYW - Week	Positive engagements had with all young people tonight, all willing to participate and eager to chat with staff. A

Beginning 12 April	lot of young people asking if they could join the youth centre. Staff informed YP of current restrictions and time tables at SYC and that they would keep them informed of any changes in restrictions.
Outer North SBYW - Week Beginning 12 April	Quiet night, there was a lot of young people around but all just hanging out with friends not causing any issues. No issues in hotspot areas.
Outer North SBYW - Week Beginning 19th April	It was a quiet night on street very little young people about. No issues that needed intervention. All local hotspots were visited to ensure this.
Outer North SBYW - Week Beginning 19th April	Quiet night around the area with no issues. Possitive engagement wifh all young people spoken to Young people pleased to see staff and update them on centre based activities. Liaised with on the streets team and discussed potential hot spots witin the area.
Outer North SBYW Week Beginning 29th March	Positive engagements had tonight with all young people. Still a fairly quiet night even though the weather was great and YP are off for summer holidays. Good engagement with a new group of young people in Glenabbey tonight they were glad to see youth staff and engaged in conversations. Spoke to young people in Shantallow about the importance of looking after the community centre and if they hear of anyone throwing stones to make sure to tell them to stop and let us know.

Street Based Invention Issues Arising

SelectYourOriginalProposal_Label	StreetBasedResponse_IssuesArisingAsAResultOfIntervention
	Many young people threatened local community activists and may result in lash back from paramilitary groups. Minor issues with the group that threw bottles at the police, this had potential to become worse. However the situation deescalated when the PSNI left the area.
	n/a
	No issues arising, intervention was well received and positive engagements were made.
	None
	stand street teams back up for weekend following these incidents follow up with local community safety team to address issues and to ensure young people are supported to address these risk taking behaviours and have the space to reflect on potential consequences to getting involved in this
	Young people requested a place to play football, follow up with council and local churches meant we were able to grant this on Friday 09 April.
Addressing needs of vulnerable young people through street based response.	A lot of young people, especially girls not from Ardoyne, issues around getting home safely after partaking in alcohol. Large crowd of young people in the Bone Hills, the gate is been locked at night and no access for youth workers.
Addressing needs of vulnerable young people through street based response.	Follow up on the contacts who are mentally vulnerable. Try to make contact with the parents.n
Addressing needs of vulnerable young people through street based response.	Issues are to be addressed through directing staff from the three EA providers to participate in the targeted response to the vulnerable young people who are identified and known to stat services . to continue to nurture a more collaborative approach with community leaders to best respond as opposed to antagonise the behaviours of the young people and lead to more criminal behaviours .
Addressing needs of vulnerable young people through street based response.	Issues which will be reviewed and used as guiding rationale for following weeks proposal will be the alleged attack a its potential to not be one off and connected to previous warnings issued to young people from adults not welcoming their presence in community . staff also to ensure that they have with the QR codes to ensure young people have access to information regarding well being and numbers to contact the youth work teams should they be in need of support outside of detached times of operation on streets and build upon a sense of safety and belonging within own community .
Addressing needs of vulnerable young people through street based response.	NA
Addressing needs of vulnerable young people through street based response.	Need to follow up with several of these young people.
Addressing needs of vulnerable young people through street based response.	Need to follow up with some of the groups we met and try to engage in the next few weeks.
Addressing needs of vulnerable young people through street based response.	No issues arising
Addressing needs of vulnerable young people through street based response.	No issues arising as a result of interventions with young people. Developing positive rapport and reallionships with young people over the new two weeks to engage in further group work within the centre.
Addressing needs of vulnerable young people through street based response.	No issues arising as a result of the interventions from Divis Youth Project.
Addressing needs of vulnerable young people through street based response.	No issues arising during the night session.
Addressing needs of vulnerable young people through street based response.	No issues arising from this intervention other than keep a look out for these young people when next out.
Addressing needs of vulnerable young people through street based response.	No issues arising from tonights intervention.
Addressing needs of vulnerable young people through street based response.	No issues arising that are of a concern, staff who are new to street based practice will have second part of their CPD in coming week round scenario based interventions ensuring appropriate terminology and conversation engagements building upon their induction to human rights based street youth work interventions , ensuring a competent and proactive service with transferable skills . Agreed follow ups with both retailers,PSNI, Community providers and most importantly the vulnerable young people.
Addressing needs of vulnerable young people through street based response.	No issues arising.

based response.	
Addressing needs of vulnerable young people through street based response.	No issues from Young people as they came in from tension and social unrest in local area. Internet platforms and tensions from previous nights highlighted on social media and television but these were not operating due to passing of monarchy
Addressing needs of vulnerable young people through street based response.	No issues raise during tonights intervention.
Addressing needs of vulnerable young people through street based response.	No issues raised during tonight intervention.
Addressing needs of vulnerable young people through street based response.	No issues resulted from tonight intervention.
Addressing needs of vulnerable young people through street based response.	no issues with result of intervention.
Addressing needs of vulnerable young people through street based response.	No issues within the interventions made tonight.
Addressing needs of vulnerable young people through street based response.	No major issues but important to check in with these vulnerable young people as often as possible in current COVID restrictions.
Addressing needs of vulnerable young people through street based response.	No new issues area arising from tonight.
Addressing needs of vulnerable young people through street based response.	Several of the young people advised staff that they are really stressed about going back to school. Staff advised the young people that the club is currently working with local health coach who facilitates weekly mindfulness sessions on zoom. Staff agreed to forward on the details of the zoom sessions to the young people, who advised they "might be on." These young people have maintained throughout lockdown that they did not like zoom and couldn't be bothered with it after school. Staff will plan programmes for the next Detached sessions (if approved) around emotional wellbeing and positive mental health, Staff asked the young people who they engaged with if they would be willing to participate in games/ activities. The majority response was very positive. One young person stated she felt protected knowing there was youth club staff out and about and felt it would keep "dodgy characters" away. Staff asked for further clarification on this; she was told that the young people were aware there was an "awful lot of drugs on the go." When asked how this made her and her friends feel, responses included; uncomfortable, wee bit angry.
Addressing needs of vulnerable young people through street based response.	Staff will be engaging with new young people and going into new areas. They will be dealing with vulnerable young people on the verge of criminality and other barriers and challenges in their lives, and who also defy Covid guidelines.
Addressing needs of vulnerable young people through street based response.	Still promoting positive choices and behaviour but again very limited as vulnerable young people don't want to engage with staff when issues within the area happen. Again multi-agency approach is needed.
Addressing needs of vulnerable young people through street based response.	The pending key issues will be to keep reinforcing that EA have a bespoke brief to target vulnerability of key identified young people and are not out under a generic detached response . Times of operation will be reviewed for the Saturday to ensure a planned an targeted quality intervention takes place . To ensure staff adhere to covid safe practice. Staff to continue to contact PSNI in regards criminality conduct and damage and not to assume a policy role .
Addressing needs of vulnerable young people through street based response.	The Ross Road flats have been an ongoing issue Key detached coordinator has been in constant community with CIT CSO coordinator Lisa Lynn for support in addressing need Lisa is working along side various statutory and community stakeholders in addressing the wider community need and concerns
Addressing needs of vulnerable young people through street based response.	There seems to be a growth in sectarianism in the Waterworks/Westland which may require greater intervention.
Addressing needs of vulnerable young people through street based response.	This cannot be resolved with just youth workers alone. These ongoing issues have increased with the lack of services within the area.
Addressing needs of vulnerable young people through street based response.	Young people consumed too much alcohol staff provided water and support young person and staff waited until family member collected the young person.
Addressing needs of vulnerable young people via a street based response	Concern about the issues in Waterworks and the development of conflict with groups.
Addressing needs of vulnerable young people via a street based response	Concerns about young peoples safety around the red bridge as it is very dark and in ways isolated.
Addressing needs of vulnerable young people via a street based	Possible signs of Young people drinking and alcohol, unhealthy lifestyles, young people highlight impact on social media and rumours on social media which may affect their community. Social media increased tension.

response	Police reported to community representatives of possible social unrest but this was not the case. Police presence with patrols during the evening.
Ardoyne Bespoke Intervention	
Ardoyne Bespoke Intervention	No issues
Ardoyne Bespoke Intervention	The gates being locked in the bone is an issue as staff cannot engage with young people and the gate being locked is forcing young people who are under the influence to climb in and out which is not safe. Also a lack of police presence is an issue as nothing is being done about the anti social behaviour caused by some young people in the area.
Ardoyne Collaborative Approach	Drink Drugs Death riders Large groups
Ardoyne Collaborative Approach	Eggs being thrown
Ardoyne Collaborative Approach	I feel there may be a new hot spot at the new retail park that will need to be re addressed with the young people. There is a lot of young people from flax housing who are refusing to leave and causing concern for the residents.
Ardoyne Collaborative Approach	N/A
Ardoyne Collaborative Approach	No
Ardoyne Collaborative Approach	none
Ardoyne Collaborative Approach	None
Ardoyne Collaborative Approach	referred to services
Ardoyne Collaborative Approach	There are a number of issues rising from these interventions, the continuation of young people claiming into our local parks at night when they are locked provides a health and safety hazard. Also, young people are continuing to gather in large groups, increasing the risk of covid 19. Finally, Hillview retail park is still proving a hotspot for young people from both communities to gather and entice one another into sectarian violence.
Ardoyne Collaborative Approach	Young people got barred from one of the youth services, so they are being referred by ourselves to a different group.
Ardoyne Collaborative Approach	Young people meeting up for arranged fights at the new hill view centre. Objects being thrown but there was no first aid needed but could get worse if no intervention happening. Young people becoming disengaged could be due to not having any youth workers on streets.
Ardoyne Collaborative Approach	Young people on bikes on roads
Ardoyne Collaborative Approach	Young people on mopeds, drugs found and disposed off. Concerned residents getting fed up with the noise of the bikes.
AYC Response Work	
AYC Response Work	Arranged fights a Lidl of the hill view area, this is becoming a regular thing each night. Young people understood the risks of arranged fights and how it could impact there futures.
AYC Response Work	Issue just young people using our parks late at night that can be dangerous.
AYC Response Work	No issues
Ballymena - Dunfane and Wakehurst Detached	
Ballymena - Dunfane and Wakehurst Detached	There presents 2 good opportunities for outreach engagement when the area workers are out again
Ballymena - Harryville and Dunfane	no issues.
Ballymena - Harryville and Dunfane	None.
Bespoke streetwork	A lot of underage drinking. Cannabis usage was the most identifiable drug being consumed by young people. young people lighting fires interface issues boredom
Bespoke streetwork	Interface issues on crumlin road. Large gatherings of young people Educational underacheivment
Bespoke streetwork	N/a
Bespoke streetwork	Some young people gave staff verbal abuse. There is also a danger of young people injuring themselves or others on the moped. Furthermore people in the community are becoming very annoyed and frustrated with the group of young people on the moped due to the noise and gathering of groups.
Bespoke streetwork	Some young people giving staff verbal abuse. Local pe
Bespoke streetwork	Staff were in danger of being hit by objects and had to step away at one stage until things calmed down. Also staff had to give a young person a bandage who had been cut due to an object being thrown. Young people also needed to be reminded by staff about road safety and the risks of the other anti social behaviour that had taken place as they were putting themselves and others in danger.
Bespoke streetwork	The gate being locked in the bone is an issue because staff can not engage with young people and it is forcing young people under the influence of drugs and alcohol to climb over the gate to get out which is not safe. Furthermore there is no lighting in the bone which is not safe for both young people staff.
Bespoke streetwork	There were no issues arising due to poor weather conditions and a small number of young people on the streets.
Bespoke streetwork	There were no issues arising from tonight as it was very quiet due to bad weather. Staff just engaged with the young people they met and encouraged them to go home due to the poor weather and the on going pandemic.
Bespoke streetwork	Young people gave staff verbal abuse when staff told young people to put out the fire. Also young people were saying that the reason they take part in the anti social behaviour is due to youth clubs not being open.
Bespoke streetwork	Young people not willing to move from hot spots and staff cannot engage with large crowds due to the on going pandemic.

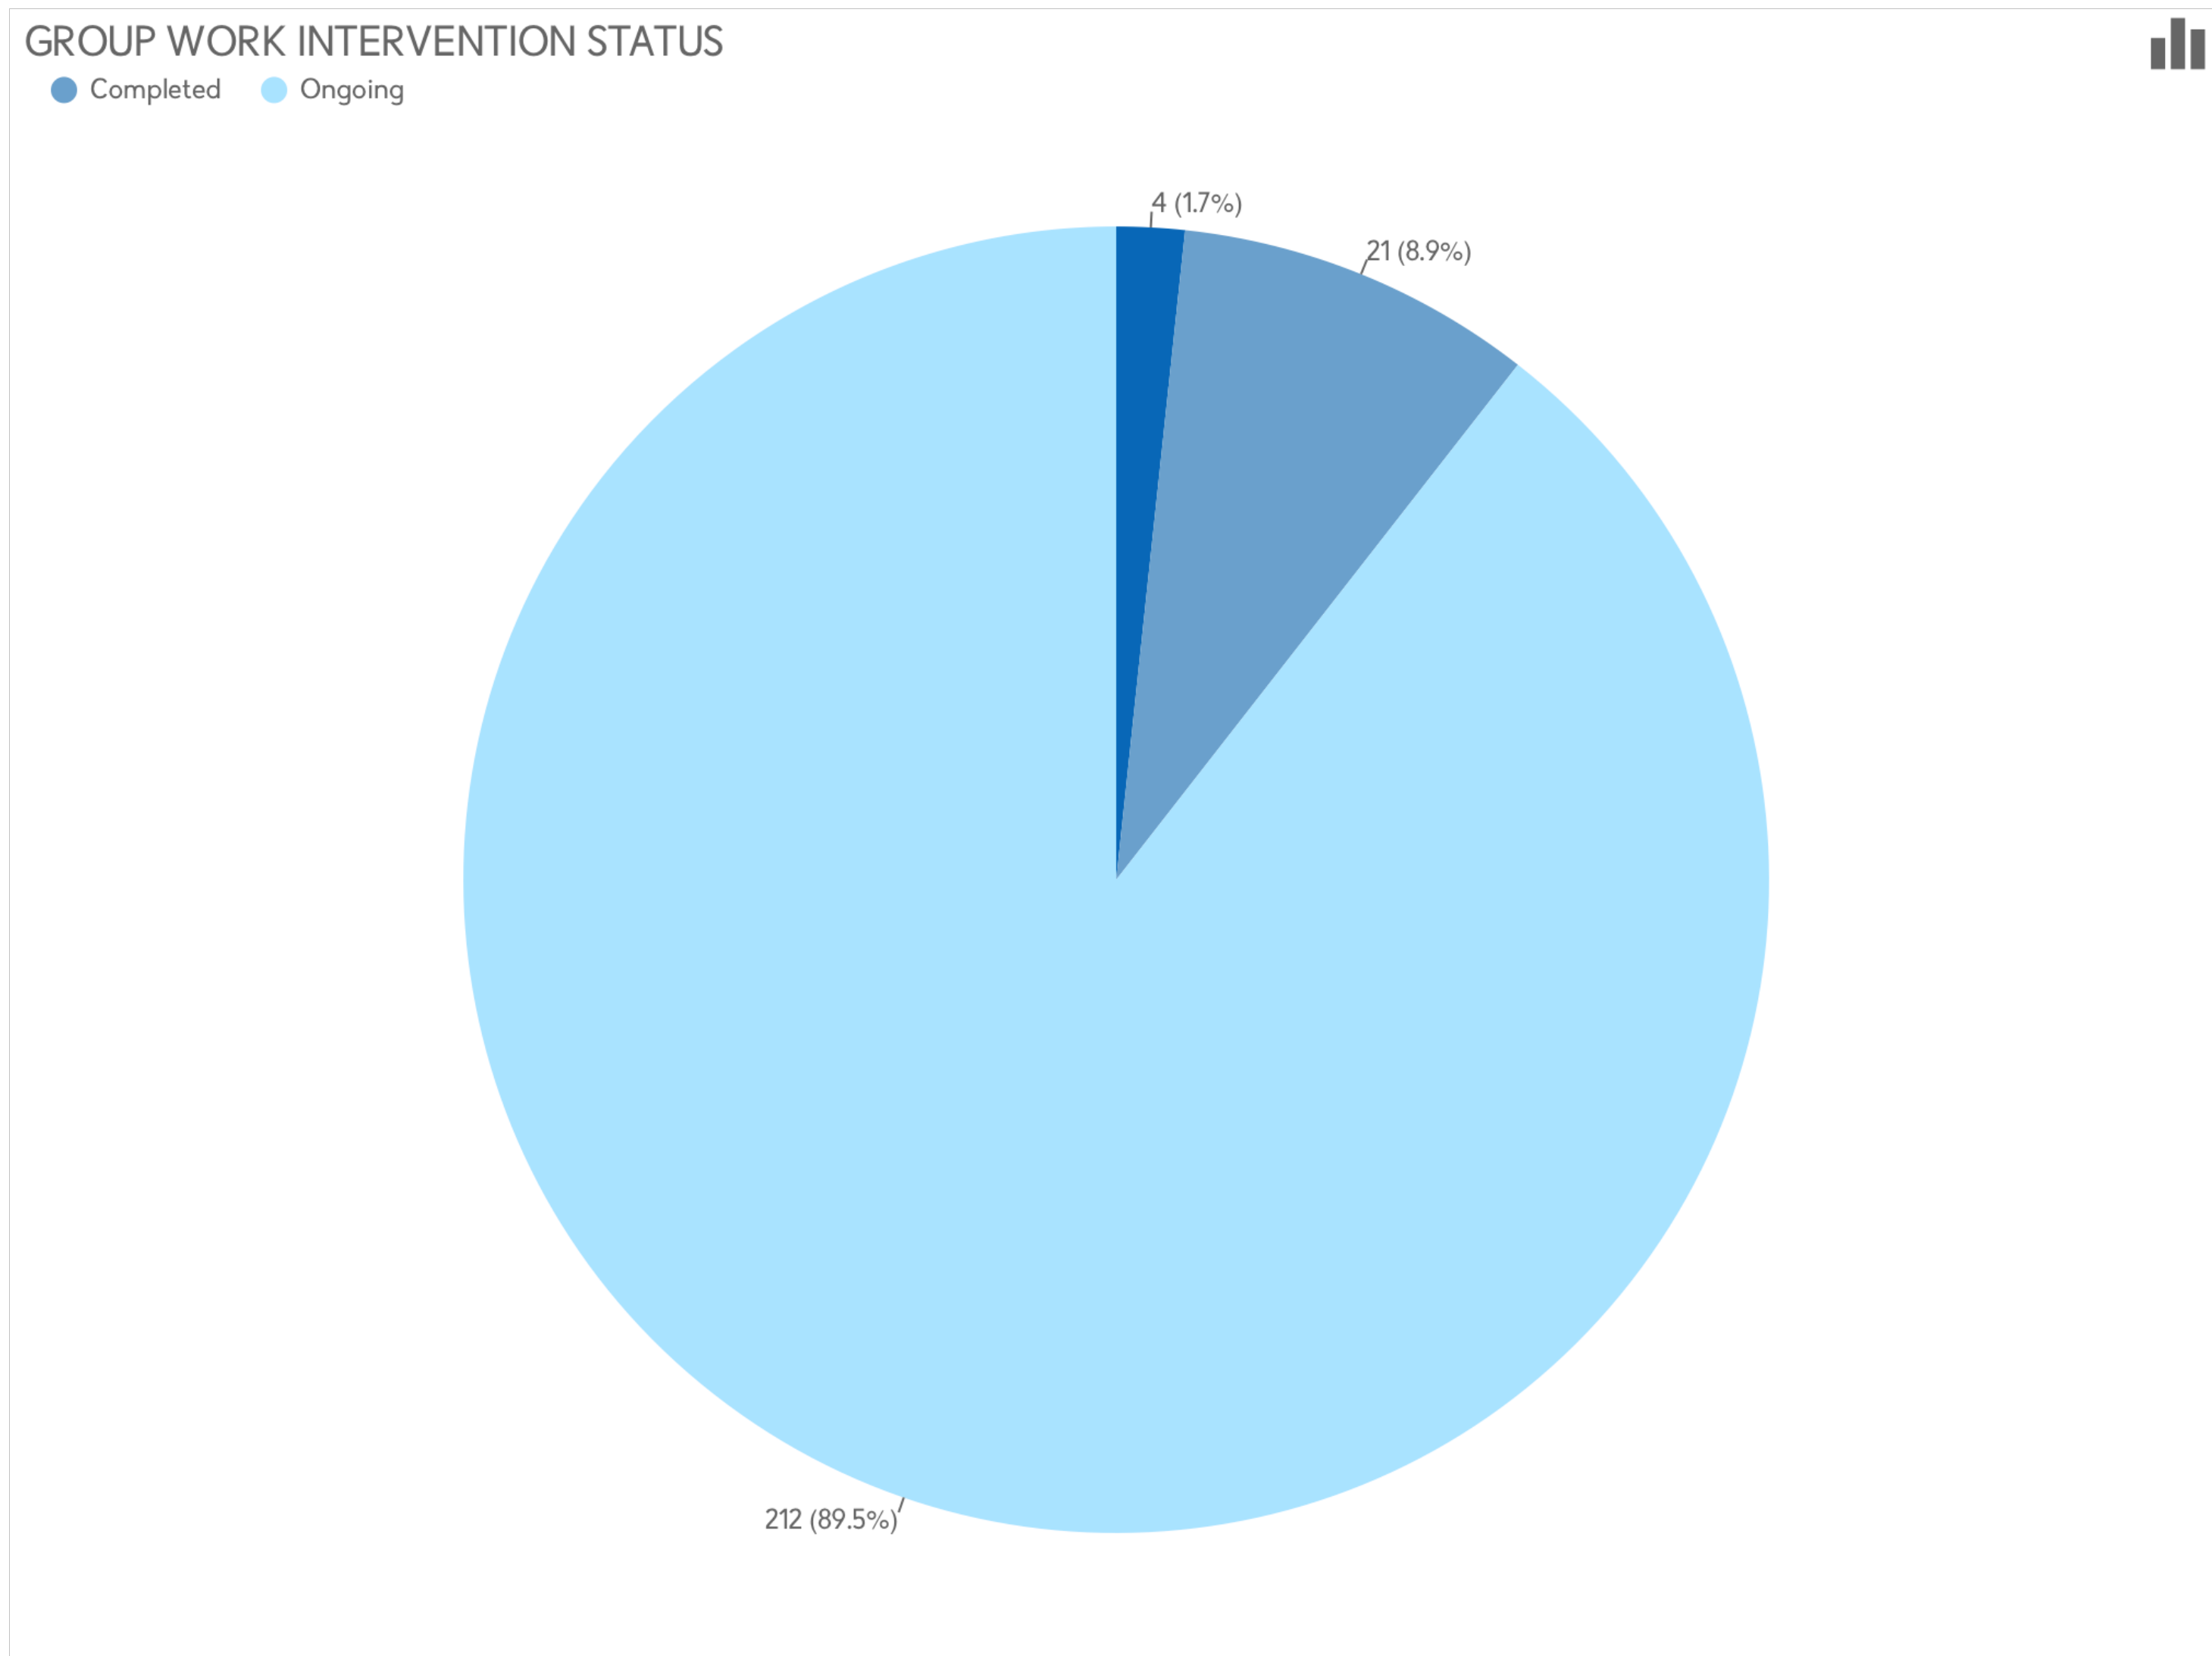

Bomb Scare	Staff feel that there may be issues arising in an escalation in paramilitary activity in the community. Staff are meeting with community partner organisations in a community and youth response in keeping our young people safe.
Bomb Scare	Staff will continue with their plan to meet with community partner organisations in developing a community and youth response in keeping our young people safe.
CMYC Safeguarding on the street	Good conversations and a lot of the behaviours are due to frustrations and getting mixed messages and what they are seeing on social media.
CMYC Safeguarding on the street	It was a lot quieter than usual this weekend and the big fear is that Clonard is going to be the hotspot for young people at some point as the days get longer and weather more pleasant, we are definitely seeing more young people congregating in the area so it is imperative that we provide guidance and support over the coming weeks and months.
CMYC Safeguarding on the street	n/a
CMYC Safeguarding on the street	There will be some young people facing arrests for involvement in the riots.
CMYC Safeguarding on the street	There will undoubtedly be a number of young people having to face to police calling to their door or arrests as a result of their involvement in the riot.
Colin Detached targeted street-based response to vulnerable young	
Colin Detached targeted street-based response to vulnerable young	11/03/21: GMCD to submit additional cognito detailing alleged ASB and PSNI intervention
Colin Detached targeted street-based response to vulnerable young	A number of YP in vulnerable conditions requiring assistance home due to possible alcohol consumption. Further recommended actions will be appropriately shared with relevant EA youth provider with support from SYW.
Colin Detached targeted street-based response to vulnerable young	GMCD to submit additional cognito detailing family intervention with PSNI with positive outcomes.
Colin Detached Targeted Covid Response	After the intervention of the toy fight, some of the young people told us not to get involved and mind our own business. They didn't show any aggression throughout the incident. With the 5 young people who we got away from the fire, wanted to discuss when the club would open again as they miss it and wanted to know if it would open when the schools start back.
Collaborative Outreach Provision SMYC	No issues.
Collaborative Outreach Provision SMYC	There was reports of young people gathering and taking rubbish out of a skip and throwing it on the road. The street team responded and went to the street and engaged in conversations with the young people around the dangers of this. Young people then moved away from the area.
Collaborative response SMYC	No
Collaborative response SMYC	No issues
Collaborative response SMYC	Throughout our outreach provision tonight we overseen young people engaging in risk taking behaviour in the glen fields area while travelling to work. We engaged with the young people regarding the possible outcomes of their behaviour could have. Whilst in the area we developed contact with one individual that was intoxicated, we planned to return to ensure the young persons safety. On the 2nd visit to the area the young person in question had already returned home.
Continuing Raising Awareness of Covid Restrictions	a large group not socially distanced, no masks, lack of covid awareness
Continuing Raising Awareness of Covid Restrictions	No issues from tonights interventions.
Creggan Outreach	Police engagement with young people is an issue as they got out of the jeeps. Young people reporting being bored and really fed up with not much to do. Glad to hear the club will be opening again with reduced numbers. throughout the night when had been contacted by a resident regarding young people targeting his home, young people were not in the area at the time, although we did make contact with these young people, discussed the impacts that their behaviour was having and the concerns of the resident in question. this engagement had more meaningful conversations regarding possible developmental work with the group, will follow up with young people.
Creggan Outreach	We had been contacted by a resident tonight regarding her house being targeting by young people. We engaged with this resident and advised her that we will be in the area during our nightly outreach provision.
CYC SBYW 24/03/21	No Issues tonight apart from YP not following Covid Guidelines.
CYC SBYW 30/3/21	No Issues.
CYC SBYW 30/3/21	PSNI & Fire Brigade called to a fire which YP were playing around within a wooded area in the Country Park - we were able to spot the fire & hear the YP from a significant distance so did not go close enough to speak with the Young people who were involved.
CYC SBYW w/b 15/03/21	Some staff are a bit shaken by the way the Adults were speaking to the YP & this made it very difficult to leave them whilst worrying if they would be safe & who would protect them; however the team feel that on the basis that this was a first for the team, we handled the situation well with each team member feeling supported & through an open & honest de-brief the team have recognised the learning from their experience. The 2 YP looking after the Bonfire wood are 11/12 Years Old & they did state that they are being paid to stay with the wood & that other YP are coming to guard it overnight. Deborah Cross was contacted for support with

CYC SBYW w/b 15/03/21	decision to report on formally or not, due to the potential for political fallout from a report being made.- Michelle Reid to follow up with a convetrstation as soon as Deborah is available. The size of group hanging around the shop next to the club is an issue as ther are very vulnerable people living in the surrounding care homes & Supported living.
Detached provison within the Short Strand interface areas	No issues of concern to report
Detached provison within the Short Strand interface areas	No issues to report
Detached provison within the Short Strand interface areas	No issues to report on
Detached provison within the Short Strand interface areas	Tonight The weather was again really cold with heavy outburst of rain throughout the evening. We started off the night by contacting both the Police and staff from the EBAYP and kept in touch throughout the evening, We had no issues to report and there was very few young people out.
Divis Street Work	
Divis Street Work	Had a critical situation to deal with over social media that resulted in a press release.
Divis Street Work	Issues again this evening with young people socialising in their space at Ross Road provocative gestures and inapropriate questions being asked in relational to adults in their lives
Divis Street Work	issues arising were young people getting chased from the park and possibly coming into to conflict with community reps, young people throwing eggs at residents homes and cars in the community and on the falls road.
Divis Street Work	Key staff CIT CSO Lower Falls community safety NIHE have been working closely and in partnership with ongoing issues and health and safety risks in and around the Ross Road flats
Divis Street Work	Key staff to tie in with Lisa Lynn/Tina Black in relation to Dumping at the back fields
Divis Street Work	Need for diversionary and developmental activities for this group.
Divis Street Work	No
Divis Street Work	No staff felt that tonight's session achieved meaningful effective outcomes
Divis Street Work	Staff felt that both sessions achieved positive meaningful outcomes Throughout the day staff were in constant contact with Holy Trinity Youth Centre Working in Partnership with CIT CSO Lisa and Divis youth project Geraldine received a phone call from NPT asking if the staff where going to be stopping young people at the gates and removing alcohol - Key staff explained the role and responsibilities of a youth worker once again - (Key staff negotiated with PSNI to allow a youth work response - this was agreed for a period of 30 minutes) Late into the evening staff had a negative responses again with PSNI in relation to name dropping and following staff to challenge them
Divis Street Work	Staff felt that tonight's session achieved positive meaningful and effective outcomes in keeping young people safe gestures and attitudes of TSG units are provoking and counter productive
Divis Street Work	Staff requested support from CIT CSO Coordinator Lisa Lynn in relation to BCC not closing gates In conversations with young people and some families they felt that the park was open and fully accessible to the community Key staff co Ordinator in communication with Senior worker in Charge Holy Trinity Youth Centre in relational to a at risk young person
Divis Street Work	There has been a positive engagement of all youth providers across West and the communication and coordination has been very helpful in securing support in critical situations.
Downpatick Street Response	
Downpatick Street Response	na
Downpatrick Street Work 2	
DYP: Street Based Project	No interventions required on the night
East1	No issues arose
East1	No issues to report
East1	No issues to report.
Emergency Detached Response - LC - 10/4/21	None
Emergency detached response AND 10.04.21	None
Emergency Response Detached Youth Work LC	No immediate issues arising however follow up with PSNI re tomorrow evening.
Feb 26/27 response	Discussions took place between staff on duty and the PSNI on both evenings around the areas of focus. Senior Youth Worker was in contact with PSNI also on Saturday evening highlighting that staff had been removed from the City Cemetery site. This had already been flagged up with police who made clear their intention to deploy TSG to the graveyard when they next became available. My understanding is that this was undertaken, based on further discussion with the Blackmountain Team Inspector. Given that this weekend was the first this year of fairly clement weather this may be an ongoing concern going forward. The particular group in cemetery on Saturday night were mostly unknown to staff and would in normal times socialise in bars/nightclubs it could be assumed. It may well be that this group is not suitable for Youth Service intervention.
GDI SBYW	given another half hour without police presence we believe we could have de-escalated the situation and dispersed the group however the heavy psni presence made this impossible
GDI SBYW	main issue is we arent able to offer much to YP in terms of coming into the club or other activities to deter gathering

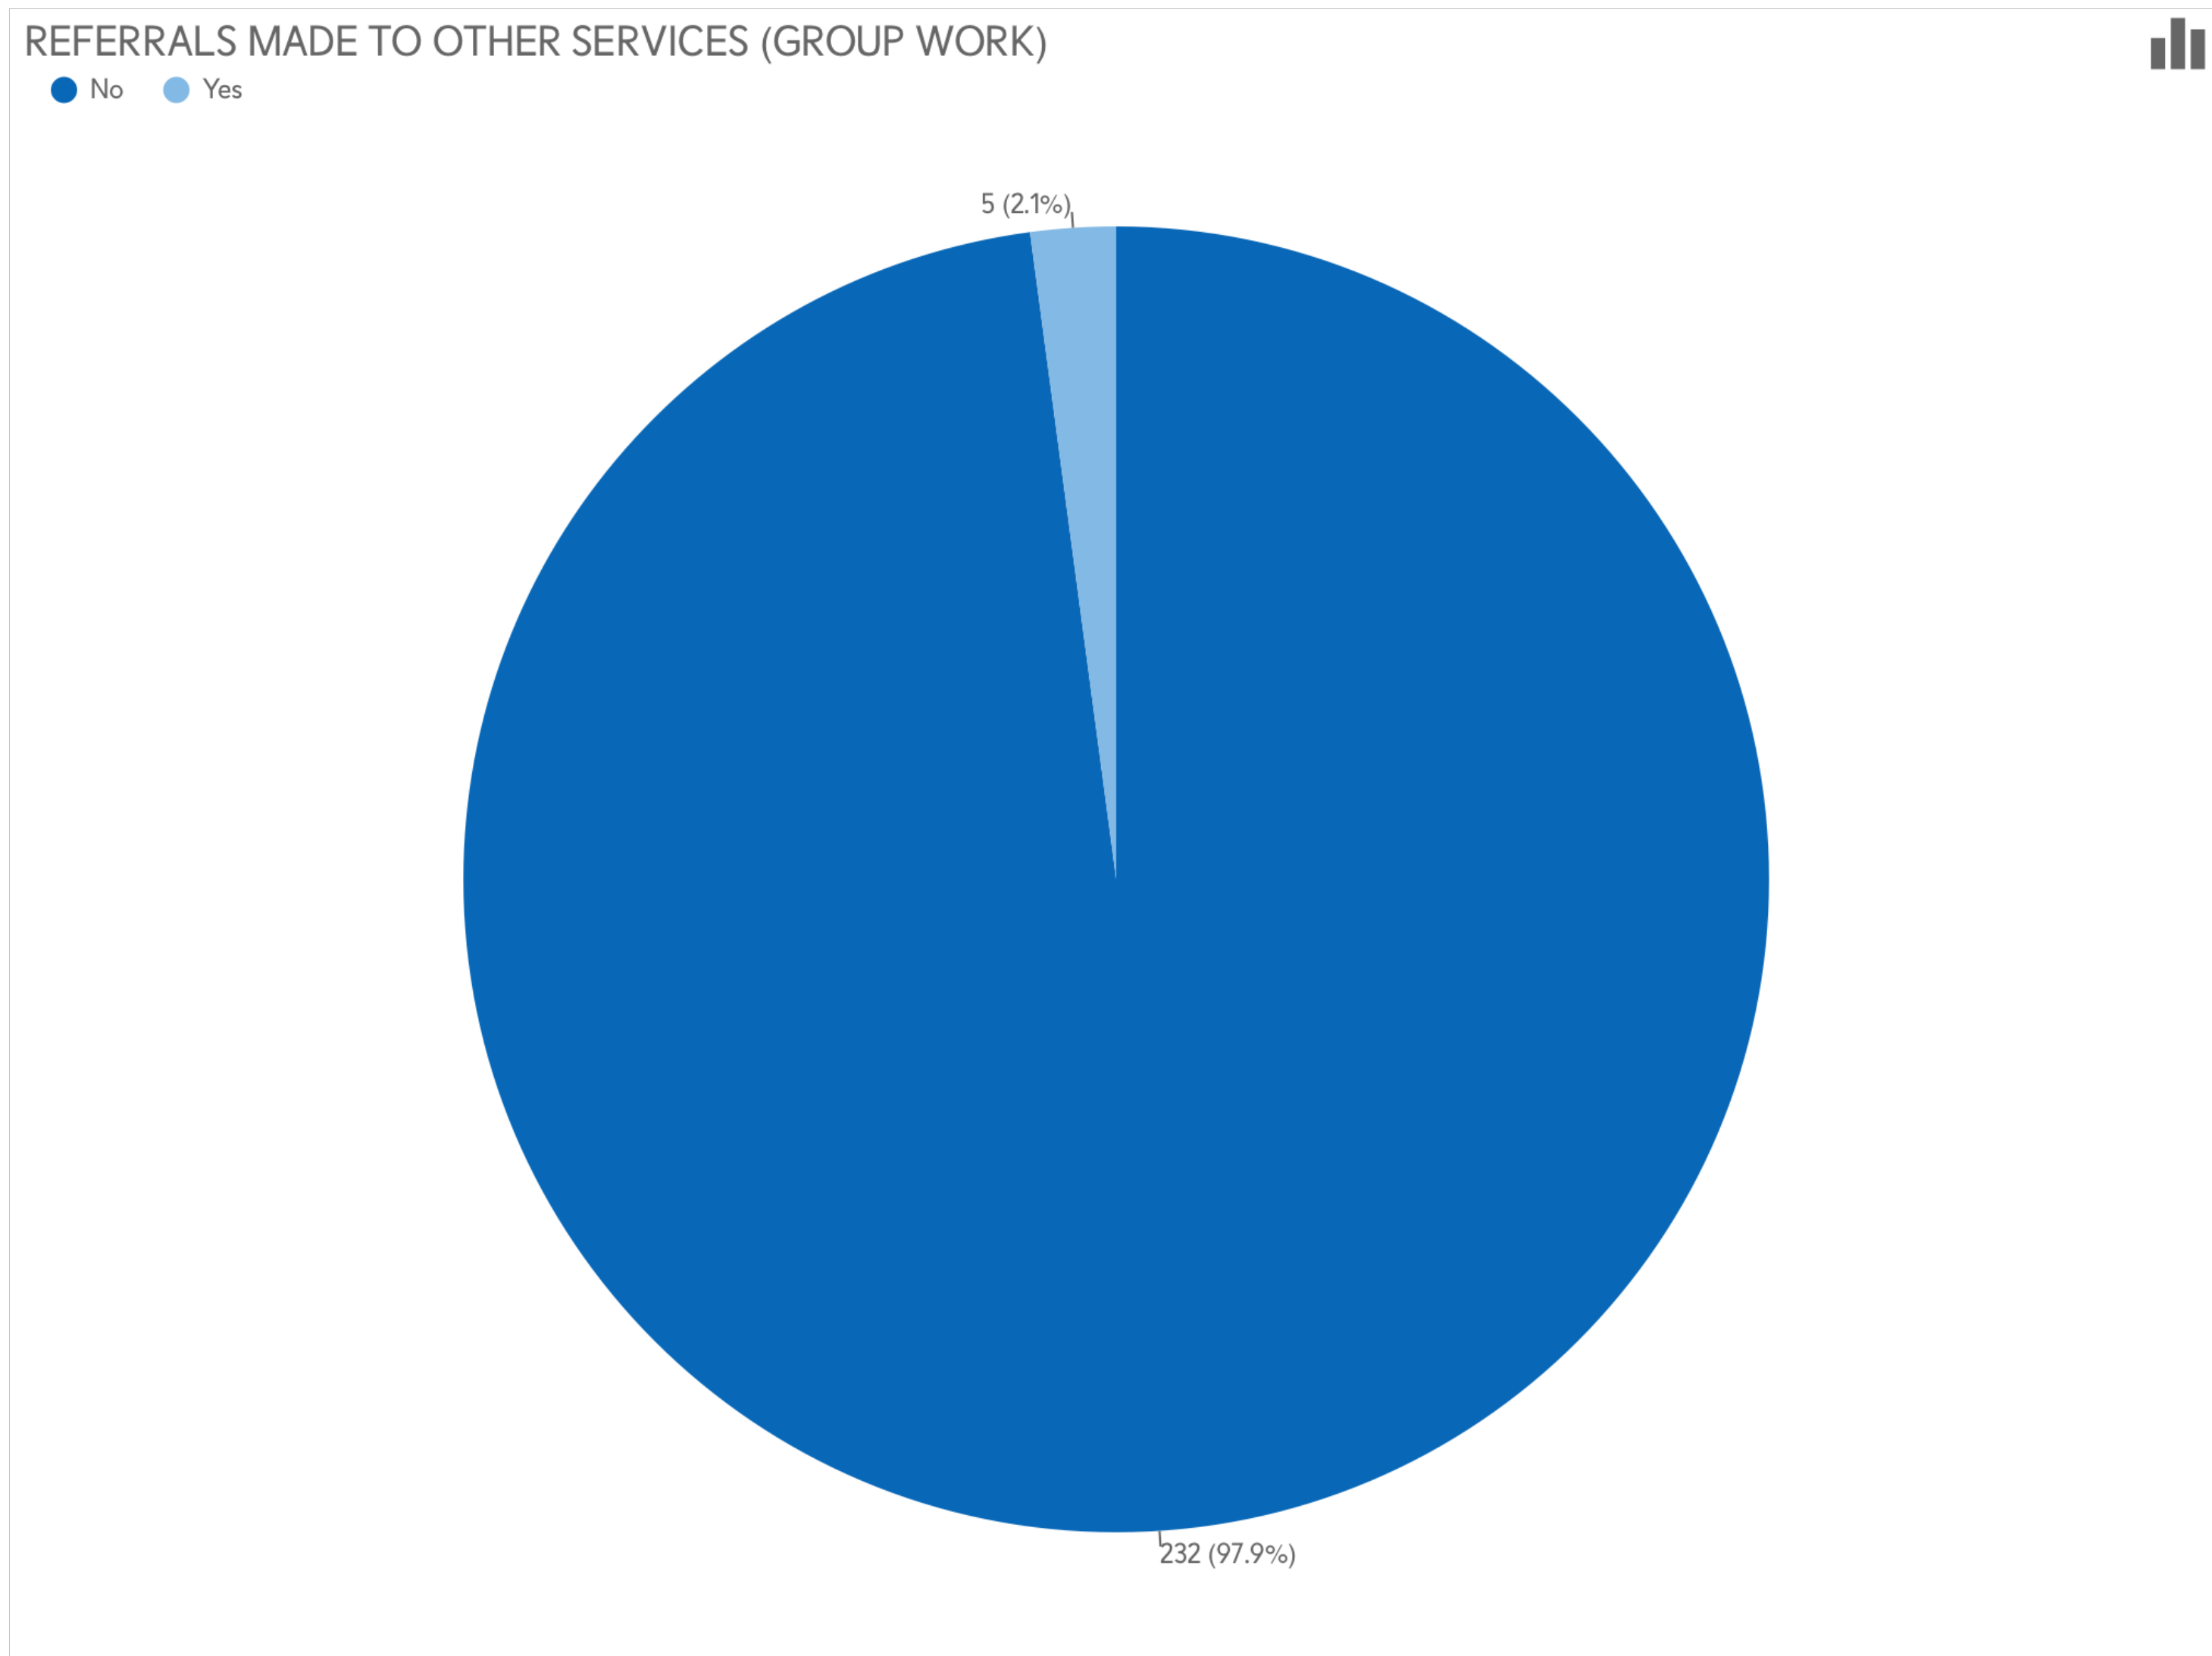

GDI SBYW	minimal impact on the community and no further services (PSNI or safety wardens) needed as a result of our intervention. the area has now mostly cleared 10.15pm and there should be minimal risk of further complaints tonight
GDI SBYW	no issues
GDI SBYW	no issues as a result
GDI SBYW	no issues our intervention tonight proved a great success and dispersed the crowd effectively and without issue
Glen Parent Bespoke Outreach	The Area throughout Greater Lenadoon as been quiet for the past week, With the Youth Staff effectively targeting over 60+ young people into the online activities being offered.
Group Work START 1	Was positive young people engaged well with staff.
Lurgan Town Bespoke Intervention 18.03.21	No direct issues arising from intervention, positive relationship building took place and will be worked upon in future.
Lurgan Town Bespoke Intervention 18.03.21	No direct issues arising from intervention- contact will be made with other agencies to monitor anti-social behaviour and young peoples vulnerability in the area.
Mar 12/13th response	Need for robust plan around St. Patrick's Day.
Mar 5th/6th response	This is the second increase in numbers in successive weekends and it is clear that better weather is drawing young people to these sites. Planned extensive drinking amongst young people is being highlighted for St. Patrick's Day and will require planning of any potential interventions.
March 19/20 Response	Highly frustrating and counter-productive night with many young people verbalising the tangible and substantial differences in how they perceive their areas being policed in comparison to PUL areas. This led to multiple accusations around our role in working in partnership with police. PSNI also promoted their work on Saturday evening in partnership with BCC staff on their social media channels. Senior Youth Worker challenged this through emails asking directly why the partnership with local youth providers wasn't mentioned nor referenced. This will be followed up formally.
N.Belfast 10/3/21	
N.Belfast Sat 20th March	
nbap detached	Adam ST possibility of becoming a hot spot over the next few weeks
NBAP detached	No major issues other than the obvious danger that the older teenagers were putting themselves in due to being at the front line of a riot, which was too dangerous for staff to intervene or engage. We did observe families standing at the scene with young children, they were there to watch but there was still an element of danger present for those very young children.
NBAP detached	the safety of the site that the young people were accessing is a major concern, i have reported the issue to some contacts that i have who are going to advise the owners of the grounds about the ongoing situation.
New Lodge Detached	None
Newington	The interface has been highlighted on two previous requests for detached due to ongoing issues which seem to garner little interest. Intervention tonight allowed staff to intervene and get young people to move on. Some parents contacted and over the next day or so we will endeavour to contact more parents. From conversation these young people normally gather in another part of the area- Salisbury Avenue etc and Little America's.
Newry city intervention initiative	- there seems to be a high rate of drug and alcohol use amongst those who the team spoke to on the night. - young people openly admitted to being involved in ASB but most put this down to boredom. - young people did say they where planning on a large gathering over St Patricks day where most planned to consume alcohol. - most young people had admitted to struggling with keeping up with school work
Newry city intervention initiative	All young people engaged complained about the boredom and lack of outlets currently available to them. Some ASB was witnessed by the team albeit from afar as they watched a fire being put out by the fire service. A number of young people said that they would be consuming alcohol that evening but that this would take place in a location that is out of sight, no one was willing to say exactly where .
NLYC Detached March 21	
NLYC Detached March 21	None
North Belfast	Issues of young peoples safety in them climbing over fence in Adams street, PSNI are well aware of this issue
north belfast detached 11 march	The incident has created a useful dialogue with the group, however i suspect the tension will remain high in the short term. we have advised local youth services to keep a watchful eye
north belfast detached 17 march	The majority of the young people ended up back on the streets and eventually at marrowbone park again, reports are that there were altercations on the oldpark road with police and fights broke out amongst the young people as a result of being spilled out of waterworks and onto the streets.
north queen street	none
oscy streetwork	N/A
oscy streetwork	No issues arose during shift tonight.
oscy streetwork	none
Outer North SBYW - Week Beginning 22nd March 2021	
Outer North SBYW - Week Beginning 22nd March 2021	Very minimal engagements had tonight due to weather
Outer North SBYW - Week 4	Fire inside of tunnel which would be a hazard for young people and the community looking to access the tunnel.
Outer North SBYW - Week 4	No issues
Outer North SBYW - Week 4	None
Outer North SBYW - Week 4	Positive relationships built between young people and youth work staff
Outer North SBYW - Week	

Beginning 12 April	No issues arising
Outer North SBYW - Week Beginning 12 April	young people queried about opening of the youth centre on weekend nights. also asking when flood lights at MUGA will be allowed on again. Staff will try and get answers for young people and keep them informed
Outer North SBYW - Week Beginning 19th April	All areas visited and tunnel re visited after a phone call about noise from the tunnel. No young people present when we visited
Outer North SBYW - Week Beginning 19th April	No issues tonight. Staff had positive engagements with the small number of young people seen.
Outer North SBYW Week Beginning 29th March Outreach	Positive engagement being built within the Glenabbey area and shows the need for youth staff presence in the future.
Outreach	Young people continuing to have limited access to essential PPE equipment and are struggling accessing and engaging in online school work. Young people are continuing to socialise in their spaces, staff continue to promote and provide a keeping safe and harm reduction methodologies whilst out on detached.
Patrician Youth Centre Outreach/Street Based Work	None
Patrician Youth Outreach/Detached Initiative	No issues to report throughout session.
Patrician Youth Outreach/Detached Initiative	None
Patrician Youth Outreach/Detached Initiative	None encountered during session
Patrician Youth Outreach/Detached Initiative	Young people very bored, asking us when the Centre is going to open up.
Raising Awareness of Covid Restrictions	Community Policing team called due to YP spotted making a fire in the park, quite close to trees & near to houses. This caused a good ethical debate (See above).
Response to risk taken behaviour	None
SBWYBYC	N/a
SBWYBYC	N/A
SBWYBYC	Na
SBWYBYC	No issues on this occasion
SBWYBYC	none on this occasion.
SBWYBYC	not applicable tonight. very constructive engagement.
SBYW - Outer North	
SBYW - Outer North	Improved relationships with young people and they have a better understanding of their actions having consequences. Treise spoke with a group of young people that were involved with the ASB to try and get them reengaged on some online activities and will follow up with this next week. Young people are aware that staff will be on street next Friday and Saturday, the hope s that this will deter them from continuing any further ASB
SBYW - Outer North	N/A
SBYW - Outer North	Positive night very quite staff to continue to try and engage with the group at Carnhill tunnel and build positive relationships with hem through SBYW
SBYW - Outer North	Positive relationships developed with new young people and the hope that this would encourage young people to be directed to the youth centre.
SBYW - Outer North Week 3	Great session all positive interactions and no signs of any risk taking behaviour tonight thankfully.
SBYW Outer North Week 4	Really positive engagements with all especially with group that didn't engage last week. so we can see a clear benefits of the SBYW
SBYW Strabane 02.04.21	
SBYWB	N/A
SBYWB	Na
SBYWB	young people are actively seeking intervention from the youth staff. they want to take part in programmes and were engaging in full conversations with youth staff.

(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Again the same one young person is attending, but the growth in that individual so far has been great. His confidence within himself in how he presents himself has developed, his relationship with the staff and the DJ has come on, and finally he has went out and bought himself a set of decks which he was excited about showing us and the DJ. This shows the need he had for this intervention and much its helping him, that he has took an interest and hopes to coninue it after the group finishes.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Only one member of the group turned up again, it was the same young person from the week previous. He turned up 15 mintues early and his whole precence had changed from the week previous. He seemed to have a more positive outlook to the programme and an elemnet of confidence about him and what he learned the week previous. He also talked with us how he was looking forward to get stuck in. Our biggest issue currently is the rest of the group not engaging in the group, but are continuing to drink outsdie the centre.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Only one member of the group turned up for the session. They were able to work with the DJ on their own and learn an introduction to using DJ equipment and basics of music.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	The group finsihed on the 26/03/21 and over all the project for that one individual was successful from the feedback from the DJ and the staff. The young person involved was able to follow direction from the DJ, they were able to pick up the skills rather quick and their confidence grew from they first entered the doors to when they finished. Week one they came in and stood at the door and hardly spoke, as the weeks went on they came in and went straight to the decks and the DJ, they were taking requests for songs to play, turning round and telling us how clean their mix was etc From a workers perspective his development was brilliant and I dont think this would of been the same result if all young people took part.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Week one starting the 18th of Feb was around engagement with young people and parents as this was additional bespoke we needed the permissions of for the project. It was decided to do this within Tullygally centre to get young people out of their houses and to meet myself and Gary. Only one person turned up to the centre however all other parent(s) and or legal guardians contacted to either apologise or say that their young person would be attending next week.
Addressing needs of vulnerable young people through street based response.	Bespoke intervention targeted work on ASB, and relationships with in the community, positives & negatives, actions and consequence. One girl's behaviour was very disrupted and continued to misbehaviour throughout the sessions. The group was getting fed up with her behaviour, the group asked for her to be send home, after a discussion on appropriate behaviour it was agreed to let her stay
Addressing needs of vulnerable young people through street based response.	Building relationship with young woman who are vulnerable within the area. to reconnect with young people in terms of structured group work and keeping them safe within the area.
Addressing needs of vulnerable young people through street based response.	First group session around story boards with the young people presenting their journeys from the start to the future key dates and experience informal learning on sharing and building confidence for young people.
Addressing needs of vulnerable young people through street based response.	Following on from a session the group of young people had in a different setting with the Fire and Rescue Service of Northern Ireland work was based around that conversation and drawn from the young people experiences through the actions they have had within the community and the impacts FRSNI faces when entering the community.
Addressing needs of vulnerable young people through street based response.	Group session went extremely well in terms of informal learning, discussions and building relationships with the young people within the group. Conversations around where the group is heading and how to extend the group in terms of personal and social development or social action projects.
Addressing needs of vulnerable young people through street based response.	Two groups split in the centre one group is a group of young women whom are involved in the period poverty group offer by Divis Youth Project. Second group was the young male group involved in high risk/ at risk activity within the area who the centre identified as vulnerable. Talks around attacking the fire services and informing the young people of next weeks session of a visit from the Fire Services and how attacking the services impacted on firefighters keeping the young people community safe.
Addressing needs of vulnerable young people through street based response.	Young people engaged in a group session regarding the area and community they're from and what makes the place A. Home to the young people. B why it's important to young people to acknowledge these and finally C. How they would like to see the area/community change and change for a positive or negative and why?. The group responded well to the activity however an issue between two young people raised and was challenged and sorted by workers within the group. Overall, the group went extremely well with enriched conversations.
Addressing needs of vulnerable young people through street based response.	Young people engaged positively with staff in regards to the group session. It explored the place young people called home, why it's important to the young people and if they could change aspects of the community what would it be and why. Session was exploring young people beliefs and values in term of community inclusiveness and feeling they're in a safe environment in terms to living within Divis.
Addressing needs of vulnerable young people through street based response.	Young people engaged with staff while out on outreach to have access to the building young people split into two bubbles systems which made the streets peaceful. During this session relationships where built and maintain in relation to ensuring young peoples voices are heard and voices through themselves (young people) or through the means of youth workers.
	young people engaged with the Fire and Rescue Service due to firefighters being attacked when they enter the

Addressing needs of vulnerable young people through street based response.	estate. Young people engaged with the FRSNI well and took the conversations with a bit of reflections on the recent actions within the community. Great session from young people that participated within this programme. Relationship built up with young people, fire services and staff to strategies for longer sustainable work within the future.
All Together Now	ongoing intervention with this group who had been meeting remotely but were struggling with this feeling very socially isolated and lonely. Participated in outdoor team building day where the first took part in team building activities and then had the opportunity to organise and run these activities for the group. Very successful day with the whole group reporting how much it helped them in the current circumstances. On young person was unable to attend due to family issues.
All Together Now	Small group work sessions looking at mental health and returning to school
All Together Now	Small group work sessions where young people were able to meet in small groups and re connect with each other and staff looking at issues around mental health and returning to school.
Ardoyne Bespoke Intervention	Young people addressed issues on anti social and risk taking behaviour. The group engaged well and took on everything that was being said about each topic. They have a better understanding of the difference of ABS and risk taking behavior post and pre COVID.
Ballayarnet Family Support Project	Throughout the session the boys participated in a community clean up where they shovelled, brushed and cleaned alleys in their community making it cleaner and safer for those who use them. Members of the group actively engaged within the clean up and engaged well in conversation with staff regarding personal struggles and impact of Covid. Staff spoke with young people promoting positive coping mechanisms which will help when experiencing particular feelings or emotions. 2 young people came a half hour late and was reluctant to do any work at all and not engaging well. After speaking with the two boys individually to see what was up - one young person stated he hadn't slept all night and wasn't bothered. Other members of the group were not happy with his contribution.
Ballayarnet Family Support Project	Today's session took place at carnhill tunnel after recent anti social behaviour displayed by young people at this hotspot including fires. The boys participated in a clean up of this area making it safer for local residents and kids to pass through without any potential danger or risks. The lads engaged well throughout the clean up removing excessive glass, rubbish and fire leftovers. One young lad disengaged from the group and was digging up the grass area at the side, threw conversation with this young person we established there was more to this reasoning. Young lad was up all night, no sleep and wasn't ready to actively participate.
Ballyarnet Family Support	This session consisted of a clean up as a result of a local resident phoning and asking if we could help clear the back lane. The boys participated well in the clean up despite the horrible weather. 1/2 of the lads refused to take part due to the rain and hail stones. Throughout the clean up we had some conversations around plans for the weekend and how that looked for them. In light of the current conditions and circumstances the boys were glad to get out of the house for a while and help out in the community.
Ballyarnett Family Support	Social impact project - The boys participated in a clean up of Rainbow Child and Family Centre. They all engaged really well and got involved in brushing, power washing, litter picking etc. Rainbow kindly provided warm food for the boys as a thank.
Belvoir ASD Group	Continued on the theme of managing anxieties - One member of the groups parents contracted covid within the last week and this left the group anxious as the possibility felt closer to home that had previously done. The staff engaged with the young people through educating them on coping strategies to manage and understand anxiety, this will be the focus of our next few sessions due to the additional needs and development of the group.
Belvoir ASD Group	Evaluation session to conclude this bespoke intervention: 100% satisfaction rate - 4/4 Stated they enjoyed the programme and the method of delivery 4/4 felt that they have increased their awareness around anxiety and how to reduce anxiety. 4/4 stated that they feel that they have a foundation to restructure thoughts in thinking differently 4/4 Stated they now think differently about situations 4/4 Stated they now apply new ways to control anxiety including breathing techniques Identified programme for next quarter to link with OLS to facilitate.
Belvoir ASD Group	Facilitating opportunities to explore coping strategies for current lockdown and isolation with a group of young people with ASD. Utilising the medium of arts and crafts to build rapport and discuss sensitive issues presented with and how to use experience within the group to overcome.
Belvoir ASD Group	Initial session with young people which involved raising awareness around new guidelines, developing a thematic programme based on needs and building rapport with staff. Feedback from parents from our initial session has been expectational in relation to breakdown down barriers in relation to isolation and connection with others and the impact on mental health.
Belvoir ASD Group	Introduction to programme to assess the current needs of young men in relation to the challenges that have been presented by covid19. It was evident from young men's behaviour that tonight's connection with staff and other young people was valuable to establishing a strong foundation and relationship to enable young discuss sensitive issues in relation to mental health. Young people engaged in the needs assessment which will be used to direct work from next years CDA. It was agreed as a group we would focus on emotional regulation using a CBT methodology.
Belvoir ASD Group	Managing anxieties was a key focus of tonight session based on one young person returning from isolation - Group were keen to hear her story however very cautious with space and connection which had a direct impact on the young person. Education around Covid, transmissions and how to keep safe - The aim was to aim ease anxiety - This was reviewed and all young people stated they felt more at ease. Facilitated discussion around the easing on restrictions and healthy coping strategies - This was facilitated in a experiential growth groups. The idea would be to capitalise on this going forward.
	Through the medium of cookery we engaged with the young people around the emotional wellbeing framework

Belvoir ASD Group	in relation to the key areas and how we were currently imbedding this within sessions and how we could continue to do so creatively through empathy. Young people engaged in discussions around thoughts about returning back to school and the various anxieties that this evoked, we used simply reframing techniques to reframe our thoughts and breathing techniques to elevate the anxiety. This theme will be continued looking at pizza making next week which will build on the skills of some of the young people through experiential growth groups.
Belvoir ASD Group	Utilised the time to consult with young people regarding questions issued by SYO in relation to needs assessment. Young people had opportunity to participate and share their voice on protentional programmes that meet their needs given the change in circumstances over the previous year. Young people participated well throughout and engaged in meaningful conversations - All information was recorded and sent to SYO following the meeting to collocate for area action plan developmentyt.
Belvoir ASD Group	Young people continued to capitalise on their cognitive skills through the engagement through the medium of cooking. Young people spoke openly about impacts that covid has had on them and exploring strategies to reframe their thinking. Various examples were given to the group. Exploring of the use of outdoor space to promote health and wellbeing also explored as the brighter nights come in.
Belvoir Young Men	Follow-up from last week was made with all parents of the group this week. Parents stated they have concerns however these were addressed during all calls. Parents stated that as young people are returning to school next week they would be in attendance on the Centre next week.
Belvoir Young Men	No young people in attendance this evening. Staff used the time to engage in outreach where we made contact with 3 young people who would have attended the group. Young men stated that they were not aware of the programme as information had not been passed on by the parent. Conversation themes: Returning to school and the impact on self including mental health and the various strategies that the young men had been adopting to enable them to cope. Focus on establishing contact following the Easter break - Young men encouraged to keep an eye on the Facebook page and information will be texted to parents when the Youth Service has further information about opening. Young men keen on whatsapp group for information, alluding to the same process for Dream Scheme.
Bouncing Back	meeting up face to face with these 4 young women was a great thing for them, they havent had much contact with their friends or outside world in a while. They used this session to explore their feelings and they were all in the same boat or feeling de-motivated, lazy, anxious and depressed. However know ing that this intervention was going to continue they were very excited and up beat.
Bouncing Back	Outdoor walk and talk with the young people, discussing their past week, exploring problem solving issues due to anxiety around school work load and going back to school. Good discussions with young women, and moving forward with positive attitudes.
Bouncing Back	The bouncing back young women were referred to us by their parents and there lack of social interaction and anxiety levels rising. Through their 6 week intervention programme they have pushed themselves through outdoor workshops, health and fitness which they have all voiced has helped them be more positive and has reduced their anxiety levels. Great programme with very positive young women who have expressed interest in becoming volunteers within the youth club.
Bouncing Back	These 4 young women have designed a fitness programme to help them reconnect with their positive attitudes and mental health, this week they attempted the 5k run area in the Fall's Park and did a great job, the all paced the run together making each other feel safe and comfortable. Each young person was extremely pleased with themselves which sparked thoughtful conversation afterwards.
Bouncing Back	Theses young women have been making great progress, they are extremely happy with getting the chance to be allowed to work together. This week they used a new local spot of Springfield Dam where they visited and discussed feelings during the programme and also explored new ideas for programmes for after this programme ends.
Bouncing Back	This group of young women are progressing so much over the past number of weeks. They have been out and about using local areas to walk, run and do some light exercise. The discussions the group have been having are very positive and the young women can now look forward to the future without any hesitation. Each of them explored their feelings of anxiety and how they are feeling a lot better, which is great for us to hear that their face to face intervention work is working for them.
Clonard WC 18 Jan	A topic that has been brought up recently has been anti social behaviour. Some have spoke about gathering at shops, being involved in anti social behaviour. We have spoke about preventing risk taking behaviour and anti social behaviour.
Clonard WC 18 Jan	As a result of relationships and communication breakdown between their friendships we have came up with small goals to meet each other and start a conversation every week
Clonard WC 18 Jan	Catch up on last weeks goals and how communication has improved within friendships. We have moved the goals onto family life as some young people have expressed their strained family relations and how they just bypass each other and do not speak unless its to argument.
Clonard WC 18 Jan	The young people have been partaking in some anti social behaviour so we have them in talking about ways to reduce this, setting small targets to keep them busy in a a good way eg: walking.
Clonard WC 18 Jan	the young people have benefitted from the last few sessions, learning coping mechanisms' to deal with stress, school and relationship strains, setting small targets to keep active and healthy.
Clonard WC 18 Jan	The young people have expressed how their mental wellbeing and anxiety over lockdown has affected some of their relationships and how they communicate to each other
Clonard WC 18 Jan	The young people have learned techniques on how to communicate a little bit better with family, friends and how to reduce the stresses in relationships. As well learning how to avoid risk taking behaviour and promoting better

	life choices.
Clonard WC 18 Jan	The young people wanted to talk about the stresses of lockdown and the effect it is having on their mental wellbeing
Clonard WC 18 Jan	This week we spoke about how some relationships are frayed and ways of helping them over come these obstacles. Some are finding the restrictions hard and have said how their phone sessions with counsellors are not having the same effect so they are finding it helpful coming to the groups.
Clonard WC 18 Jan	We spoke about school work, the challenges they are facing with it and ways to overcome the obstacles. Few have had phone calls from the school in relation to work.
Clonard Young Men	The successes of the intervention at this minute would be that the young men are now engaging and attending the group after a few weeks of attendance difficulties, they are also gradually becoming more open in group discussion, the challenges are that the young men can at times begin to display challenging behaviour, whether that be the language they use towards staff or eachother.
Clonard Young Men	The young men are currently involved in an ongoing group work process engaging in sessions based around mental health, drugs and alcohol and community awareness.
Divis Street Work	Tonights Group work intervention is in response to the growing conflict between young people the residents of lower falls and the NIFRS combined with the PSNI. In Partnership with the NIFRS and The Community safety coordinator we developed a work shop that invited the NIFRS community team out to the centre following PHA guidelines and Health and safety protocol. The workshop aimed at engaging young people using informal educational methodologies, The workshop used conversation and visual aids to provide young people with real life situations and previous experiences of fire fighters who have suffered from attacks and anti-social behaviour like some of the NIFRS have experiences at our local Hot spots the constructive discussions examined the following themes: -Who are the NIFRS, What is their role, Who are they not (Not the PSNI) -The very limited NIFRS resources available at any one time in North/West Belfast -The Impacts of these resources being attacked by young people and being taken out of service -How peoples lives are impacted by these attacks - Being together as a community young people and the NIFRS - aspirations The staff then facilitated a reflective conversation reflecting back on our own decision making processes and how we can start to think consequentially Feed back from young people was positive however some young people felt they were being pointed out by being asked to attend the session and believed it was a blame game. Staff used strength based approached in exploring how well and active young people, can be in their community highlighting examples of social action, volunteering and citizenship that young people have been part of in the past Staff to follow up in partnership with detached youth workers and Community safety coordinator
Employability Programme	a number of young people contacted staff seeking support in applying for numerous jobs in the hospital, jobs applied for are: domestic cleaner, porter, catering position. One of the young people asked for support in obtaining their provisional driving licence. Plans have been made for any young people who were successful and get an interview to organise another session to develop their interview skills.
EmpowHer (Participation Fund)	Group were successful in securing participation funding, this week the group packed 40 self care packs for their peers in centre. This is the first time the members have been involved in any type of groupwork and this was there first time applying to the fund. The response from the group has been amazing with the young women showing ownership over this programme and also wanting to engage in future projects.
EmpowHer (Participation Fund)	young people prepared the newsletter and workshop they want to hold for packs going to peers. Discussed packs - impacts on health and well being.
ESCAPE Project - EA Community LYNC	This programme is working relatively well with the face to face element at the minute with young people turning up for their sessions. At this stage we are still working with the young people to build effective and appropriate relationships and embedding the circle of courage to support the young people as we provide an arena to address issues around safety and stability. his week the young people began to prepare for their OCN in law and order by looking at anti social behaviour and the consequences. This opened up a forum for meaningful conversation to take place to explore issues such as risk taking behaviour and the consequences. The young people also started back on their training programme and completed first aid training on Thursday night. The attendance has been good aswell although timekeeping continues to be an issue with this group. we are addressing this through the acceptable behaviour contract which is in place. The young people are all still in the initial stages of engagement but it is hoped that through the duration of this programme and over the next few weeks they will move towards active participation. This week the young people completed profiles on why they are taking part in the ESCAPE Programme and their answers were heart warming. Even after a short time the young people involved can clearly outline the benefits for them and we hope to improve and maximise on this over the coming weeks and months.
ESCAPE Project - EA Community LYNC	This week the young people completed team building challenges on Tuesday night, working together to solve problems and looking at the positives and benefits of teamwork. Our reason for doing this session was to highlight to young people the importance of team work especially during the placement element of the programme. This session also was a way of strengthening relationships between group member as there are still some of the young people who appear to be on the outside of the group - due to pre existing friendships and attitudes prior to the programme beginning. This session worked really well, we did expect some resistance to the challenges we had set but the young people seemed to enjoy this informal session and all participated. However there were a few times were we again had to refer back to the Acceptable Behaviour Contract to remind young people of their agreed contract. On Thursday 9 young people showed up on time for the planned 2n night of first aid training which was to be delivered via zoom. One young person arrived 30 minutes late to the group but came in quietly and took his seat. Unfortunately due to an unforeseen circumstance (which was explained in an incident report form previously submitted) the session had to be cut short to allow staff time to deal with the arising issue. Young people were asked to leave the session and did so immediately as they were

	<p>aware of the seriousness of the situation. A few young people appeared to be upset at the circumstance and leaders reassured them all was ok and that we would touch base with them later on.</p>
ESCAPE Project - EA Community LYNCS	<p>another successful week for ESCAPE - This time the young people helped out in the local community with a community survey to gather thoughts an issues around what its like to live in galliagh. they also continued on with their law and order ocn which provoked many thought provoking discussions and allowed opportunities for meaningful conversation. the Thursday training programme also continued this week and focused this week on safety in the work place which the boys participated in well. One young person who was off on sick leave for a few weeks returned to the project tonight excited to get back :-)</p> <p>The young people are beginning to have conversations with staff about the summer months and some issues which always crop up in the area - in particular bonfires - this is something which we will be following up on over the next few weeks engaging young people in meaningful dialogue and looking at ways to move forward as we enter the summer months</p>
ESCAPE Project - EA Community LYNCS	<p>another successful week for ESCAPE. the boys continued to work towards their OCN in law and order on tuesday night and on thursday night completed fire safety training through zoom with Global Horizons. this week it was evident that there was a shift in the attitudes of the boys towards the training, after we had a meeting with them last week regarding the need for them to be concentrating and actively participating in their training sessions. The boys were excited for pay day and sharing this excitement with staff and each other. one young person is still off sick this week but has been regularly checking in with Conchúr to keep him up to date with his illness and a possible return date</p>
ESCAPE Project - EA Community LYNCS	<p>this week the young people engaged in a group work session with youth staff looking at anti social behaviour and the impact and consequences we also held one to one meetings with all young people as a check in to establish how they are getting on in the programme and to offer support. We addressed issues with the young people that have been coming up over the last few weeks such as attendance and attitudes and young people participated fully in this one to one. Through this one to one time with each young person, relationships were further enhanced and young people engaged in meaningful conversation</p>
ESCAPE Project - EA Community LYNCS	<p>This week we started to look at activities and scenarios which will be directly related to the OCN in law and order which we hope to complete in March. The young people worked well on tuesday night and enjoyed the scenarios we presented them. they shared their opinions with each other and we challenged their thoughts and related them to real life scenarios to explore the opinions of the group and their understanding of the consequences relating to their actions. During this session it was great to see the boys open up and engage in meaningful conversations and it was evident that their relationship with us is strengthening each week. On thursday night the boys continued with their training programme, completing health and safety at work training. This session was difficult for the boys as they found it hard to concentrate and were easily distracted. We had to constantly refer to the ABC with the boys and spoke with the facilitators after the session about how we move forward. We have agreed with the facilitators now that we will do a two hour session each week with them and for the final 1.5 hours we will complete worksheets and group discussions in our own group which will hopefully mean that the boys get more out of the session. The young person who was ill last week has still not returned to the programme but hopes to be fit enough to rejoin next week</p>
ESCAPE Project - EA Community LYNCS	<p>Vety low attendance this week and although young people sent messages to let us know why they werent attending, we need to keep an eye on this over the next few weeks behaviour was an issue again this week with young people being disrespectful towards staff, meaning that we had to revisit our acceptable behaviour contract several times. The young people were notably better in thursday nights session, following on from our discussions around behaviour on tuesday night but this has highlighted to us that it may be necessary at the start of every week to do a refresher on their contracts and acceptable behaviour on the programme. this week the young people continued to work on preparation for their OCN in law and order and also completed their mental health awareness training via zoom.</p>
Gambling Awareness and Support Programme	<p>Gambling awareness programme that has been able to identify more needs of the young people and able tonput support in place</p>
GDI Group 1	<p>Engaging with two groups of 4 who have been participating in risk taking behaviours namely underage drinking and drugs. We have had an initial contact with the yp and are in the process of working out a programme with them to engage them in the centre and divert from the risk taking behaviours they have displayed.</p>
GDI Group 1	<p>taking small groups of yp from the larger group is proving somewhat successful in deterring the larger group from gathering and participating in risk taking behaviours namely underage drinking, the groups are beginning to understand the risks to their health and safety and also the risks to the community</p>
GDI Group 1	<p>we have been talking about citizenship and how we can make a positive contribution towards our community, we have discussed the risk taking behaviours that we have seen in the Cregganburn Park area and discussed the dangers these pose to the young people as well as the impact on the community. So far they have contributed really well. We are only working with groups of 4 so it is so difficult to have an impact working with such small groups but we are hopeful that the message will travel back to their peers and they will peer pressure in a positive way to make positive changes to their friendship circle!</p>
GDI group 1&2	<p>In an attempt to disrupt the risk taking behaviour of a larger group 16 yp were asked to participate in a number of group work sessions based around the dangers/risks involved with drugs and alcohol, we provided 2 sessions to each group of 4 over the last two weeks. 11 of the yp turned up to each of their sessions and participated well however the other 5 missed sessions, turned up very late or didn't participate well within the group, we have discussed it with the yp and decided to take a week to think about and discuss how we move forward and come up with a new group work plan for the following week.They have been sent out activity packs and agreed to partake in online sessions next week.We will reassess before next Thursday to decide if the face to face sessions need to be reinstated.</p>

Goal Line's Families in Crisis	All young people were engaged in relevant programmes depending on their ability. Two of the young people benefited from time in the multi sensory room.
Goal Line's Families in Crisis	We are providing bespoke sessions for young people most at risk in our community
Goal Line's Families in Crisis	we are providing bespoke sessions for young people most at risk in our community.
Goal Line's Families in Crisis	we are providing bespoke sessions to young people most at risk in our community
Goal Line's Families in Crisis	we are providing bespoke sessions to young people most at risk in the community
Goal Line's Families in Crisis	We continue to run bespoke sessions for those most in need in the community.
Goal Line's Families in Crisis	We provide bespoke sessions for young people in the local community.
	<p>In response to ongoing tension and conflict between young people- PSNI- residents within the community tonights session aimed at enabling young people to input in the valuation of our years work and design our priority areas for work over the next 1-2 years. the Court of Ideas event followed all key PHA guidelines and was conducted safely. The event was conducted in all different rooms with young people in minimal numbers to ensure maximum safety with all spaces being sanitised before and after each session</p> <p>session1 Aim's: • To include members in the annual reflection and evaluation of programmes year 20/21 • To encourage critical thinking and promote honesty in feedback • To enable young people to articulate learning, achievements, areas for improvement and what didn't work about this year's programme of work, engagements and over all operation • To Collect all data and information provided by members and accurately include it in a Document Exercise: How was your year as a member of St Peters Immaculata YC Set up/Instructions Staff will have stations at each corner of the room each station will represent a Quarter of the year from April 20 to April 21 At each Station there will be a list of the programmes, projects, activities and provision provided during that quarter including some photographs, evidence feedback from that quarter, Young people will break into smaller groups and each allocated a quarter they will have 10-15 mins at each station, before moving clockwise and changing to another station, Staffs role will be to collect any feedback, written, verbal or other and create reflective conversations that enable young people to evaluate their experiences, Staff will help young people record their Thoughts, feelings and experiences of that quarterly programme and ask young people to think about • Achievements • Successes • Impact made • Areas for improvement • Doing better together Young people will be prompted and encouraged to articulate their lived experiences in-regards to each station. Staff will collect all feedback, data, information provided accurately. Young people will rotate after 15 mins to ensure each small group participates in the exercises at each station.</p> <p>session 2: Session 2: Expressive workshop Location: Art room (Use other spaces if needed) Aim's: • To provide a kinaesthetic and practical approach to needs analysis by using arts-based techniques • To maximise young people's ability to participate and use their talents and skills in this need's assessment, • To facilitate a visual mapping exercise that enables young people to identify priority areas of work in the lower Falls community • To Collect all data and information provided by members and accurately include it in a Document Exercise: Let's use art to articulate Staff will arrange and organise the room into 3 zones as listed below: • The Art/practical zone • The Mapping Zone • Expression zone The Room will be split into 3 zones Each zone will facilitate a process of reflection and evaluation each different and with different methodologies for facilitating this process Young people should be encouraged to choose what one suits their learning style best; Staff should identify young peoples' strengths/interests in these areas; (Where some young people struggle articulating or explaining verbally and written). This part of the evaluation event should be facilitated in a more in/non-formal by staff while highlighting the focus evaluation.</p> <p>Session 3: Prioritising the priorities Location: Dance studio Aim's • To provide a SWOT Analysis of St Peters Immaculata Youth Centre that young people will facilitate • To enable young people to collect and identify all the needs from the previous sessions and present them around the room • To enable young people to develop a process that prioritises needs into 3 tiers, Red, Amber Green • To assist young people in conducting a value Audit on St Peters Immaculata Youth Centre</p> <p>Exercise: Priorities for youth Divis style 1 Staff will have 4 large flip chat pages at each Corner of the room each page will have a heading of the SWOT analysis headed: Exercise: Priorities for youth Divis style 1.1 RAG Young people will go back and take all evidence of and piece of work completed in the previous sessions and post it to the walls in the dance studio so they can visualise the needs that they have identified Eg. Drugs support, Health etc, they will then have to negotiate the Priority needs for the next year the young people will be asked to allocate these needs to the following groups: Red: highest priority of needs/areas of work Amber: Medium Priority needs Green: Low Priority needs Note: it is important to stress to young people that all needs are very important and this exercise is to help the club identify where more of our effort and resources need to go. Staff will facilitate a debrief that examines what young people's priority areas of work and their vision of lower falls for young people in the future.</p> <p>Exercise: Priorities for youth Divis style 1.2 Impact Audit Young people will be asked to complete an Impact audit on the Thematic work delivered by St Peters Immaculata Youth Centre. Staff will Have each Thematic area of work put on the walls around the Room for example • Health • Mentoring • Residential • International learning • Staff • Relationships • The Building • Etc Young people will be briefed on the specific engagements and programmes that come from these themes of work, Staff will ask to value these thematic areas on how much impact St Peters has or can make in these programmes and engagements, The Scoring system will look like: 0-50 points 0= No impact and No value to meeting the needs of young people 50= High impact, extremely/Most valuable in meeting the needs of young people Staff will ask young people to explain why they have given that particular score and provide a personal reflection on why, Staff will record the reasoning and the score of each theme. At the end of the session staff will collect all scores and total them up for each theme this will be combined at the end of the week to create an overall total and in-turn a value for each theme that St Peters Can offer young people.</p> <p>Session 4: The Finale Location: Coffee Bar Aim: This session should be more relaxed and allow young people to have some breathing space, a break and some refreshments, the staff should assess the groups energy levels at this stage and determine when the Video Vlog session should be facilitated as it is very important this is completed before young people finish, Exercise Video</p>
GRD Project	

Vlogs Staff will have arranged to have a video camera established in a quiet room with 2 staff members present, this session is to combine everything all the learning, Experience and achievements of young people throughout the court of ideas and the year as a direct result of participating in the St Peters Immaculata Youth Centre Programme, This session is Vital to ensuring young peoples, thoughts, journeys and voice is included in making decisions in the future running of the youth centre, The staff should brief young people and reassure them that there is no wrong answers here, Young people might be nervous about going on camera they may be worried about where the information will go etc, Staff should be supportive and be honest with young people and tell them that the video will be used to provide our stakeholders with a picture of how young people experience living in the lower falls and what is needed in the community to provide more opportunities for young people and create a better place to grow and learn. Staff should start the video asking the young person to tell them their name age and where they are from. Staff should ask young people some fun based questions to help young people get comfortable on Camera answering questions listed below is a guide of questions that can work to help young people articulate themselves to the best of their ability, Young people actively and safely participated in this consultation event and were able to have input into the design and delivery of youth services in Divis

GRD Project

tonights session examined positive leadership within the community The intervention reflected on what negative leadership looks like within the community now during the pandemic i.e Gathering in Large groups, transmitting the virus, anti-social behaviour and bad decision making, The intervention facilitated safe, positive team building exercises which required the YP to work together use key communication, problem solving and leadership skills during the reflection young people identified key learning outcomes including, enhanced personal capabilities; Increased self-awareness, managing feelings. Development of positive thinking and work and life skills, decision and making, planning and problem solving skills and demonstrating leadership qualities and abilities,

GRD Project

This planned intervention was in response to a number of issues and challenges facing young people over the past 7 days, Young people have been involved in a number of anti-social elements and other at risk behaviours such as; Aint-social behaviour fire and personal safety issues Criminal damage Negative engagement with police Coming under negative attention via social media by local residents and known paramilitary groups The staff provided a safe place for young people to come in the centre and created a intervention that examined: Young peoples current Personal safety due to anti-social behaviour Risk taking behaviour Consequential thinking Policing and the community Local residents feeling Respecting people in the community (During a Wake) The Discussions we had with young people where honest and enabled the participants to reflect on their own behaviours and why their is conflict with the police and the community. We agreed a number of supportive engagements that aim too keep young people engaged in pro-social activities and behaviours some of which include: Opening The centre for the targeted group as a Extended group work intervention on Friday and Saturday evening and providing Safe Activities For YP to engage in Providing A safe lift home via The mini bus following PHA guidelines Having additional support via staff on the streets Provide take-away tea and refreshments These agreed engagements will support young people to make good decisions, the Feedback we got from the group was they have intense frustration with the PSNI and will not be intimidated in their own community, they have little to no support mecachsims following the lockdown restrictions expect the Wednesday evening, The staff will be prepared and Briefed for weekends delivery plan and have effective engagements planned

GRD Project

Tonights intervention was in response to a number of issues and challenges facing young people in relation to Anti-Social Behaviour, Conflict with PSNI and Paramilitary exploitation, The staff designed a session that would attract young people to the youth centre to participate in a diversionary and developmental session, the session was designed to engage young people safely in a high energy activity Combined with a Constructive discussion around choices and consequences and the impact on self- peers- family and community and reflect on how to make good decisions when in bad situations The session planned a team building activity that took inspiration from a community event that took place a few weeks back, the 4 corners event created a short film around how society reacts to a little dog being a victim of paramilitary shooting, This exercise was aimed at enabling young people to develop empathy and empathic understanding for others in the community. Our exercise was similar we provided young people in small groups following PHA guidelines with Card board boxes, cello tape, colouring in markers pencils etc and other materials the objective for the exercise was to create a house for a small dog living in the lower falls particularly the hot spot areas that have been given wide spread attention on social media and other outlets. The young people were given a specific time frame to complete the task with the given resources, Young people were encouraged to think about leadership, follower-ship and communication during this exercise, The Young people were also asked to create a short 5 min story that explains what the dogs life is like living in that cardboard home in the middle of a anti social and dangerous situation and to think about thoughts, feelings, worries, stress etc Once young people completed the task the groups presented their stories and got feedback and affirmation from peers, key issues coming out of the young peoples stories in their analysis of the challenges including: -Safety -Families -PSNI -Futures of people involved in the activity -Stress - Ownership The staff facilitated a constructive discussion and reflection examining all identified challenges that the dog experienced and in turn that the people who live their experience and how dangerous it can be for families live there also how this can portray young people and the lower falls as a negative place to live and grow, The staff encouraged YP to take ownership over their choices and to make better decisions.

Tonights session examined positive leadership within the community The intervention reflected on what negative leadership looks like within the community now during the pandemic i.e Gathering in Large groups, transmitting the virus, anti-social behaviour and bad decision making, The intervention facilitated safe, positive team building exercises which required the YP to work together use key communication, problem solving and leadership skills during the reflection young people identified key learning outcomes including, enhanced personal capabilities; Increased self-awareness, managing feelings. Development of positive thinking and work and life skills, decision

GRD Project	<p>and making, planning and problem solving skills and demonstrating leadership qualities and abilities,</p> <p>Tonights session is in response to ongoing challenges and issues between young people and PSNI-NIFRS and residents of lower falls, Young people explored trust within the group dynamic, There is ongoing challenges between staff and young people in regards to trust and being labelled "Touts" Staff designed a session that would tackle this challenges and provide some clarity on the role of the youth worker, the Themes of the session included: - Define a Tout and in what Context - Choices and Consequences - Our role and reasonability as youth worker -Child protection and Safe guarding responsibilities - empathy Exercise- You as a tout and you as a victim of anti-social behaviour Young people participated effectively with some challenging behaviours staff used person centred techniques and smaller group discussions to ensure young people could input, This will be a ongoing conversation in street bases situation and group work</p>
GRD Project	<p>Tonights session was in response to a number of contentious issues with police and young people, There was a incident between some of our members and the police. This is in relation to Police taking advantage of young peoples lack of understanding about civic responsibilities and their knowledge of the law and youth justice, Threatening young people with court without evidence, charges or due process. As expected young people who were exposed to this were upset, angry and not thinking logically, This session aimed at enabling young people to name the emotions and the root of these and techniques to manage these logically the themes discussed in this session included: What is this feeling? Responsibility "I statements" How did the situation evolve this way How do I deal with this? The discussions were emotional and constructive, young people participated effectively, staff had to manage the behaviours and attitudes of the young people as there was clear disconnect from the group topic and the young peoples thoughts feelings and behaviours. Feedback was positive and young people connected the discussions to their ability to better manage themselves in high energy confrontational situations Young people and their families are experiencing increased pressure due to COVID, young people are experiencing increasing tension and conflict at home and within community, Our intervention tonight set out to examine what the root cause of tension and conflict was at home and in the community and co-design a solution, The successes of the session included: Young people felt they had supportive adults who listened intently and offered support and assistance with challenges facing them during current circumstances, Young people felt this session was the first piece of "rest bite" they were able to experience since the lockdown measure and felt safe to engage in constructive conversations</p>
GRD Project	<p>During this session we focused on role models and the importance of identifying your own role models within your life. The session was very relaxed young people were very tired after the weekend. We spoke more about the events of the weekend than actually what I had planned during the session. This proved to be more beneficial to the young people at this time. The young people really enjoyed this time to relax and talk about the things that have happened. This has also changed my outlook on the needs of the young people and what the next steps are to be.</p>
Group Work START 1	<p>Group work this week was successful as it was our first week it was very light information our main aim was to engage the young people in conversations about how they are doing and go through the aims and objectives to their developmental programme. We discussed each session and what they would like this programme to entail. Few challenges where that we were limited to the ice breakers/activities that we were able to deliver due to the current COVID 19 restrictions.</p>
Group Work START 1	<p>This week our session focused on vision boards and looking at realistic goals, young peoples aspirations and goals have been low due to COVID and coming from a socially deprived area has them feeling that their goals are limited or unreachable. We talked this through and completed vision boards to encouraged them to strive for their dreams/goals. After assessing the needs for this group it is clear that this group needs to extended further two weeks as throughout our sessions it is clear that consent is a major issues within their peer group. Their vision of relationships and sex has been distorted due to past experiences and the 'social norm' of their peer group. This targeted work will be very beneficial too them. I also feel that there should be a follow up workshop or programme to ensure the young people have explored this issue/ topic properly.</p>
Groupwork	<p>overall groupwork this week was a success. The young people engaged well and enjoyed the sessions. The theme was around goal setting and life goals. The young people were involved in meaningful conversations around their personal goals and also their professional goals and got to write down and keep their own personal goals which they set for themselves.</p>
Groupwork	<p>The group work interventions that we have developed will continue to work with small groups of individuals who are vulnerable and or at risk of self-harming behaviours and life style issues. The focus of the work will be on young people gathering in particular hot spots including back-path, Dunville Park and Ross Road/Credit Union site. These young people are in conflict with community, residents association, community activists and police and this leaves them vulnerable to localised violence, lifestyle related issues and bad decision making. The challenge is to help young people make better decisions, keep themselves safer and prevent them from endangering themselves further.</p>
Groupwork	<p>The sessions this week were a success. The young people opened up ad were honest with the different types of relationships they have and had meaningful conversations about both healthy and unhealthy relationships. The young people took the time to reflect on their current and past relationships. The young people were involved in creating their own vision boards this week. They were able to think about their life goals and put them down on paper. Putting their goals down on paper and putting pans in place for how they are going to achieve them. The young people enjoyed this session.</p>
Groupwork	<p>This weeks engagement went well. It was based on team building and forming the dynamic of the group. A few of the challenges included being restricted on what activities could be planned due to the COVID-19 restrictions.</p>

Groupwork	Young people engaged really well and from the group evaluation after the session it was evident that the young people enjoyed and learnt something from the session. We mainly focused on goal setting and understanding the difference between short term/long Term goals/Realistic goals. Throughout these sessions we engaged in meaningful conversations around mental health and understanding the services that are available to them. COVID 19 proves many challenges through group work activities that the young people enjoy taking part in are limited within the guidelines.
Groupwork - CNP	Young people attended all sessions this week but they were not participating fully as they would have been in previous weeks. There was an issue amongst the group on the Friday before and this created an uneasy tension amongst the group. This results in an un-learning environment and the young people were not focussed on the topics of the group.
GWBYC	Monday night was the first session of the group work. The fact that the 6 young people turned up was a success in itself. They have agreed to return next week
GWBYC	Most of the young people were full of energy and participated fully in the group work session. one of the group was somewhat disruptive at the beginning but settled down after a short while. other members of the bigger group were hanging about outside making a nuisance which was a bit disruptive but we managed to get them to move on.
GWBYC	On this particular night only 1 of the group turned . he went away and contacted rest of group who say that Monday night doesn't suit everyone anymore and could we change it to a Friday.. i told them we'd give it a go and see if we can get it sorted.
GWBYC1	Tonight was the first night of the program therefore it was only an introduction, this gave myself and Amy the opportunity to discuss how we will deliver the program, any changes due to the pandemic and get a general started with the young people as it has been a long time from they were in the setting. The only challenge was time keeping however it was still a success
JPIIYC GROUP WORK RESPONSE	At first it was hard to get the group to interaction using the normally group work setting, they were struggling to engage, and communication was slow. The staff changed their approach and took the young people in to the art room using art as a tool to engage with the young people, the group made "Lock down padlock". The group appeared more comfortable and engaged in conversation around anti-social behaviour as we spoke about St Patrick's Day. They also spoke about pros & cons of going back to school and arguments between friendship groups & how to reconcile. The group definitely seemed to feel more comfortable talking in the art room, when they were doing an activity at the same time rather than having the spotlight on them if they spoke during a group session.
JPIIYC GROUP WORK RESPONSE	young people covers topics such as risk taking behaviour and how it can effect themselves and others Their behaviour was highlighted and how this effects the community, They can see the effect it has on the area, however they feel it is they only place for them to go.
Kilcooley Intermediates	The young people are still facing many challenges, as a group but also personally. This week some of the young people opened up to staff members, which showed they feel that they have built that trust through their positive working relationships with the staff team. this is something that we will continue to look at throughout the following weeks.
Kilcooley Intermediates	The young people have struggled throughout the restrictions, with some getting involved in services which have been provided by youth provisions. The group have struggled with the changes in their lives, school, friendships and day to day life, with the young people expressing the damaging effect on their mental health. Within the first session it is evident to see the fall out which has occurred between some of the group, although the young people stayed civil throughout the group session. Some spoke about their mood and what they struggled with, whereas others didn't in front of the big group.
Larry 1	Contact has now ended
Larry 1	The person continues to take part in the project from his home. He didn't make Zoom session, but indicated he is working on the B42Now Health & Wellbeing Project's Visual Arts Design as part of the overall group's mini zoom presentation performance.
Larry 1	The young person didn't attend the B42Now session, but he completed the visual arts design from home. He is doing well and indicated, he wants to concentrate on his education over the next year and enjoy life more.
Larry 1	The young person took part in the B42Now Virtual Zoom Project for 30 minutes from his home address. There was no need to meet at youth centre.
Lets Reconnect-Inclusion	Group of ten young people with Learning disability who were finding the remote interventions more and more difficult to cope with. They really missed those face to face interactions and really needed to connect with each other and staff again. The day was very successful but reinforces the need for these young people to be engaged face to face.
	session 1) 9-03-21 - the session was a chance for a number of young men to come and take part in small group work session where a brief outline and plan for the coming weeks was laid out for those involved. The session itself was quite difficult as the young men, all new to group work struggled to sit for any length of time without having a go at one another, either by throwing insults or getting up and punching each other. When challenged about this behaviour they all seemed to agree it was just a bit of 'craic' and how they got on together . Throughout the session there was an emphasis by the team to explore from the young peoples perspective some of the issues that had recently taken place in the area. Through group discussion those present were able to highlight a number of issues that were of legitimate concern such as under age drinking , cannabis use, arranged street fights and general nuisance behaviour. However none thought that they had a role to play in preventing this and didn't seem to appreciate the implications of this behaviour. Some other issues the young people raised were in relation to the police and how they felt they targeted their group unfairly also suggesting

Lets talk newry	<p>when doing so it was in a manner that they felt was provocative. The team tried to explore this a bit further and highlighted how some of the behaviour that they had just talked about could lead to those involved and indeed those not involved but present being labelled a certain way. The team highlighted that that there was genuine fear from within the community in relation to recent incidents and explained that this wasn't helped by the large amount of social media coverage on this. It was then put to the group that although unfortunate , that perhaps heightened tensions between themselves and the police may be a direct result of the increasing amount of incidents over the previous weeks. in order to try and hit home the risks of having run ins with the police, the young people where asked to write down 5 things they would like to achieve within the next 5-10 years. although varied, all young people wrote about having a good job and being able to travel. here the team where then able to explain the difficulties one might face in achieving some of the goals with a criminal conviction. Session 2- 12/03/21 - The second session although scheduled to start at 4pm didn't commence until 4:50pm when the young people arrived. All young people arrived together as they walked from the city centre and asked could they stay on an extra hour as they were late. The team explained that this wasn't a possible solution and explained to the young people the importance of timekeeping in everyday life while also highlighting the fact that people often have other commitments outside of their jobs. for this session a small FIFA compitation was set up and during play young people where taken individually to the side and conversation had been had with all to try and look closer at some of the issues that have been effecting them in the recent weeks and months. All young people acknowledged that they had to do more to promote a better relations with in the community and rules where also laid out for when the young people where joining in on the small group work sessions .</p>
Live Learning	<p>this group has begun their first OCN in peer mentoring. this is a group of young people who have been targeted as young peopel who are struggling in school and over lock down will be impacted in low educatioanal educational achievement. thsi is a basic ocn level one to get teh group started in the learning enviroment through youth services. these young people are engaging in face to face session and through session on looked at the importance of education, learning and looking after themselves.</p>
LYNC community	<p>The Law and order OCN is proving to be very beneficial for these young people they are asking questions and having very meaningful conversations around their support and understanding the LAW as a whole and the process. This week we discussed the different kind of sentences that there is, this was very insightful for them as the conversation grew positivity.</p>
LYNC community	<p>The LYNC community group has really engaged in this weeks session around the different consequences crimes have on the offender the Victim and other people around them. Young people jumped right into this weeks session. We discussed the most common crimes that happen within their community etc which generated good conversational debates. It was evident that the young people are now a lot more comfortable talking about Law and Order with myself and Shea asking questions and actively participating in tasks and activities. One major success I feel we have achieved as a group during this session is young people openly and honestly talking about personal experiences around fear, Crime, involvement in community activist organisations feelings of panic and terror as a result of the events that has been happening within their community over the past year. For them to feel safe to express this within this group I feel was a huge success for them personally. I feel we have broke down a significant barrier with these young people and they are becoming more aware of the support available to them outside of this group work session. Although this is not a direct success from the law in order OCN outcomes I feel it is important to record this significant progress.</p>
LYNC community	<p>This was the first session of this LYNC community programme completing their Law and order level 2 young people engaged well as this can be a sensitive topic for some of our young people as their first response was negative and assumed it was mostly about talking about the PSNI. The young people were very honest about their opinion on the law and their level respect for it. This is something we are working on and will incorporate into the sessions to come. We established boundaries and a contract within this session which will enable us to have a more positive group process.</p>
LYNC community	<p>This week during our session we explored and outlined each stage of the criminal/youth justice system from reporting through to sentencing. Whilst also looking at the actual people who are involved in this process. The conversations around this was very interesting as not all young people were aware of the background work that goes on. In relation to last week the relationship between myself and specifically the boys in the group has again progressed seeing major improvements involving their participation and also what they are willing to share and open up about within this group and individually. The trust within this group is evolving and also their trust within myself and Shea. I can also see this having a ripple affect on my engagement and their engagement with me outside the group.</p>
LYNC community	<p>This weeks session was aimed at understanding our Mental health and ways in which we can use techniques such as mindfulness to help us cope with situations and unexpected life events. Young people engaged really well and found it interesting that these techniques actually help them to cope. We are working on another session together which will focus on goal setting and understanding long term and short term goals.</p>
LYNC Ourstreets	<p>the group has bonded together well and is looking at their own future employment</p>
LYNC Ourstreets	<p>the group is coming together and is more confident in speaking out. we are now on the fourth session and youngng people appear keen and eager to continue</p>
LYNC Ourstreets	<p>there was one or two issues but the group is going well and has been engaging to the best of their ability</p>
LYNC Ourstreets	<p>This group is currently engaged in the OCN level 2 Law and order programme. This programmes aims to challenge their behaviors and increases their knowledge around the law and how their actions can led to them becoming involved in the criminal justice system</p>
LYNC Ourstreets	<p>this is a Law and Order course and is going well young people engaging well and according to the young peoples evaluations we are doing a final evaluation next to finish the course</p>

LYNC Ourstreets	this is an OCN level 3 in law and order the group is on the third week. they are engaging well and seem keen on the group.
LYNC Ourstreets	Young people have now completed a 5 week credited Law and Order OCN level 1, staff completed a new needs assessment for the remainder of the employment project. We have decided to complete a CV/skills building as this is what the young people feel will benefit them.
Men's Health Ourstreets	Due to low numbers we took time in this session to reevaluate the program at hand to try reengage those at risk young men and discuss changing the program and perhaps doing something around cooking as most of our young men live on their own.
Men's Health Ourstreets	only one young person but we had good conversation. the young person opened up and talked about how leaving the house is difficult but rewarding.
Men's Health Ourstreets	the group is changing and we are recruiting new members
Men's Health Ourstreets	the group is getting difficult to get young people in as one young person is now in employment. another is at the tech studying. another young person is making a transition from the foyer to his own house. yesterday there was one young person on so we are going to look
Men's Health Ourstreets	the group is going well and young people are engaging. this is a law and order OCN level 2 and is in the 3 session.
Men's Health Ourstreets	The group wasn't going to well so we changed it up a bit and got the group to change the topic and make it more relevant to them.
Men's Health Ourstreets	the session was meant to be face to face but we did it online as 3 of the young people were feeling unwell. so we moved it to Facebook to meet the needs of the young people and we didn't want to let them down and not do the session. we got a chat with them checking and seeing how they are if there is any support we could offer. one young person asked for help with getting a house. I asked a few questions and soon found out why so I told him I would go back and try find out some more info.
Men's Health Ourstreets	This group is currently engaged in the OCN level 2 Law and order programme. This programme aims to challenge their behaviours and increase their knowledge around the law and how their actions can lead to them becoming involved in the criminal justice system
Men's Health Ourstreets	this is a young man's health project in the third week and hasn't had proper session was more conversation based
Men's Health Ourstreets	today's session was just a chill out session where myself and another member of staff just chilled with the young people ordered food and just chatted about how they got on over Paddy's Day just check in to see how they are getting on in general to see how they are getting on
MINDFIT	No engagement by young people tonight. Contact was made between youth worker-in-charge pre-session to encourage participation. Word was given by parents that young people would attend. Half an hour before session commenced youth worker-in-charge was contacted by two parents' and informed they had stated they would not be coming.
MINDFIT	Project has been on-going and is being reviewed due to non-attendance. Regular contact has been made to parents/carers and referral agencies. There has been considerable effort in terms of encouraging the young people's participation. Parents are well informed about the support that is available and know well in advance of changes to the programme. Contact has also been made with both external agencies PSNI and YJA to inform them. Staff will meet to review their programme delivery and re-engage the young people.
MINDFIT	The project has helped to contribute to a small group of young males (aged 13-14) from South Lurgan who are deemed vulnerable. The boys met with the graffiti artist to identify key issues affecting them as individuals during Co-vid19 and lockdown periods. The main themes highlighted by the young people focused around school-work, food (diet), physical and mental well-being, isolation and exploring future pathways to their desired careers. Regular contact has been made between youth workers and the young people's parents to ensure that they are given the most appropriate support to meet their needs and address issues.
MINDFIT	There has been continued non-attendance and staff have discussed this with both parents and management. We will engage with group again after Easter
Mountain Loney Young men	A very positive session on the mountain space behind Newhill, where these young men participated in their first social action activity. They helped clean up part of the area behind the youth centre where they would usually sit about, very positive conversations through this activity.
Mountain Loney Young men	Another positive session on the Black Mountain with this group of young men, we brought in a local environmental guy who facilitated a mountain and environmental awareness workshop with the group. They explored animals and nature that are around and the young men fully participated and were engaged with the session which they enjoyed.
Mountain Loney Young men	The group went back onto the Black Mountain area this week again to participate in another clean up and was breath taking that they all came back to do this from last week. The young men took great pride in their work from the previous week which sparked great conversations about how people misuse the area and participate in anti-social behaviour also. The young men are showing great maturity over the past few weeks.
Mountain Loney Young men	The main aim of this session was to make the young people aware of the face to face programme, discuss the proposed outcomes such as safety, resilience and looking after themselves. the young men were delighted that our staff could engage with them on a weekly basis face to face, they talked about what they would like to do, mainly to get out and about and talk.
Mountain Loney Young men	The young men participated in a mountain walk to get out and about the mountain safely, they tend to use the mountain negatively so we are trying to get them to act safely with the idea of being positive about their community and surroundings. This was a great activity as they only ever want to light a fire where this time they were taking in the sights and beauty around them. Great session.

Mountain Loney Young men	This group of young men have exceeded our expectations in this 6 week intervention programme. The change in attitude and adapting to more positive behaviours has been incredible. It just demonstrates that given some attention and effort put in with them showed them a worth in changing behaviour and outlook on how they present themselves in the community. A very positive piece of work especially that these young men want to register for our youth club.
North West Youth Forum SMYC	Meeting with young people in small groups to discuss issues they are facing. All agreed that mental health is something that they want to focus on and take part in a social action to promote positive mental health. All actively participated in discussions and showed great teamwork and communication skills. Only challenge is covid restrictions as it means we have to split the group into smaller groups so the whole group isn't actually together.
North West Youth Forum SMYC	The group continued the discussion about mental health and took part in an walking debate to learn more about it. They actively engaged in a discussion about why they chose to stand with their opinions in the walking debate and this encouraged a discussion about mental health and mental illness.
North West Youth Forum SMYC	The group were discussing positive mental health and how they can look after their mental health. We also discussed safe spaces and who they could talk to if they felt worried about their mental health. They were all actively engaged in the discussions and seemed to have enjoyed the session.
North West Youth Forum SMYC	Young people started to put together their ideas on how to raise awareness of mental health. Covid still causing a challenge as I have to split the group in 2, but the groupwork sessions are going well with everyone taking part in activities and discussions.
North West Youth Forum SMYC	Young people took part in a group work activity surrounding mental health and self esteem. They actively engaged in the activity and the discussions which followed. The young people were very mature and understanding during the conversations about self esteem and how it could have an impact on your mental health.
Ourstreets COVID video	the video is going well and we have our script done and looking to get the film started in the next week
Ourstreets COVID video	this a coming outa COVID video and is only starting
Period Positivity - Young Womens Committee	this programme continued on this week with the young people meeting in their own youth centre and linking in with each other via zoom. A really positive session this week with lots of meaningful conversations and it was evident during this session that the girls were starting to gel as a group and felt confident and comfortable sharing their experiences. there was a lot of excitement among the group for how we are moving forward and the girls cant wait to see the finished product of their hard work! the only challenge during this session was the internet connectivity during the zoom session sometimes dropping but the staff based at each club were able to lead the session when needed
Period Positivity - Young Womens Committee	This programme was previously being delivered through zoom and it was extremely difficult for the young people to engage and share their info and ideas which is why we moved to face to face delivery. the programme is one of high importance as this group of young people tackle an issue around period poverty and develop an educational tool to help young girls as they progress through their teenage years. The girls in this programme linked in with three other youth clubs via zoom but in their own centre they felt supported and confident to share their opinions and ideas. Tuesdays session was hugely successful with the girls making positive steps towards the creation of an educational resource as well as sharing their experiences with each other. I think a big success for me as part of this process was the fact that the girls were given a safe space to socialise during this pandemic, while at the same time taking part in a groupwork session which will benefit them and their peers across the city.
Period Positivity - Young Womens Committee	This session was the final one of this programme, it involved the evaluation and closing of the Period Positivity project. The girls were congratulated on all their hard work and efforts throughout the programme and were informed that this is only the start of rolling out the programme and that there is plans upcoming when restrictions ease.
Period Positivity - Young Womens Committee	This week we launched our programme and had a great international womens day. The young people launched their banner at free Derry walll and were accompanied by a number of key stakeholders as they launched their period positivity programme. They received excellent feedback and were all so proud of this event and programme On tuesday we held our evaluation session and it was clear that the young people had all increased in their confidence and self esteem as this programme progressed and it was lovely to listen to them chat and share their proudness and their experiences of the programme
Period Positivity - Young Womens Committee	this weeks session provided the young people with opportunities for further discussions on the topic of gender stereotypes and pressures and challenges faced by young women. it was an excellent session with great participation levels and the young people freely talked about how excited they are for the launch of their booklets in the next few weeks. we spoke to the young people about the launch of the Instagram page and sourcing info for this to be shared on international womens day and this will form the basis of next weeks session. the girls are starting to develop further within themselves and its lovely to see their confidence grow through this programme as they are more able to speak out and engage with the girls from the other groups too
Period Positivity - Young Womens Committee	Tonight's session was very positive with a lot of excitement from the young women's committees on the upcoming events for IWD The young people worked together to come up with ideas for IWD and they also identified inspirational Derry women to highlight on International Womens Day. The participation levels among the girls were excellent on Tuesday night and it was evident that the relationships between group members across the three clubs were strengthening. I am excited to build on this once restrictions are lifted and the groups can come together
Positive Minds	Discussed lockdown and the effects and our Pathway out of lockdown. We also discussed period poverty and how the EA is addressing this issue

Positive Minds	Only 2 girls attendeeds tonight's session. Young people and staff spent time discussing positive attitudes and 5 steps of wellbeing
Positive Minds	This programme has now finished. The young people involved in this intervention had meaningful conversations and discovered how to use coping techniques to relieve stress and anxiety. These young people are looking forward to returning to school and face to face youth work delivery
Small Grants Inclusion Mural	Young people were able to reconnect again with their peers in a safe way to carry out work on a Mural at the Centre. They have had issues with Anxiety, isolation and unhappiness. This session supported them to feel safe but also allowed them to participate in learning a new skill of Graffiti art, allowing them to gain a sense of achievement and contribution to the Youth Club. They were also given hope that the Centre will be opening again very soon and that they will be able to volunteer within programmes and activities. They will have further sessions to complete the Mural.
SMYC - Group 1	Young people who have been identified as having increased vulnerabilities have engaged in a first session exploring issues they are facing. Mental Health, stigmatisation and increased use of drugs and alcohol are among the main themes emerging from this first session. Informal conversations brought up fears around paramilitaries threatening action against some young people for throwing eggs at houses and we explored consequences of their behaviours on the community, themselves and their families and looked at positive ways to manage the restlessness and boredom they feel. We settled on a mental health programme exploring various themes and impact they have on mental health.
SMYC - Jan 25-31	Engaged with group regarding proposal for the group work.
SMYC - Jan 25-31	I have only been engaging with the targeted group to share information regarding planned group contact. This contact was to ensure that the young people are aware of the group details.
SMYC 8-14 Feb GW	I believe the intervention was a success as it got the young people actively engaged within the program, give them an understanding what is upcoming in the program and this allowed me to make any adjustments in the program to suit the young peoples needs. This sessions also allowed me to give the young people an insight into mental health and get an insight into how the young people are coping with the lockdown restrictions.
SSYCC- Step Out Project (Small group)	Today all the girls got to know each other through playing doing a check in activity of drawing out how we are feeling and telling a bit about ourselves which worked very well. The whole group was so excited to be doing a session together, we got some pizza and played some games of articulate which worked very well. We had some conversations about the pressures of today's life eg. tik tok etc and how our parents/ guardians felt about that. We are hoping to look at body confidence soon.
St Marys GW 2 FEB-MAR	The group give the give young people the chance to catch up and see how they are getting on during this pandemic and discuss any issues they may have had during the past week. The group intervention give the young people the opportunity to gain knowledge regarding the dangers of abusing substances like drink and drugs. This intervention give the young people a first hand experience of what these substances look like and the dangers of each of these substances.
St Marys GW 2 FEB-MAR	The group work intervention give the young people a safe space where they could express their feelings, how they are getting on and have discussions regarding substances like drink and drugs. This intervention allowed the young people to gain new information and refresh current knowledge on the potential dangers and risks of abusing substances like drink and drugs.
St Marys GW 2 FEB-MAR	The young people participated in group work session which allowed to explore and share their feelings and any difficulties which they faced during the past year whether they were related to the lockdown. This give the young people to get a chance to express how they felt and get an idea of possible coping strategies or stressors they could use to cope with how they are feeling. The young people also got an insight into the different factors that can affect their mental health and how to cope with these problems
Strathfoyle YC Small groupwork 1	5 out of the 6 group members attended tonight's session. The 5 group members participated well and I continued working on building relationships with these young people.
Strathfoyle YC Small groupwork 1	In tonight's session the young people participated in group work discussions based on A.S.B. that occurred within the area from the previous weekend. The group members participated well in all conversations and activities. All 6 group members attended tonight's session.
Strathfoyle YC Small groupwork 1	Introduction to the programme purpose. Aims and objectives and young people's/parents input. Successful session with group to continue next week.
Strathfoyle YC Small groupwork 1	Young people participated in group work discussions based on, community attitudes, A.S.B. within the community, positives and negatives in their community. The group participated well in all conversations and activities. Two members of the group didn't attend.
SYC Mon 1	Four young people arrived and initially they were all quiet, but when we started to chat they began to warm up and could not believe that they had the opportunity to choose what they wanted to do in the next coming weeks. These young people began to open up and use their voices to tell us how they are feeling and the difficulties that they were experiencing. They loved having the opportunity to be in an environment that they could call theirs.
SYC Mon 1	Young people worked together to create a timetable of activities that they would like to do over the next coming weeks. For this week they organised a football tournament, followed by a movie in the relaxation room.
SYC Mon 2	The young people enjoyed night based around what activities they had previously chosen. Tonight was a walk and talk followed by chocolate pizza making class and stone creation class. The young people walked, talked, baked, ate and enjoyed some good company
SYC Mon 2	Tonight's session was a huge success, kids made their own plans for future weeks ahead using their own voice and communicating with other young people. The plans include bikes, some baking- buns, park, smore kits, games in the sports hall, movie evening, slime and many more. Tonight the young people painted bird houses to display in the Colin area, tested out the new bikes in the centre and rotated games. The young people all

	<p>adhered to safety guidelines and kept hands clean.</p>
SYC Mon 2	<p>Young people made slime, had Mc Donald's and played hide and seek. They played together and got know each other a bit better. Young people of different age groups. Young people have planned their own activities each week and will lead by example when engaging.</p>
SYC Thurs 1	<p>Tonight, was the health and well-being group that me, Pauline and Anya take. Up to now the only young people that are turning up are Peter Turley and Patrick Campbell. The two young people have been benefiting greatly from the group. The confidence, self-esteem, leadership skills and personal and social development have all improved over the course of the group which is great to see. We discussed the topic of health and well-being as well as personal hygiene and how it is all linked together. After that we completed the cooking session were Peter and Patrick cooked chicken curry and a chocolate cake which turned out to be really nice and enjoyable.</p>
SYC Thurs 1	<p>Tonight, we completed the second week of group work within Saints Youth Club. This group is lead by the young people, they have spoke about what they want to learn about in the Health and Well-Being group i.e. Emotions, mental health, exercising, healthy eating, taking part in sports. We spend 30mins on the group work discussing, how to control your emotions when you feel overwhelmed and alone, The importance of social interaction and engagement with other people. We ordered pizza for the young people as this was what they planed for tonights session. They also took part in playing basketball and having fun again. Both young people discussed that they don't go out and all they do is spend most of their time in their bedrooms playing computer games or doing homework. They miss school and can't wait till they go back to get some sort of normality back.</p>
SYC Thurs 1	<p>Tonight's, session we focused on health issues, body image, how body image effects people's lives, learning outcomes , how to reduce the risk of illness. Peter and Patrick produced great work tonight and give great examples of positives and negatives of body image. How people see themselves and how other people see themselves. Both young people have improved their knowledge, self esteem and their confidence throughout the programme. Their social development skills have improved greatly and by tonight they were engaging in every activity and conversation that took place. Both young people said that they enjoyed the group very much and the company of the leaders that worked with them. This was great feedback and enjoyable programme to be part of as staff members. To see your work having an impact on the young people in a positive way is a motivational factor on its own. One of the main parts of the feedback was that the young people liked having a say and a part to play in designing the the group sessions.</p>
SYC WED 1	<p>I had been in touch with the YP giving homework support and also via zoom on social media, through talking to the YP and parents I was made aware of problems at home and issues with being with drawn having anxiety etc. The intervention has been warmly accepted and the first session was agreed before hand with the young people of making bird boxes and painting them. They agreed that art helps them relax and we talked about mindfulness colouring. The young people enjoyed hammering and painting as we talked together around issues that are challenged with. They came up with further ideas on how to release tension/anger and this will be built into the next session. We agreed on getting active, walking and talking, they also had a ride around the car park on the bikes and had fun doing this. They evening was fun and gave the safe space for the YP to be able to talk freely, where family life was the topic. The girls left smiling one commented that they were glad to be there and missed being at Saints. Tonight's session was a success.</p>
SYC WED 1	<p>The 4 young ladies were brought to Helens bay for a walk and talk and to collect stones to paint with positive messages as a project to leave around the area for others to find this will be completed next week. The girls appreciated getting away from the estate and relished in the opportunity to talk freely away form the stresses of life. the further we walked the more they talked and started really smiling and having fun. They talked about school, relationships with family some fears and some hopes. They seemed to bond as a group and were supportive of each other. This intervention do far has been a great success, although as trust has now been re-established I feel there is more work to be done and I hope to be able to continue working closely with this group.</p>
SYC WED 1	<p>This weeks intervention was successful in terms of the conversations that were had and support that was given. The girls worked on a project of painting stones with positive messages on them to leave around the area for other people/young people to see (Art Therapy). This environment allowed the girls to feel comfortable to open up about what has been happening in their lives. One young girl was quite upset she told her father she was bi-sexual and he told her it was un-natural and they havent spoke since. This allowed the other girls to open up about their relationships with their family. One girl had a traumatic experience that day with the PSNI storming her home looking for her uncle with guns who was then detained under the mental health act, there were pictures of her and her family taken by neighbours and put on facebook. This bespoke intervention allowed me to support the YP and to understand how she felt. This space was exactly what she needed. Another young person has health problems (heart) and has had surgeries etc in the past she told us she was so happy that it was a whole year from she has been in hospital, she then had the space to talk about her anxieties and fears around her health etc. Overall this session was an excellent platform for the young people to be supported and will continue to do so.</p>
SYC Wed 2	<p>I believe the young people are really benefiting from the group work every Wednesday. They are becoming more confidence in the engage and approach to the group activities. I feel that they are taking part because they have a say in the group activities and they are leading it. Tonight, we completed a part of the Health and well-being session and then moved on to cooking chicken curry and cake. This was a great activity the young people really enjoyed due to the feedback they gave. We then had a group conversation on how to design the young club. Idea's such as painting the railings having better lighting and bigger posters and signs to information the community were Saints youth club is based. There was fun and self - esteem building throughout the group sessions. Peter and Patrick have told the staff that they look forward to the sessions because they have designed the sessions and they feel so relaxed and conformable with the staff group that is working with them. I</p>

	<p>have also completed session plans for each night along with photos and work evidence gathered from each session.</p>
TYC/Group01	<p>Completed archery with young people, with support from Outdoor Education. Building relationships ongoing. Evident this week that the young people are more comfortable with staff and opening up about current challenges and difficulties relating to foster care / social services. Very successful session, with young people progressing as expected. One sibling from group unable to attend due to part time work. As this is in partnership with Social Services / Southern Trust, they will be stepping back within the next couple of weeks, due to young peoples progress with Youth Work staff member.</p>
TYC/Group01	<p>Initial plan was 3 siblings. One has now began working each Thursday so not in attendance. Very successful intervention session. Young women are developing positive relationships with staff (both myself and Task Project Worker) further each week, and trust is definitely building. Todays discussions were based around contact with parents - previously relayed disappointment in their Social Worker not allowing visit to father. Evident from conversation, background knowledge and pandemic that visits have been less to their parents this year. Young women display extreme resilience, and trust is building between young people and staff. Explored some issues today they were facing, with reference to care and their parents. Made macramé rainbows with young women, discussion based on mindfulness and importance of taking time to yourself to do something you enjoy. Task worker had conversation with myself about withdrawal of her role from the group.</p>
TYC/Group01	<p>Intervention in partnership with Social Services. Successes - As only the first week, there isn't a lot to identify as full successes. Young people very engaged in what was done with them. Making links with Outdoor Education Instructor for further work also. Challenges - one of the siblings was unable to attend due to work.</p>
TYC/Group01	<p>Session was positive, with good engagement from young people. Conversations still developing regarding social services / issues within foster care system. Resilience of these young people appears high, although it is evident that there are a lot of issues that these young people are currently facing and dealing with. Brother was in attendance today, which is rare now due to part time job.</p>
Women's Aid Outdoor Programme	<p>First session of this programme since Christmas Break and Lockdown. 3 out of the 5 young people targeted, attended. The programme consisted of checking in the young people on how they were doing/feeling in Lockdown. The young people are very young and they completed this exercise with ease. The young people were then tasked with walking together in the garden to point out leaves and the tutors picked them up for them and put them into their buckets. The young people were then tasked with making a card for someone special in their lives and decorating with the foliage they picked out in the garden. All through the session, staff used the time to talk, laugh and reinforce praise on the young people which was extremely well received yesterday. One young person who was reluctant to participate before Christmas (and at the start of the session yesterday) really came out of her shell, because she was kept busy with activities that she didn't associate with working together. This was a definite breakthrough for staff. This young person told me that she really liked living here (Women's Aid) and somehow again associates myself and Johnny as living "here too". Overall the one hour session went quickly with the young people talking about themselves and their mums with ease whilst making cards. Although there were only 3 young people present I would say that all 3 benefited from working together and spending time with young people in similar age.</p>
Women's Aid Outdoor Programme	<p>The aim of the programme is to work with a small group of young people who live on site at Women's Aid Secure Accommodation. The intervention involves working intensively with the young people in a group situation. The programme is designed so the young people can work together, in a safe and secure location. Peer play is very rewarding in this situation and the group allows the young people to have contact with each other and staff even in Lockdown. Yesterday the group did not complete outdoor work (in the garden) due to the weather being so cold. The young people stayed indoors and we worked on recognising how brilliant we are. Two of the young people struggled with the concept of telling others they are brilliant. One young person really struggled taking part in the team building game and had to be talked through the entire session. One positive of the session was the young person we made progress with last week continued to work very well this week.</p>
Women's Aid Outdoor Programme	<p>Today only one young person attended the programme at Women's Aid. Two staff sat with the young person waiting to see if the other members of the group were attending. Whilst waiting the staff members interacted with the young person on an activity of making paper aeroplanes. On asking the young person to make a paper aeroplane this caused crying and stress at being unable to achieve the folding of paper. This would happen in other tasks in other weeks of this programme with this young person. When it was clear that the rest of the group were not attending possibly due to mid term break. I took the decision to work one to one with this young person for the rest of the time in the session. I asked the male staff member to leave as I did not want to overwhelm the young girl with two staff as she was visibly upset. The room set up allowed for a one to one session with a Women's Aid member of staff in the room next door with both doors open. The session consisted of talking to the young girl whilst she coloured in, played kitchen, read some books, played follow the leader and flying paper aeroplanes. The young person did not talk at times, however would write her answers. I used the strength based approach in all of my interaction and nearing the end of the session the young person freely started talking. I have noticed she can get upset if she is unable to complete a task or answer a question. I will need to think in future how I approach my activities with this young person.</p>
	<p>Today was the last day of our Outdoor Intervention Programme. The programme consisted of working with a small group of young people living at Ashley Wood House & Mews due to Domestic Violence in their lives. The programme aimed to work with 5 young people from the outset however only 3 young people fully engaged in the programme weekly. Today one young person became very upset completing one of the outdoor tasks. The staff were able to work with the young person and continue with the session as planned. One other young person was able to provide some soothing help to the other young person during the session. Overall, the successes included those 3 young people attending weekly engaging on different levels each week. The</p>

<p>Women's Aid Outdoor Programme</p>	<p>challenges for staff was that we didn't know how each young person would engage until we got there, everchanging different moods of the young people could dictate the direction of each session delivered. However as the weeks went on the youth staff were able to recognise changes in mood, demeanour and poise and insert small changes into the session which still encouraged full participation of all young people. Full participation on the programme by all young people never happened; but the fact the young people came most weeks and gave it a try was just as good as full participation to us. Women's Aid Website: The impact of domestic abuse on children and young people states: " Are the effects the same for every child? Children can experience both short and long term cognitive, behavioural and emotional effects as a result of witnessing domestic abuse. Each child will respond differently to trauma and some may be resilient and not exhibit any negative effects. Children's responses to the trauma of witnessing domestic abuse may vary according to a multitude of factors including, but not limited to, age, race, sex and stage of development. It is equally important to remember that these responses may also be caused by something other than witnessing domestic abuse. Children are individuals and may respond to witnessing abuse in different ways. These are some of the effects described in a briefing by the Royal College of Psychiatrists (2004):</p> <ul style="list-style-type: none"> •They may become anxious or depressed •They may have difficulty sleeping •They have nightmares or flashbacks •They can be easily startled •They may complain of physical symptoms such as tummy aches and may start to wet their bed •They may have temper tantrums and problems with school •They may behave as though they are much younger than they are •They may become aggressive or they may internalise their distress and withdraw from other people •They may have a lowered sense of self-worth •Older children may begin to play truant, start to use alcohol or drugs, begin to self-harm by taking overdoses or cutting themselves or have an eating disorder <p>Children may also feel angry, guilty, insecure, alone, frightened, powerless or confused. They may have ambivalent feelings towards both the abuser and the non-abusing parent. " I could quite clearly see the insecurities in the young people and the need for further work to be implemented. As one programme finishes a new programme will begin.</p>
<p>Women's Aid Outdoor Programme</p>	<p>Today's session consisted of outdoor work in the garden of Women's Aid Gardens building bug/hedgehog houses/ hotels. One young person thoroughly enjoyed the session and took great delight in participating. One young person did not engage fully in the session. I knew upon arrival this young person looked slightly withdrawn and was not as chatty/confident as last week. However the young person stayed in the group and went outside. I found myself staying with her as she wasn't necessarily interested in taking part in the structured session she was interested in doing her own thing throwing sticks etc. I spoke with the young person throughout the session using praise and strength based talk. I tried my best to involve as much as possible the other young girl who was very positive in the session in all that I did, however this did prove difficult as the young person I was concentrating on can have her moments. I was very glad to have a second worker in Jonny as he was able to deliver the outside element, we both sort of worked well together with the two young people. I know two young people is a small amount of young people but yesterday it felt like a lot more of work. The young person has been on and off some weeks and after speaking with Women's Aid staff after the session, I was advised of the possible reasons for this type of behaviour. On the walk back to the centre a discussion took place between the two young people and one young person did not like the response of the other young person and basically stopped walking and reverted to staring into space. I tried to get the young person to move/walk for one or two moments and she would not budge. Her mum came to collect her and got us still outside the centre. Her mum told me she was ok and Women's Aid staff told me that she does this nearly becoming vacant in her demeanour.</p>
<p>WP- Bespoke Intervention Educational Needs</p>	<p>The initial response to the intervention has been positive. Six young people who were not engaging in their school work or currently engaging with the learning support offered online via zoom, were able to attend and participate effectively. This allowed young people to make the first step in reducing the stress and anxiety surrounding their school work and lack of engagement with their schools and teachers. Young people were provided with support and guidance and this initial session allowed us to evaluate where each young person was and what is required for them moving forward to enhance their education and reduce the impact of COVID/Lockdown on their potential academic achievements.</p>
<p>WP- Bespoke Intervention Educational Needs</p>	<p>young people who are currently struggling with both their educational needs and digital poverty are benefitting from additional support and help within the centre. These young people were not engaging with their online services with school. Over the last number of weeks they have begun to start to reengage with the school work online as they feel this added support has help them get on top of work that they have not been completing. This additional educational support is helping to combat educational underachievement amongst this group and alleviating added stress, pressures and anxieties they are currently feeling about falling behind in their work.</p>
<p>YES Learning & Achieving Programme 1</p>	<p>Initial meeting with group, both participants have been struggling with online school engagement and are at high risk of not achieving GCSE maths and english. I had already got them a place on the tutoring programme, however goal setting and coping with anxiety and negative thinking has been a barrier to their learning. Both girls are happy to continue to meet weekly to work on their confidence and positive thinking.</p>
<p>YES Learning & Achieving Programme 1.1</p>	<p>Goal setting session took place today, both girls are very behind with school work, they have now set realistic goals to complete between now and next week and will meet again on Tuesday to get support with the areas they are struggling with and help with organising and maximising their time in a quiet place.</p>
<p>YES Learning & Achieving Programme 1.1</p>	<p>Sessions are proving to be very useful for both girls, they have caught up on most of their missed work and are feeling much more motivated and confident in going back to school after the Easter break. Online support is continuing also outside the sessions to help with self esteem and goal settings.</p>
<p>YES Learning & Achieving Programme 1.1</p>	<p>This week was a walk and talk session as both girls had a number of stressful incidents with learning in the week previous, plans were made for key pieces of work that need to be completed and after online check in today both girls are on track and feeling motivated.</p>

YF GROUP 1	We did the first session of the programme where the young people got to engage with each other. We also set out the rules of group and made it clear to them that they are here to learn. We went over what we will be doing across the 6 weeks and went into description that will be included. The young people expressed their fears and expectations on the group and also express themselves on how they are feeling during this tough time that we are all going through. After the session all of the young people involved said that they were excited for the on coming weeks and that they were excited to learn the contents of the programme.
YF GROUP 2	At the start we done some games to get the group interacting with each other, then we went over the rules of the course. We then went over their fears and expectations and wrote them down and to finish up I asked them how they where feeling and getting on with the pandemic and the lockdown. the young people expressed how they were excited to get started in the learning and for the on coming weeks.
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	2 young people in secure accommodation for the next 4-5 weeks. They are not interested in online sessions. They have been reassured that they are welcome to attend Epicentre when they exit secure accommodation. The other young person has decided to leave the bespoke intervention and join Generic Provision from next week. Therefore, this Bespoke Intervention is closed.
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	No one turned up. Contacted social worker and she informed me that 2 of the young people are now in secure accommodation. Looking into starting online programmes with these 2 young people. The other young person did not show up, I contacted the mother but no reply.
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	No young people turned up this evening. One young person is still in secure accommodation. The other young person had been in hospital. The 3rd young person contacted me this evening to say she couldn't make it due to unforeseen circumstances. I will contact 2 of the young people for next weeks session. The young person in secure accommodation is keen to join the programme when she is out and I am in regular contact with her social worker.
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	Overall very good evening. 2 of the young people did not turn up. One is back in secure accommodation. The other was in hospital yesterday - informed by Social Worker today. The young person who did show up engaged positively in conversations while playing pool and chilling in the sensory room.

Group Programme Overview Issues Arising

SelectYourOriginalProposal_Label	GroupWorkResponse_IssuesArisingAsAResultOfIntervention
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Only one person turned up after quote on going and consistent communications and engagement by Gary.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	The ones who didnt take part in the project continued to drink outside the club each week, this is obvisouly a concern as it seems to be the norm now for these children and young people. The staff who were working on the BeSpoke did go out and we kept engaginw ith them in conversation making sure they were ok and reassurring them that if they needed us that we were there to help them. We also continue to tell them on a daily baisis they could still take part in the programme as long as they werent drinking. This is something we will continue to work on even though the group is over as there is a need for support for them individuals.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	The rest of the group are not getting them same kind of experience that the one individual is getting, they continue to drink outside the centre. Myself and other staff do go out and talkwith them and maybe this is where they are at personally so by us talking to them maybe they are getting something from the interactions, but we will continue to engage outside as well as with the one member inside.
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	the rest of the group who arent engaging are telling us they want to take part but then they arent turning up. They are drinking outside of the centre which is an issue, myself and another staff memeber are engaging with them outside.
Addressing needs of vulnerable young people through street based response.	no issues
Addressing needs of vulnerable young people through street based response.	No issues arising as a result of the intervention
Addressing needs of vulnerable young people through street based response.	No issues arising from tonight session.
Addressing needs of vulnerable young people through street based response.	No issues arising in the intervention.
Addressing needs of vulnerable young people through street based response.	No issues arising within interventions
Addressing needs of vulnerable young people through street based response.	No issues arising.
Addressing needs of vulnerable young people through street based response.	No issues raise during the intervention
Addressing needs of vulnerable young people through street based response.	No issues raised during the intervention.
Addressing needs of vulnerable young people through street based response.	Young people are aware of dangers, aware of the relationships with community members and increased pressures on other community services.
All Together Now	Four of the group members are going to be using the skills they learnt to run their activites for other young people both remotely and in person. An individual follow up is needed with the young person who didn't attend.
All Together Now	Group are planning to run a mental health event in September
All Together Now	Group will organise a mental health event in September
Ardoyne Bespoke Intervention	Young people didn't see some of their behaviour as ASB. Young people felt they were being targeted by some of the community when they were just standing talking in the park. Young people struggling with isolation and family life, being at home all day
Ballyarnett Family Support	N/A
Belvoir ASD Group	N/a
Belvoir Young Men	Following the success of last weeks programme staff contacted parents this week as a reminder for young men to attend, one parent raised a concern around young people being in the building therefore this had a knock on effect on the other males that would have attended. I informed the parent of the process and risk assessment in place to mitigate risk in risk to covid and the nightly procedures etc. This lessened the parents anxieties however she stated that her son would not be in attendance tonight however would be in attendance next week.
Belvoir Young Men	N/a
Bouncing Back	A possible 1:1 which will be referred through our team, young woman expressed she needs extra support

	through mentoring.
Bouncing Back	N/A
Clonard Young Men	n/a
Clonard Young Men	The young men are engaged in risk taking behaviour. Some of the young men have also spoke briefly about the effect of lockdown on their mental health, they have also brought to our attention that a few of them have either lost family members due to covid or have family members still unwell due to the long term effects of the illness.
Employability Programme	young people understand that there will be high numbers of people applying for the posts and have arranged further employability sessions with staff to apply for jobs and develop they employability skills.
ESCAPE Project - EA Community LYNC	After the events of Thursday night (see incident report form for details) we made contact with the young people a few hours later to ensure they were ok and to talk through the events of earlier that night. The young people were all ok then after receiving reassurance that the situation was under control and were happy enough that we will complete a debrief with them at our next session. This week was a much more positive week for time keeping and attendance with full numbers turning up for both sessions - this is something we will highlight to the young people as a positive and hopefully something we can keep going with next week!
ESCAPE Project - EA Community LYNC	There have been some behavioural issues within the group which have resulted in us having to change our methods used with the group. It has become apparent that we need to do a lot of ground work with the group before we begin the process of formal qualifications such as their OCN. The use of the acceptable behaviour contract which was completed is proving to be a useful tool to keep referring back to as the young people compiled this themselves. The young people have different levels of concentration and attention span is very limited which has meant that we have had to speak with the company providing the training programme, to ensure the dynamics of the group are taken in to consideration. We will continue to monitor this over the coming weeks to ensure we are effectively meeting our programme outcomes. One young persons parent called to us this week to inform us that her son has only just this week received a formal diagnosis of ADHD which he is finding hard to accept. We will address this with the young person through our weekly individual chat with the young person which happens during the break time of every Tuesday night. Through this conversation we hope to identify any areas of support we can offer which may result in the young person being referred to external services or availing of one to one support.
ESCAPE Project - EA Community LYNCS	hold one to one supervision more regularly moving forward - this is a good tool for keeping young people engaged and ensuring maximum outputs for the programme
ESCAPE Project - EA Community LYNCS	one to one meeting with each young people to revisit ABC and look at their levels of participation on programme
ESCAPE Project - EA Community LYNCS	relationships continue to strengthen - over next few weeks we are going to start conversations around bonfires with the boys and ways to move forward as we approach the summer months
ESCAPE Project - EA Community LYNCS	some young people asked us for support in setting up bank accounts - will follow up this next week
ESCAPE Project - EA Community LYNCS	This week it was apparent that we had to adapt some of our methodologies to suit the needs of the group - the boys will not engage in group work or training processes which arent interactive and so we had to re-look at the way in which the thursday night training programme moves forward. Obviously the Covid pandemic means that its harder to facilitate this programme and we are relying on zoom links which proves difficult in itself, so we will keep this under review and look at alternative ways of working.
Gambling Awareness and Support Programme	Young people are homeschooling with no adult present and are really struggling also some disclosures around parents using alcohol which is impacting home schooling also
GDI Group 1	have had to turn away two young people who turned up to their session after drinking, will be discussing this with them in Fridays session
GDI Group 1	no issue getting them into the centre on Monday night but have a feeling tonight's session might be more difficult as this is the night they would usually be out drinking. Will follow up on next week's report
GDI Group 1	number of young people gathering midweek has reduced and less complaints from residents during week 11 of the yp who engaged really well and completed their sessions feel they are now better equipped for issues arising from the risk taking behaviours they and their peers have been participating in and are also now more aware of the issues these behaviours pose to their community. The group sessions were purposely run during times when their peer group would normally partake in risk taking behaviours (underage drinking/drug use) in Cregganburn park and as a result the gathering was much less and there were less complaints than normal from residents.
GDI group 1&2	
Goal Line's Families in Crisis	no
Goal Line's Families in Crisis	none
Goal Line's Families in Crisis	ongoing liaison with the SHSCT providing the right support for those families in crisis. The young people have indicated what activities they would like to do next week.
GRD Project	N/A
GRD Project	No
GRD Project	Young people are frustrated and unable to manage emotions and feeling at home in community
Group Work START 1	Further two week programme to tackle consent and relationships.
Group Work START 1	No Issues
Group Work START 1	No issues from the group work after these first engagements/needs assessment I will now go and adapt this developmental programme to suit the needs of the targeted group of young people.
Groupwork	Covid restrictions are still frustrating for staff and young people as it limits and affects the activities that can be carried out.

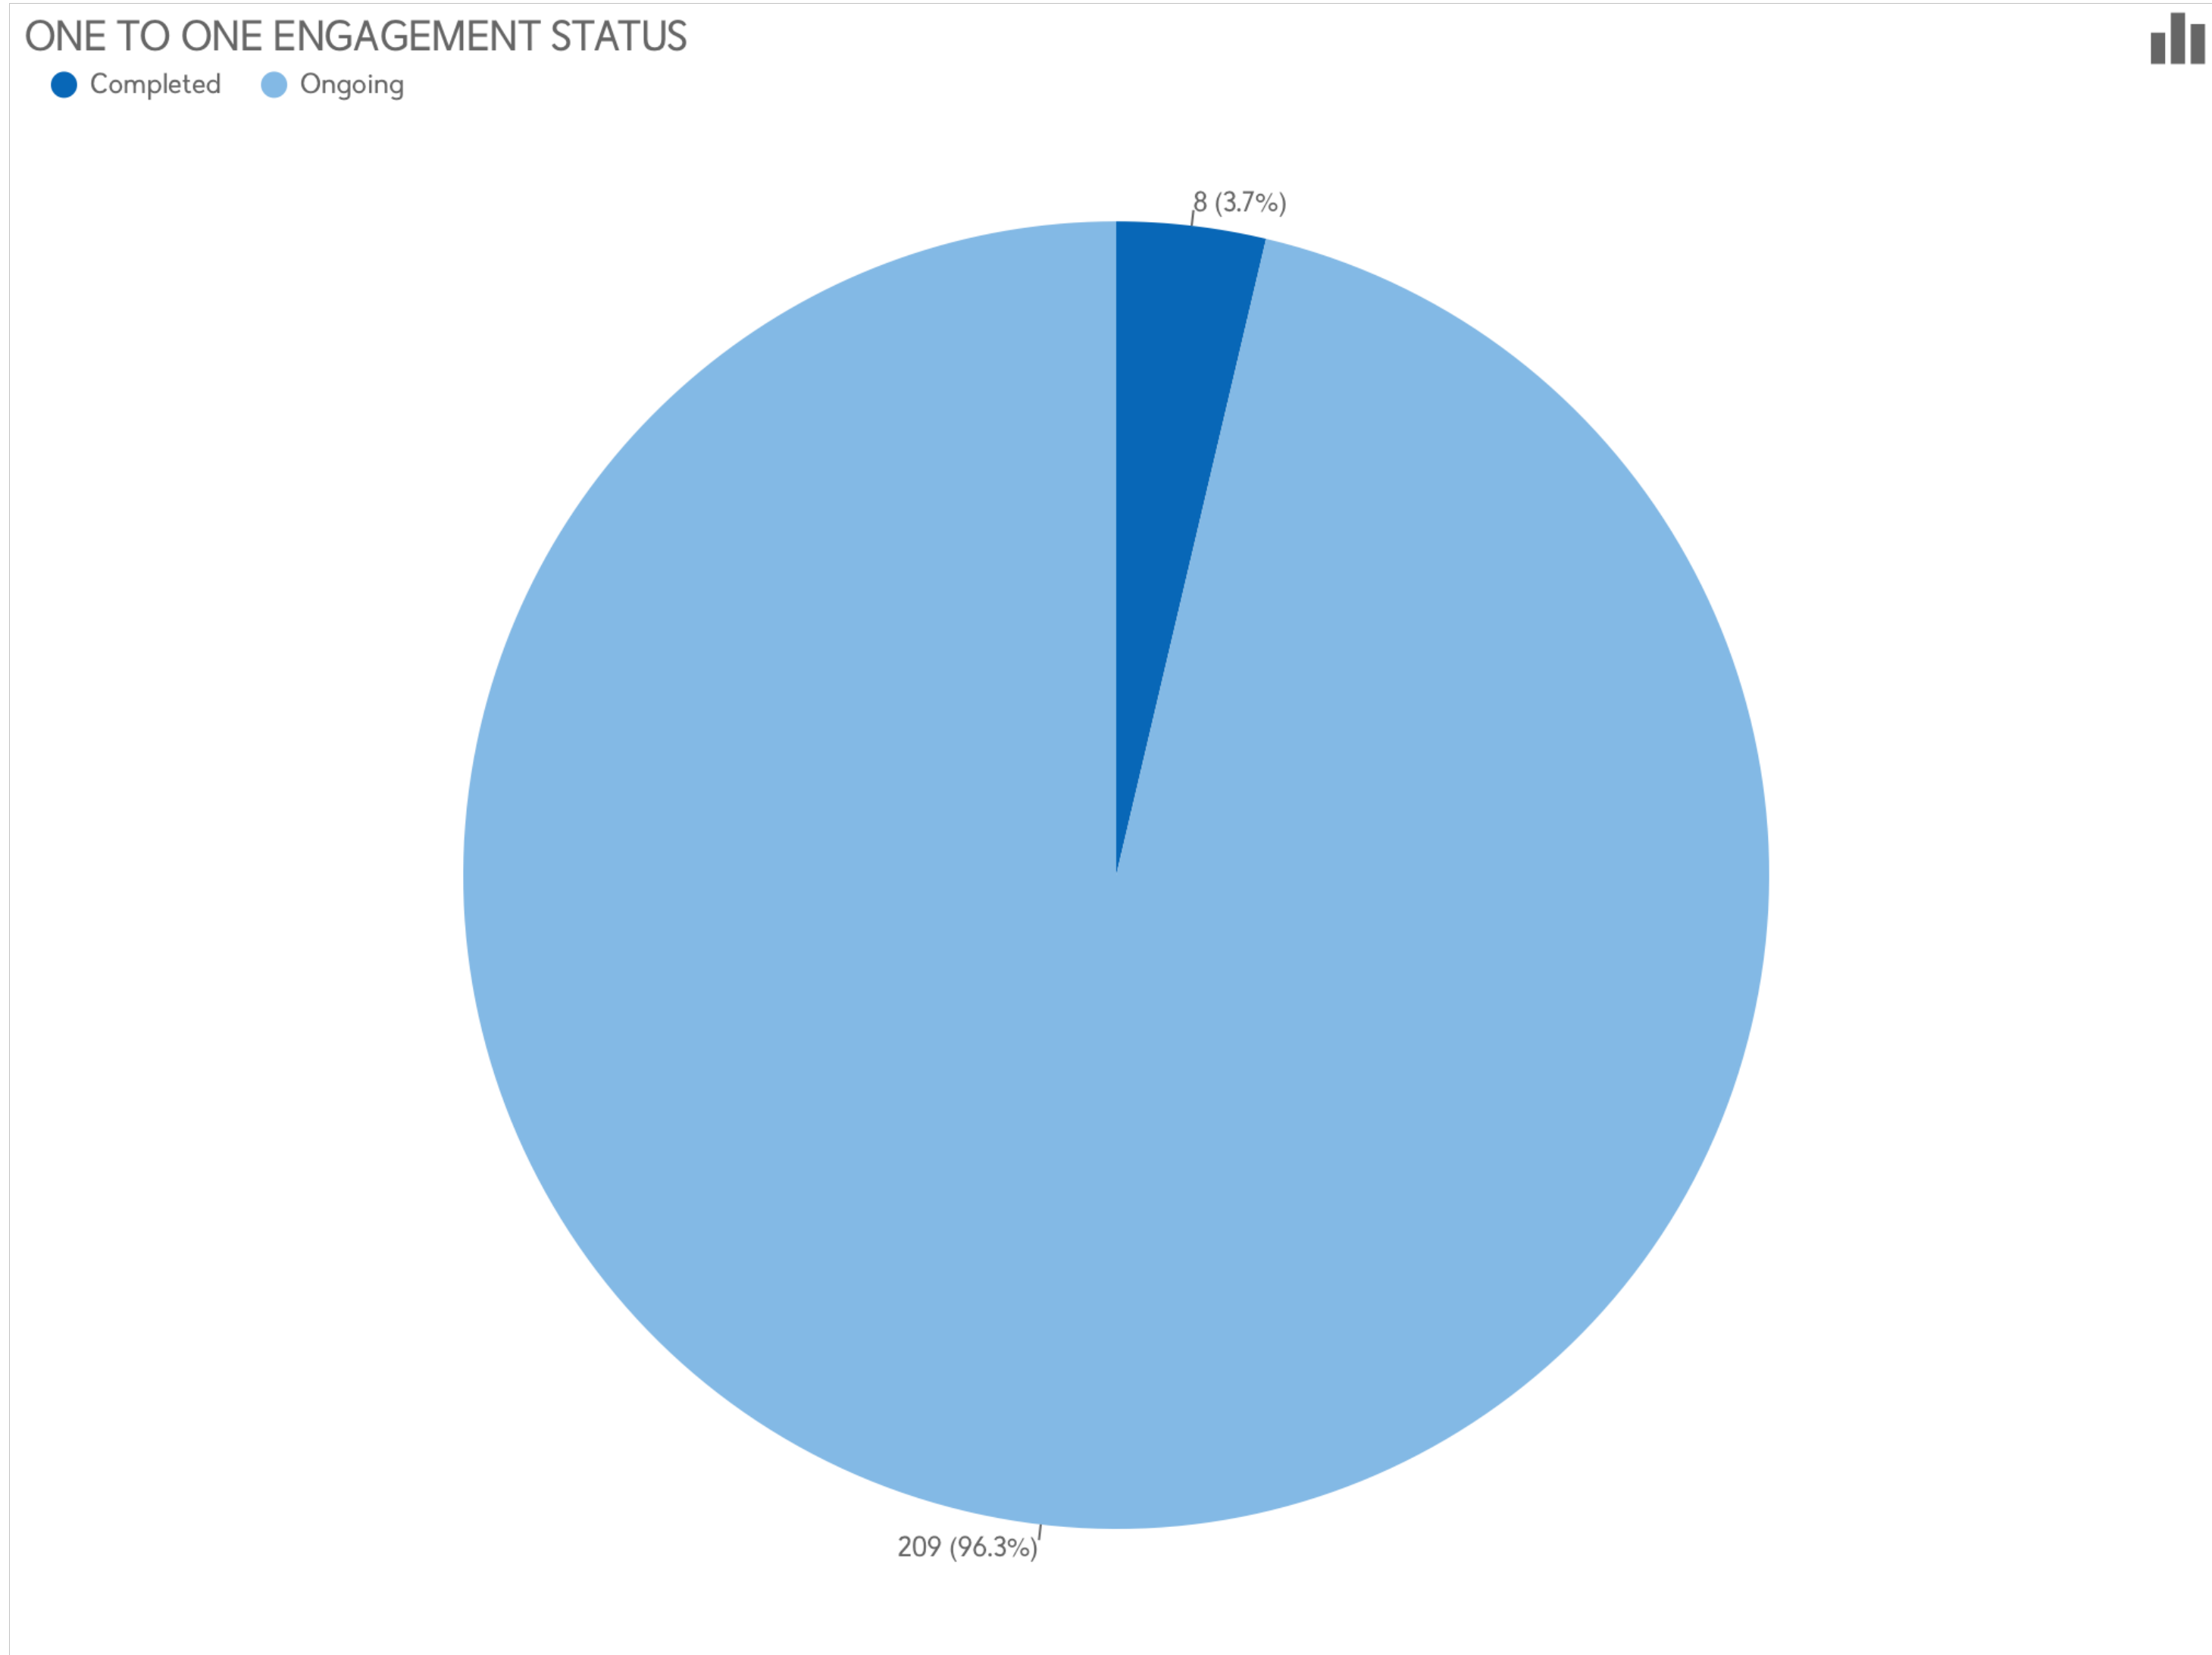

Groupwork	No
Groupwork	The current restrictions of COVID-19 are frustrating as they are limiting the activities that the group can participate in.
Groupwork	We have engaged some of the young people through street work and have moved them to small group work to help them identify and better deal with some of the vulnerabilities and consequences of their decision making. We have also continued to engage small groups of young people who we have identified as vulnerable and at risk prior to the covid lockdown. These young people were already engaged in targeted interventions due to their vulnerabilities.
Groupwork - CNP	Time was taken to try talk through the young peoples issues which meant that the sessions didn't go as planned. The uneasy tension amongst the group made it very hard for the young people to participate.
GWBYC	N/A
GWBYC	Young people saying they are participating in anti community and risk taking behaviour due to boredom and a lack of facilities
GWBYC1	NA
JPIIYC GROUP WORK RESPONSE	The group found it hard to interact in a group work setting, they were not comfortable to open up, however by changing are approach and using "Art" as the tool to open communication the group become more trusting and open up a then we were able to discuss issues that were concerning the young people. The young people lead the discuss and we followed their lead.
JPIIYC GROUP WORK RESPONSE	Young males, still defending their behaviour as not ASB, and the need for them to get out of their homes, as they feel as if they have been grounded for year
Kilcooley Intermediates	- Fall out between young people within group may cause a potential issue. Staff team to pay close attention.
Kilcooley Intermediates	Young people opening up, still issues between one another which needs to be followed up in next few weeks. Definitely a need to continue further weeks.
Larry 1	Good contact with this individual to give ongoing support when required. There is potential for this young person to pursue youth work - young people linked training opportunities in the future. This is aspiration he has mention in the past.
Larry 1	N/A The young person completed his creative visual arts design as part of the B42Now Youth Health & Wellbeing Project the perious week. He has now moved on to other priorities in his life. I will be a link for this young person for the foreseeable future, if he decides to reengage in youth work provision.
Larry 1	None
Larry 1	The young person is doing well has completed exams linked to school. I keep in touch with this young person by texts and short conversations through his Father's mobile contact number. He is more settled now.
Lets Reconnect-Inclusion	Young people and parents highlighted the need for and importance of these days and we hope to involve the group in The John Muir award after Easter.
Lets talk newry	young people struggle with the simplest of instructions and there is a dog eat dog mindset with in the group with constant slagging , name calling and play fighting taking place. young people all openly talk about their use of cannabis and alcohol consumption at the weekends. all young people feel like they are labelled as trouble makers within their own community and seem to try and live up to this amongst themselves often referring to one another as hoods .
Live Learning	issue of having access to appropiate ict equipment to compete some elements of the educational process
LYNC community	No
LYNC community	No issue, I will be encouraging young people to engage in a possible 1-1 with staff and avail of the support services available.
LYNC community	No issues very positive session
LYNC community	No issues, Young people struggle with the writing aspect of the OCN in Law and order but this is something we are working on together and looking at alternatives to this.
LYNC community	No, Covid is a recurring problem and adapting our services to this is difficult.
LYNC Ourstreets	as a result young people are working within the community
LYNC Ourstreets	N/A
LYNC Ourstreets	no issues
LYNC Ourstreets	no issues this week group engaged well and seem keen
LYNC Ourstreets	no main issues in the group. young people appear to keen on the group and wanted to know the structure and what was involved in the project. I told them about the project. am I looking forward to the rest of the project and seeing where it goes and hoping the young people learn from the project and gain life skills and get ready for future employment.
LYNC Ourstreets	spoke to one young person about the how they ae behaving outside the group
LYNC Ourstreets	Young people's OCN level 1 Law and Order will be assessed and by the end of this programme they will have a completed and up to date CV.
Men's Health Ourstreets	n/a
Men's Health Ourstreets	no
Men's Health Ourstreets	no issues to report
Men's Health Ourstreets	no issues
Men's Health Ourstreets	no issues this week
Men's Health Ourstreets	no main issues other the group not being well with chest infections one young person was waiting on results from a covid test. I will speak with ou=ther workers and see how its best moving forward to help improve the health and wellbeing of the young people

Men's Health Ourstreets	there was an issue happened on Monday night with the two of the and I had to speak to them about there behaviour and how they are employed and cant be behaving like this. the group went and got plenty of conversation around crime and why young people get involved. some young people it just rolled of the tongue for others it was more difficult. group gelling together well.
Men's Health Ourstreets	we have changed the session to meet the needs of the group
Men's Health Ourstreets	well young people are moving on with their lives some as result of engagement with Ourstreets. we will be recruiting new members to get the group up and running again.
MINDFIT	Contact made with facilitator and meeting held with youth work staff. Contact was also made to Youth Justice Agency who had referred one of the young people to the project. Youth worker-in-charge will arrange meeting with line manager to discuss future delivery of project.
MINDFIT	Non- attendance/no participation - programme to be reviewed. Senior Youth worker informed,
MINDFIT	Non-attendance
MINDFIT	One of the young people (referred to the project through YJA) did not attend. I was contacted by his parent 10 mins before session commenced to let me know he was "not in the best of form". I have informed my contact at YJA of his non-attendance. Staff will maintain contact with his mu m to encourage him to participate in future sessions.
Mountain Loney Young men	N/A
Mountain Loney Young men	No main issues, only residents asking what the staff were doing with these young people, as the have been causes some mayhem in the area. However residents happy they are being worked with.
North West Youth Forum SMYC	none
North West Youth Forum SMYC	None
Ourstreets COVID video	No issues
Ourstreets COVID video	no issues arising
Period Positivity - Young Womens Committee	for next weeks session we have told the girls that we will show them their work in progress so we need to work now to have a copy of the booklet and video for the girls to see before we launch it to the youth service :-)
Period Positivity - Young Womens Committee	The young people were all told of the plans for IWD - Free Derry Wall launch - 1pm St Marys YC - 1.15PM Youth staff will meet together on Friday to finalise plans
Period Positivity - Young Womens Committee	think of ideas for insta page - remind the girls of this prior to next weeks session
Period Positivity - Young Womens Committee	this intervention worked so much better face to face and meant that we fully met our outcomes for Tuesdays session - as a result of this we were able to speak to the girls about the creation of other resources such as videos and support the girls as they worked these issues and ideas through. I am hoping to build on these successes over the next few weeks so the girls feel confident and proud of their achievements Ideally it would be great to have all four youth clubs together in one big space but given the current circumstances, linking in to each other via zoom from our own centres is a much better alternative
Period Positivity - Young Womens Committee	we now need to launch a cognito form to enable people to register for the period positivity programme so they can avail of the resources
Period Positivity - Young Womens Committee	Young women involved will help deliver the boxes and sanitary products to local youth clubs in the upcoming week.
Positive Minds	None
Small Grants Inclusion Mural	None
SMYC - Group 1	Concerns around general mental health of the young people Street teams moving forward will cover a larger area of Creggan where identified needs has emerged and will remain visably present for longer periods.
SMYC - Jan 25-31	N/A
SMYC 8-14 Feb GW	N/A
St Marys GW 2 FEB-MAR	N/A
Strathfoyle YC Small groupwork 1	Broken relationships with members of the community Policing team and community organisations. Future Actions - to increase opportunities for the young people to build relationships with those stated above.
Strathfoyle YC Small groupwork 1	None
Strathfoyle YC Small groupwork 1	None in tonight's session.
Strathfoyle YC Small groupwork 1	Young people expressed anger at the use of social media by adults and organisations within the area who they feel has been putting them down. Our next session will focus on this.
SYC Mon 1	No issues at present.
SYC Mon 1	No issues have arrived yet. Further developing the power of their voices will be encouraged.
SYC Mon 2	No issues
SYC Mon 2	No issues on the first week. Young people are getting to know eachother and developing friendships.
SYC Mon 2	None
SYC Thurs 1	None
SYC Thurs 1	Out of the 4 young people only two of them turned up. We made contact with the two other young people who said that they were out and make it round to the club tonight. We asked them if they wanted to be removed from the group to give another two people the opportunity to attend the group. They said no and that they would be at the group starting from next Thursday which is 11/03/21. They were given another opportunity to attend the group so that we can work with them.
SYC WED 1	Just that it is vital to continue supporting these young ladies as they are presenting with a lot of emotional issue.
SYC WED 1	No

SYC Wed 2	Declan and Ordhan did not turn up again for the session. I will discuss with Cuan do we change and look for other young people or do we work with Peter and Patrick who are benefiting greatly from the sessions. I cannot express the change in the young people from the start of the sessions till now. It is so rewarding to see.
TYC/Group01	No issues arising as a result of intervention.
TYC/Group01	No issues arising as a result of intervention. Will discuss with line manager a transfer of the provision for these young people to a centre more suited to them, in terms of age and location.
TYC/Group01	No issues arose
TYC/Group01	One of the siblings disclosed to us that she had unofficial / unknown to social services, visit to her mother, whom she can only have supervised visits with normally. Told us that social worker already knew as foster carer had told her. Task worker will pass on again, just to ensure the young people can remain as safe as possible. Next week is the last week of this bespoke outdoor intervention and through discussions with Women's Aid we feel that two of the young people in this group would benefit from a short one to one session with me. Women's Aid will provide some workers to keep the young people in the creche facilities for half an hour whilst one young person will have half an hour session with myself and vice versa.
Women's Aid Outdoor Programme	Only Positive Issues with the one young person participating who didn't fully participate before Christmas and all young people given the opportunity to leave their residences and work with us in a safe and secure environment.
Women's Aid Outdoor Programme	Positive Issues, the young people still continue to attend the programme, even though participation levels vary during the sessions from week to week. young people continue to build relationships with staff during the programmes staff continue to build relationships with staff onsite at Women's Aid
Women's Aid Outdoor Programme	The need for further one to one work in this programme has submitted and approved. The next programme will focus on working with two young people separately. This will allow for 100% attention to be given to the young person and allow encouragement of their best self.
Women's Aid Outdoor Programme	Today's planned session did not take place due to low numbers. However I changed the session to make a one to one as I did not feel it would benefit this young person to cancel the session especially as she was upset. I informed her mum after the session out of earshot of the young person that she was upset at the beginning of the session.
WP- Bespoke Intervention Educational Needs	no current issues but an awareness raised of digital poverty among young people throughout the area.
WP- Bespoke Intervention Educational Needs	No issues currently arising. Educational underachievement and needs being facilitated for throughout this specific intervention.
YES Learning & Achieving Programme 1	None
YES Learning & Achieving Programme 1.1	none
YES Learning & Achieving Programme 1.1	None
YF GROUP 2	none
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	-
YIPPEE (Youth Intervention Programme Providing Evening Engagment)	The young person is very demotivated and socially isolated due to the current lockdown which is something we will continue to work on.
YMCAPERIODPOVERTY	lack of self-confidence and support within the school. Aim to work in a future session on coping strategies when feeling anxious in school and offering on going support for young people during the lockdown period. Young women expressed a lack of space for them to go and talk to someone due to being at home.
Young ladies seeking support	The response after this intervention was phenomenal and rewarding in regards to how much the group required this special intervention. We will monitor any progress or indeed arising issues/concerns moving forward and hope that the wellbeing and mindfulness activities will help support these young people and their peers to a position of strength again. No child protection issues were noted but will be reviewed as we move forward.

(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	
(MUSIC) Music Unlocking Selfexpression Intelligence Creativity	Again only one member turned up, this week he turned up 15 min early for the session. He came in with such a different attitude and was more positive and confident in himself and his ability. He was able to engage better and shown a great interest in the work the DJ was doing with him.
1 to 1	the young person is currently dealing with some of the struggles that come along with being a young parent, they also have issues ongoing within their extended family and this is having a negative affect on their mental health. Throughout this process the young woman has been exploring her negative feelings and developing the necessary skills to cope with them.
1 to 1	The young person opened up about their worries including school work and family relationships. They were able to express their feelings and fears and we came up with positive solutions. The young person spoke about their friendships and the strains of them.
1 to 1	This week the young person expressed how she was feeling and spoke about having a few arguments with their family. Spoke about the stresses of school and uncompleted work adding to the tensions.
1 to 1	Throughout the one to one we discussed some of the issues that are affecting her on a daily basis including feelings around low self-esteem and stress due to her A-level school work and the difficulties that is presenting for her due to having a young baby, we also spoke about certain coping skills to help manage these feelings.
1 to 1	We have come up with solutions to overcome work load, coping mechanisms when tensions are high in the house within the family and ways of helping or reducing their anxiety.
1 to 1	We spoke about anxiety this week. They felt extremely anxious this week due to schoolwork stress and relationship issues with friends.
1 to 1	young people looking at kitchen skills, money management and independent living using worksheets and activities in the kitchen area.
1-1 START M	I feel her vulnerability has increased due to the lack of support from other services because of the current COVID restrictions. From the most recent weeks I have assessed that this young person needs continued support through our 1-1 service with myself. Throughout our sessions we have tackled many issues affecting her normal day to day life. We've been exploring mindfulness in ways she can use in relation to her panic attacks. Due to the recent events in Creggan the feeling of being unsafe in her community has increased due to the shootings. We will be focusing on developmental work during our sessions next week were we will be creating vision boards which will aim to enhance her aspirations and goals.
1-1 START M	This weeks one to one sessions have been very positive/ productive. We had our walk around the creggan country park as this encourages her to be more descriptive when explaining how she has been. We have new focuses of development this week as new issues have rose within our session. Sexual Health, Drugs and alcohol workshops which we will do together next week.
1-1 START M	This weeks one to one support focused on encouraging young person to attend ETA and her counselling session. We have had conversations around the importance of self care and looking after herself. There have been some issues around family breakdowns. Sleep issues
1-1 START M	Young person is part of START core group we have many success this week during our 1-1 sessions she has presented many challenges also with her sleep, and not attending her NSPCC counselling. On Monday she had a review meeting with her school to see if she would like to increase her involvement, she is attending the tutoring provided by ETA. During this review session they had brought up past trauma which was one of the reasons she had left school in the beginning. This through her off immediately and she did not want to engage in the meeting after so therefore I spoke on her behalf. This is something we had discussed during our session after and how this has had a negative ripple effect on her week affecting her sleep, eating, mood and motivation to get up and out of the house. Her actually coming down to have these sessions with me was great and she was very honest which was a huge success for her personally.
1-2-1 support	Listening ear. Examining issues client is facing at home and within the community
1-2-1 support	Session 1: YP taken for ice-cream and brought back to centre - chatted about their day and school experiences, played a board game (social distancing) and used Nintendo Switch Session 2: YP taken for ice-cream and brought back to centre - filled in Action Plan booklet about goals for future as well as booklet about how they see themselves. Played Nintendo Switch to finish the session
116086	intervention did not take place as staff member was on annual leave
116086	The session provided a safe space for YP to discuss any issues she is regarding her mental health. The Yp expressed her relief that she was able to share how is she is feeling and how things have been for her.
116086	Yp attended one to one intervention to address issues with anxiety and self-esteem.
198651	intervention did not take place as staff member was on annual leave
198651	One to one intervention was used to address issues with anxiety, self-esteem and social isolation
198651	Provided yp with a safe space to discuss ongoing issues with mental health.
198651	Used One to one intervention to address issues with anxiety and social isolation with young person.
198651	Used one to one intervention to help address issues with anxiety and isolation.

198651	Yp attended one to one intervention to address issues with anxiety and social isolation.
199164	intervention did not take place as staff member was on annual leave
199164	Yp did not attend
199164	yp unable to attend
199164	Yp was unable to attend.
199179	intervention did not take place as staff member was on annual leave
199179	one to one intervention used to support young person with issues around anxiety, self-esteem and social isolation.
199179	One to one intervention used to support yp with issues with anxiety, social isolation and self-esteem
199179	The YP attended session and was provided a safe space to discuss any issues she was experiencing. This was a positive step for her as she will not leave the house or even her room normally and will speak to anybody at home about her daily struggles.
199179	Yp attended one to one intervention to address issues with anxiety and self-esteem.
199179	Yp attended one to one intervention to address issues with anxiety and social isolation.
199217	young person did not attend
81060	intervention did not take place as staff member was on annual leave
81060	one to one intervention provided to support young person with self-esteem and confidence issues.
81060	Yp attended one to one intervention for support with anxiety and self-esteem issues.
81060	Yp attended one to one intervention to address issues with anxiety, social isolation and goal setting.
81060	Yp attended session and had a safe space to discuss her mental health concerns. Yp expressed gratitude at having the opportunity to attend session.
81060	yp did not attend

<p>Employability Programme</p>	<p>During employability session staff checked in with young person regarding their amount of usage of cannabis, young person said they have struggling getting to sleep without smoking cannabis staff provided young person with relaxation techniques and used auricular acupuncture seeds to help them sleep better. Although young person has said they are feeling a lot better and more confident in themselves, young person continued applying for more jobs.</p>
<p>Employability Programme</p>	<p>This employability Session is in repose to a growing number of young people becoming dis-connected and dis-engaged from formal education and employability opportunities due to the impact of COVID19 This session was arranged flowing a number of remote engagements focusing on this individual's life journey and lack of motivation to re-engage with educational opportunities, Following a number of constructive discussions exploring the young persons talents, skills and educational achievements we began to examine what field or what is the best avenue to peruse that meets the YP s needs and aspirations for education and employment. The young person decided that they would like to re-engage with a higher level of education with Belfast metropolitan college studying a level 4 qualification in Health and Social Care. We developed a number of actions to be completed during the session. -Research the BMC website for the course content and requirements -Ensure that the YP meets the criteria for application -Review current educational achievement portfolio -Create a application -Create a personal statement -create a Reference data base -ADD current qualifications to application -Finalise and Submit Application This session was highly effective in enabling a YP to re-connect with education in higher platform and develop life and work skills I'n the form of new understanding and skills in relation to creating and completing formal application. I have arranged a follow up session with the young person if/when they have received corposndence</p>
<p>Employability Programme</p>	<p>This session was in response to young peoples employability needs, Young person contacted staff to arrange a meeting to develop employability skills and documents and gain support in applying for suitable employment, The Staff member arranged the session and ensure that all PHA Guidelines were followed during contact, The staff member developed a CV template to support the YP in creating tailored CV document that best reflects the strengths and experience of the YP.] The Staff generated a conversation with the YP about Employment motivation and fields of employment best suitable to the YP abilities, Following the CV development session the Youth worker in partnership with the YP signed up the YP to job agencies of his choice, We then identified potential employment opportunities on Job websites and applied, The YP suggested that his mental health was being impacted due to having 'Nothing to get out of bed for" so this engagement was part of enabling a YP to have motivation and make contributions to his community and society while improving emotional well-being, In Total the YP submitted 5 job applications and signed up too 2 agency websites, The YP have good feedback to the staff and commented that "I wouldn't of been able to do it with out the club, I wouldn't have a clue" Staff recognised this as a improvement in capacity and ability to physically complete job applications. Challenges included the PHA guidelines, it was difficult to communicate interpersonally when engaging in the session activity or in meaningful conversation, Although these guidelines are essential and will be continually implemented</p>
<p>Employability Programme</p>	<p>This Young person made contact with the Youth Centre reaching out for support, We had previously supported this Young person to gain part- time employment in the health service, This young person maintained contact and staff reached out top check in the previous lockdown and this lockdown, The YP was struggling to cope with working in the very intense situations in the RVH and was struggling with personal issues at home and within the peer group, The YP suggested that he felt "melted" and that he "Dosent really care anymore" Staff arranged a meeting ensuring all PHA guidelines were implemented Staff provided some take out and disposable refreshments for the session as the YP disclosed that he hasn't eaten or had a appetite for almost 2 days, This Was to encourage the YP to eat and drink something to provide some nourishment. The staff member generated a conversation that encouraged the YP to identify his main stressors and at what point during his day to day do they become so stressful that he can not cope or manage them. He Identified: Work; When he sees people who have died being rolled and wheeled by him and when he is under increased pressure during the pandemic because they are very short staffed Home: He feels under pressure in the house due to the recent bereavement of his grandfather, The YP and the family are struggling to come to terms to the passing, Peers: This YP feels like he is loosing his friends as he is working and moving on into adulthood In summary the YP felt disconnected, Frustrated and worried. The staff member encouraged the YP to think about his circle of control, the staff member explained the concept, the staff member encouraged the YP to apply this to his stresses Everything within his control such as his attitude, behaviour and decision making is what difference he can make to these situation and use this as a technique to rationalise the situations, The</p>

discussion evolved into developing strategies to reduce stress when he feels like he can take no more such as some mindfulness techniques: Taking time to meditate and relax, listening to music, going for a walk. Doing things that Make him laugh and planning time for the self and self care, We in partnership developed a plan that he was going to try these techniques over the next week and communicate with staff when he is feeling down and low, we arranged to meet again if required to review what we talked about and if the mindfulness and circle of control strategies were effective On reflection, This YP in my analysis was/is unable to gain control over his life and struggles to differentiate what we can control, I believe that these negative thoughts have been building up and as a result of covid he has been unable access support, we will continue to communicate and be a support mechanism for young people struggling;

Employability Programme	Young person contacted staff members regarding support in developing a CV and applying for jobs in the hospital, during session young person showed great desire for getting a job but admitted that they were nervous as they have never had one before and didn't really know what to expect. Staff spent time and done an exercise of fears, hopes and expectations, this seemed to have a positive affect in calming the young person and they were able to have more pro's than con's. Young person completed their application for the jobs at the hospital and have planned another session to develop CV.
Employability Programme	Young person has been in contact with staff for a while and made connect regarding support in getting a job, young person developed CV and signed to a number of job agencies. While chatting with young person discussed the amount of cannabis he has been smoking and that he wishes to stop, staff developed a plan for young person reduced the amount each week and support the young person during this time.
Employability Programme	Young person has been struggling during lockdown and lost his job due to the pandemic, although young person is currently enrolled BMC his course is currently operating at a reduced time schedule which is facilitated online only. Young person made contact with one of his key workers and requested support in updating his CV and applying for jobs, during his one-to-one session young person and staff member discussed the effects of the current lockdown and young person said they have been feeling disconnected with from their friends as they have had to isolate due to vulnerable family member, during session young person developed a personal development plan.
Employability Programme	Young person participated in session in developing their interview skills as prep as he heard back from a job that he applied for, the job requires a 2 stage interview process: a phone interview and if successful a face to face interview. From the previous employability session the young person said they feel a lot better and felt the employability sessions have helped them feeling a lot more productive.

HYC young person 1	<p>Spent 75 minutes walking with the young person around a pre-assessed local area. The initial 15 minutes were spent checking in with the young person, who was physically quite down / upset coming into the session today. They are off school for mid-term and this has had a further negative impact on their mental state. They were particularly quite for the start of the session. We then progressed to discussing sleeping patterns which they described as poor over the last 10 days, they have been awake all night & not feeling tired; but getting some sleep during the day. This will be something that needs readdressed when they resume school following mid-term break. We spent time discussing family & there has been limited interaction with family members over the last period. The large majority of the mentoring session was spent discussing their wellbeing off late and feelings. They spoke of feelings of disassociation (which they have previously identified with a counsellor) and feeling numb. The young person had stopped seeing their counsellor & the counsellor reached out to Holywood Youth Centre. Through this they were able to offer to meet the young person for a walk & carry out the counselling session. I spoke with the young person about this & they have agreed to this, which is a key success. When they had previously engaged in counselling this significantly helped their understanding of self & what was going on. This was the key success of the session. The biggest challenge was getting the young person to open up.</p> <p>This was a one-on-one walk with a young person in an open space. The initial 10 minutes included a general check-in then re-establishing the expectations around one-on-one mentoring. We spent 20 minutes discussing school work & pressures young person is under, including pressures of deadlines. 10 minutes was spent on</p>

HYC young person 1	family discussion. 15 minutes was spent focused on their mental health and wellbeing. The final 5 minutes included a recap of next steps.
JPIIYC GROUP WORK RESPONSE Kilcooley Intermediates Larry 1 Lets Reconnect-Inclusion Lets talk newry Live Learning	
LTP RJ	The young person has been making great progress in the first two sessions, including asking for guidance for other subjects. The young person and parent have thanked us for the response and opportunity. the young person is attending twice a week and has started well in catching up with the work that they hadn't completed.
LTP RJ	The young person has come to the end of their one-to-one sessions with the staff, as they will be returning to school next week. Throughout this time the young person has been completely engaged, completing each task set in front of them. During the time the young person grew in confidence to ask for help, as well as trusting themselves and staff to be able to make suggestions/guesses at questions which within school environment they may not have. I feel that the one to one has helped the young person massively, not only getting up-to-date with all their work, but also for their confidence and coming out of their comfort zone.
LTP RJ	The young person has participated in each session so far, highlighting that the intervention has helped with other school work as well as home life. Some occasions certain work has been frustrating for the young person as struggled to understand, although a lot of positive progress.
LTP RJ	This was the first session to be completed with the young person. Engagement for this session was very good with aims and objectives for the session met. The intervention enabled the young person to begin to catch up on LTP work which they have missed whilst being off school and struggling to engage online.
LTP RJ	This young person has been doing great with the intervention sessions so far, showing interest and engaging in every aspect of what we are trying to achieve. They find it very easy to get distracted, although are also putting the hard work in to reach their goals on a regular basis.
LTP RJ	This young person lacked focus today, the reason they said was they felt tired and work was getting stressful for them. We decided to play a few games/energisers to positively impact the mood, which had a positive effect. The young person was able to focus a little more and complete the set target for today.

Our Streets CM01	An application for Secure was made for C but her Mammy has taken her to Mayo to stay with her grandfather instead. It has been agreed that I will continue to provide support once a week via Zoom .

Our Streets CM01	Today was the first session and we discussed the CLEAR model and explored some issues that we may wish to address over the next few weeks. We discussed Child Protection and disclosures and my role as a youth worker. We have also discussed the idea of goal setting and future planning.
Our Streets CM01	Today we looked at CSE and what it means in relation to young people in our area. We watched a video and a discussion around age groups and appropriate relationships,
Our Streets CM01	Today's contact with C was on ZOOM as there was a care plan meeting organised. There is an application being made for Secure accommodation due to high level of risk associated with this young person. There were a rang of professionals in attendance including the Trust - FIS and CIS, PSNI, Family Centre, Barnardos and I was there representing the Youth Service. There was a lot of discussion around safety plans and the situations this young person has been in. There are concerns around a number of addresses including those of Foreign Nationals. Social workers are of the opinion that secure accommodation is the only option at present but family are exploring other options.
Our Streets Conchúr one to one: OH 2-6	Session began with a check in, as it has been 2 weeks since our last session due to the Easter holidays. OH mentioned that he hasn't been to school all week due to him being sent home along with his friends for smoking in school, he wasn't smoking but he was with the group that were. This annoyed him as his grandmother wouldn't allow him out and he was unable to see his girlfriend. We spoke on responsibility as he also slept in for school causing him to miss out again. We discussed that that it can be difficult getting motivated for school. However we spoke about the importance of this year, being 5th year and having important exams coming up. We also spoke about techniques to help him getting up early in the morning to prevent him from being grounded and/or not being able to see his girlfriend. This brought up some arguments he has had in the past with his grand mother and how she would often mentioned that if his behavior didn't improve he would moving to England to live with his mum. OH said that in the past this wouldn't really bother him however now he would like to stay in derry and he recognizes that he needs to improve on his behavior. We had a conversation then around the easter break and what OH got up. He spoke about some movies he had watched. This led to a conversation around the topic of drugs and alcohol. OH spoke about his opinion on drugs, he informed me that in the past he has tired cannabis but he now has stopped due to being caught by his grandmother. We spoke about his grandmother has his best interests and that her being annoyed is a natural response as she is looking out for his wellbeing. During the session we carried out an activity of 3 strengths & weaknesses. OH weaknesses where his anger and stubbornness; this was good to see him recognising that these traits can be negative. We spoke about anger and how the feeling of anger is ok and natural but the way in which we express our anger is where problems arise. Anger can cause aggression and behavior shifts leading him to become aggressive etc. There was then a conversation around triggers when we are becoming angry and solutions or strategies we can put in place to help defuse the situation when we notice these triggers happening. Solutions such as breathing exercises, listening to music, taking yourself away from the situation or speaking to someone We then spoke about the strengths that OH has which where problem solving & being honest/straight talking. We spoke about hos these are good traits that can be used in all areas, particularly going forward when OH speaks work. Through the problem solving, we spoke about who OH would speak to if issues arose that maybe where more difficult solving. OH said that he feels comfortable speaking to his uncle and other members of his family however some topics or issues he would rather speak to his uncle. Through this conversation it seems that OH has difficulty speaking to some people for support in-case they tell others. I spoke about the importance in having an adult that you feel you can speak to and that a problem shared is a problem halved. As the session was finishing we had a brief conversation regarding fitness I think closed the session asking if there was anything OH wanted to speak about before leaving the session.
Our Streets Conchúr one to one: OH 2-6	Todays session did not go ahead as young person forgot about the session. I made contact with young person and guardian about rescheduling for next week.
Ourstreets Conchúr One to One: OH	This was the first session with myself and OH, the aim of this session was for him to become familiar with myself and the process of the one to one service as well as me getting to know him, breaking the ice. As the session began i explained my role as a youth worker and that although the sessions are delivered on a one to one basis I am not a councillor. OH explained that he had apprehensions prior to the session thinking that he may have been getting involved in a counselling program. We had some general chat over a 'Who am i' worksheet, the aim was to utilise this as an ice breaker to help us get to know each other, speaking about our favourite movies, tv shows, food etc. Through this OH has spoke about living away in England. Through the session OH spoke about returning to school after a long break due to covid, this led to conversations regarding 5th and the pressures that come with it. Through this OH mentioned that although he has friends in school he likes to keep his friend group small and finds it difficult to trust people. OH said that he does not socialise much outside of school, recently he has been spending time with his girlfriend. He stated that both him and his girl friend have separately had difficult moments in their lives but the use each other for support and are able to share these experiences. We had a chat about interest, OH spoke about his enjoyment for fitness and how he has recently been doing homework outs as a result of covid. OH also has a keen interest in MMA which we had a chat about also. OH had a black eye and through conversation he informed me that he had got himself into a fight, this led him to talk about his temper and how he has gotten into fights in the past. We had a chat about this and the dangerous attached particularly if he wishes to compete in MMA. Whilst talking about his temper OH spoke about arguments that he would have with granny at times - he said that afterwards he can often be stubborn and they pair may not speak. We explored this, talking about how disagreements don't always have to end negatively and that they can be conducted in a positive manner. OH agreed however he had the awareness to say that its easier said than done. This will be something that we will tease out further as the sessions progress.OH also spoke about his relationship with his mum and how he would consider her to be his role model despite their fall outs over the year and that their relationship is currently good. Overall i think the

	<p>session was successful, OH engaged well and seemed to be comfortable despite this being our first session. We made plans for our next session.</p>
<p>OurStreets COVID video</p>	
<p>OurStreetsCBonetoone</p>	<p>Following from the last conversation i had with CB's mum (see CP form) i was told that CB would only come to this session if she didnt have to talk about what happened on Monday, I was happy not to bring it up but made CB's mum aware that if she did want to talk i would be happy to. Throughout this session Chloe was in good form and talking about school work and current programmes. She did bring up about the incident so i took the opportunity to speak about the affects that this had on her and how we can move forward from it- advising CB to be open minded to the options that are being given to her e.g counselling and use this as a fresh start as she doesnt want to be feeling like this.</p>
<p>OurStreetsCBonetoone</p>	<p>Previous to this session, CB's mother made contact with me in regards to further issues from CB at home. CB had a melt down on the wednesday night and was expressing signs of self harm. All she would tell her mum was that it was something to do with her english class at school. When CB came in to see me we spoke about how her first week back at school was and also spoke about what had happened. I asked CB going forward what she wants to do and what support she wants, we spoke about counselling options which she has agreed to let me phone around for possibilities.</p>
<p>OurStreetsCBonetoone</p>	<p>This session was used to complete the referral to Mens Action Network. I talked Chloe through the process that i was completing and told her that i would be in contact when i hear more. This session was used to have a catchup with Chloe and see how she was getting on as the last few weeks have been a bit hectic for her. She is in way better moods and completing more full days at school. We will use these sessions going forward to complete exercises on postive mental health and well-being and getting into a better routine.</p>
<p>OurStreetsCBonetoone</p>	<p>This was the first session with this young person, we used this as an opportunity to introduce ourselves and in particular I used this time to explain my role and what I'm hoping to bring for the young person. This session involved conversations to get to know each other and a bit of a planning going forward.</p>
<p>OurStreetsLH</p>	<p>I had arranged to meet with L after she had texted me at the beginning of the week. It is coming up to her brother's birthday and she has been struggling recently.</p>

<p>PD01 - one to one sessions</p>	<p>in this weeks session we had a number of things to talk about which were brought to my attention by PDs social worker, including PSNI involvement over an issue from last year. we had a meaningful conversation and I used different methods to engage PD in this conversation, including playing the Bounce Back board game which encouraged him to explore potential consequences of risk taking behaviours. When PD was engaging in this activity i spoke to him about the issues raised by his social worker. PD completely refuted being a part of this but said his mum and social worker always blame him. we spoke about reasons this might be and began working on an Acceptable behaviour contract which PD wants to share with his mum too when we finish it PD was willing to take part and left the session in a good mood and looking forward to next week.</p>
<p>PD01 - one to one sessions</p>	<p>PD arrived again 15 minutes early for his session and told me that he waits around all day for this and looks forward to it. PD appeared in great mood today and asked if he could play with the nintendo switch, i brought out the switch and we sat at the coffee bar area while PD set this up. While doing this i engaged PD in conversation talking about the past week and asking how he was getting on. He told me that he is back at EOTAS now three days a week and enjoying this. He is liking it better than going to St Brigids. We spoke about his school work and i reminded PD that he can bring any work up to this session if he needs help or support with it. PD also spoke about missing his friends and said he cant play with them as his bike is broke. We spoke about this and agreed that i would ask teamworks SCRA to fix his puncture so he can get back out with his friends. I also spoke to PD about bike safety and making sure to be careful and responsible on his bike. He was happy and excited that he would be getting this sorted all in all it was a very positive session today and PD talked freely and willingly and was excited for next weeks session</p>
<p>PD01 - one to one sessions</p>	<p>PD did not show up to the session today - he called in at 5pm then to say that he was at a tutoring session which was due to take place in the youth club - but due to a mix up with the other organisation this didn't happen I spoke with the coordinator of the other project about this to identify the issues and was assured that from next week on this will be sorted out - PD will take part in tutoring sessions in SYC first and then a one to one session through a collaborative response</p>
	<p>This one to one is an ongoing process with a young person who is a registered member at Shantallow YC. As discussed in the proposal form there are a number of factors which place this young person and risk and therefore the one to one work is essential for him. PD came to the club 15 minutes early for his session and</p>

PD01 - one to one sessions	was very excited about it. When we began the session I allowed PD to direct the flow of it and kept it very light and informal. This method works for PD and creates the space for meaningful conversation. We spoke through the last few weeks and I highlighted to PD any behaviours which he talked about which may have placed him at risk - e.g. hanging about in a large crowd now during the pandemic. PD also told me that he is back in school now three days a week. I spoke to him about how this is going and he said he isn't liking it and finds it hard to concentrate - I told PD that he can use this space every week if theres anything he needs help with academically. PD seemed happy and excited at the prospect of this one to one session now happening again on a weekly basis. He reported that he is missing the youth club and seeing his friends. I am hoping that over the next few weeks we can build on existing relationships by implementing the Circle Of Courage Model and providing that safe space for PD to work through any issues he may be facing
Period Positivity - Young Womens Committee	
Positive Minds	
Raising Awareness of Covid Restrictions	
Raising Awareness of Covid Restrictions	the young person came to the session early and engaged with the youth worker on site. he was very quite and reserved and stated that its only started to sink in a bit currently. he spoke about the relationship he had with his sister and how the family are taking the news, using words like shocked, not real, surprised etc. he said that he was feeling grand about it all and that he tries to keep busy but at times its all he can think about. he said that he has a friend that he goes out cycles with and walks to get out of the house as he knows that he is snapping at people closest to him. the youth worker used the session to listen to him in an open and safe environment and allowed the conversation as little as it was flow from him. the youth worker made sure that the young person know that the service was here for him and what ever he needed. there was discussion around alternative support that could be brought in if he needed them and when he was ready. he said that he would have a good think about it during the week and get back to me. this was a positive move as it wasn't a no straight off. he said that he would like to continue to come to the centre each week to get out of the house have a chat with the youth worker.

SEN D Mills	Continued to work well with staff and engaged in positive conversations about school work, covid and the possibility of coming out of this current lockdown. Played games and discussed future programme with Nubia
SEN D Mills	Played games, had positive conversations, completed some cookery and discussed the Gimme 5 programme.
SEN D Mills	Session was conducted by Part time staff. Art Therapy took place
SEN D Mills	This was D Mills fisrt night. D Mills was overwhelmed being back at the centre although it was a one to one with staff. We enaged in positive conversations about school and how covid is having a major effect on D Mills health. He is thankful being abke to have this company and is looking forward to returning net week.
SEN D Mills	This week during our session we conducted competitions on the Switch and engaged in conversation over hot chocolate. We spoke about the recent news on lockdown restrictions and how this will affect them. Deacon has continued to attend school due to his vulnerability. This bespoke intervention is working well and Deacon's social interaction has increased.
SEN D Mills	This week we completed the mento and coke challenge as well as engaging in conversation about covid, the return the school and youth restart.
SEN D Mills	This week we took part in art therapy focusing on the positives that came out of Covid rather than the negatives using art materials on a canvas. We also had discussions and took part in games
SEN D Mills	Took part in discussions around positive health and how we as a unit can best support. We discussed the upcoming CDA for the unit and raised the need for having a specific SEN group in Nubia Youth Centre. We also took part in games, listened to favourite music and enjoyed hot chocolate
SEN William Davies	Continued to work well with staff and engaged in positive conversations about school work, covid and the possibility of coming out of this current lockdown. Played games and discussed future programme with Nubia
SEN William Davies	Played games, had positive conversations, completed some cookery and discussed the Gimme 5 programme.
SEN William Davies	Session was conducted by Part time staff. Art Therapy took place
SEN William Davies	This week during our session we conducted competitions on the Switch and engaged in conversation over hot chocolate. We spoke about the recent news on lockdown restrictions and how this will affect them. Returning to school is a possibility due to his vulnerability. This bespoke intervention is working well and Williams's social interaction has increased.
SEN William Davies	This week we completed the mento and coke challenge as well as engaging in conversations about the return to school, covid and future projects with the centre.
SEN William Davies	This week we took part in art therapy focusing on the positives that came out of Covid rather than the negatives using art materials on a canvas. We also had discussions and took part in games
SEN William Davies	Took part in discussions around positive health and how we as a unit can best support. We discussed the upcoming CDA for the unit and raised the need for having a specific SEN group in Nubia Youth Centre. We also

SEN William Davies

took part in games, listened to favourite music and enjoyed hot chocolate
William engaged well this week. Appears very excited about being within the centre. Tonight we engaged in pool and play social distance games as well as having conversations regarding covid, lockdown and school work

Mentoring On Street Community Youth	Ongoing support to continue
Our Streets CM01	An issue arose as part of this conversation which has been recorded in a Child Protection form.
Our Streets CM01	C is involved with Social services as well but is open to a Youth work intervention. We agreed to meet each Thurs at 1pm In Pilots YC.
Our Streets CM01	Core Group Meeting took place on Thurs 18th Feb via Zoom. At the Core Group it was agreed that at this time that me, Orla, and Niamh (CAMHS) would continue their work with C on a weekly basis. C identified Orla and I as two people she works best with and has a good relationship with both and CAMHS has been prioritised in relation to her mental health. This will be reviewed in 2 weeks' time at the next Core Group. Mark from PSNI will make contact with the Guards in Mayo and share relevant information with them and provide a photo of C as there are some concerns that she may run away.
Our Streets CM01	There is a further safety meeting tomorrow morning Caron Cross, Social Worker will update the Core group after the meeting. In terms of Child Protection - all issues have previously been reported
Our Streets Conchúr one to one: OH 2-6	N/A
Ourstreets Conchúr One to One: OH	N/A
OurStreetsCBonetoone	Chloe has been referred to MAN.
OurStreetsCBonetoone	i have forwarded information and the referral form on Youth Life to CB's mum.

OurStreetsCBonetoone	n/a
OurStreetsCBonetoone	spoke to my line manager CR and going to speak to Youth Life as an option for counselling.
OurStreetsLH	L didn't show up so I will try again this week
PD01 - one to one sessions	Finuala to speak to other organisation next week to ensure this mixup doesn't happen again - collaborative response needs to be embedded to ensure that young people can avail of all opportunities without them clashing
PD01 - one to one sessions	i have arranged with teamworks to repair the puncture on PDs bike for him on friday morning and informed PDs mum of this i will check in with PD next week to see if he has no re-engaged with his friendship group and how this is going
PD01 - one to one sessions	I have made contact with the SENCO at PDs school and his social worker to inform them that PD is now continuing his one to one work in the youth club - this is due to the fact that prior to lock down this one to one was under the collaborative response and happening in school after being recommended at a social services case conference. After yesterday it became apparent to me that the method I need to use for PD one to one will be very relaxed and informal and that conversation will be the tool I utilise for supporting this young person and identifying any needs or issues
PD01 - one to one sessions	keep working on issues raised - speak with PD during sessions and engage him in conversation where he has opportunity to avail of support from me but also realise that some of his behaviours can have consequences which can impact on his life
Raising Awareness of Covid Restrictions	the young person said that his mother has currently taking the time off work to make sure he isn't alone in the house and has support there. she is going back to work this week and he will be in the house alone and he doesn't know yet how he feels about this as he hasn't been alone since he got the news. he has access to the youth workers phone number if he feels that any issues are going to arise. he has been leaving school work alone but is going to engage in our Live Learning group each week in the centre to work on school work and OCN's. the young person is generally a quite young person and this was really evident during the session but when we moved the conversation to the pool table the conversation flowed more. this is something we have to look at moving forward whether its conversation over an activity like walking, sitting down or a mix of both. an issue that I picked up on is that he is worrying about his father and how he is coping which is normal but we don't want him to forget he is hurting also and has to work through this. a further conversation on alternative services working with him and maybe his father if they are ready and willing to needs to be explored.
SEN D Mills	None
SEN D Mills	There was no issues
SEN William Davies	None
SEN William Davies	There are no issues to date
SEN William Davies	There was no issues in this session. Session appeared positive
SSYCC - Step Out Project	n/a
SSYCC - Step Out Project	N/A
SSYCC - Step Out Project 3	N/A
SSYCC - Step Out Project 3	no
SSYCC- Step Out Project 4	n/a
SYC AYO - 001	Continue to build on her strengths and promote positivity to encourage growth in her self-esteem and confidence. Focus on her achievements and belief in herself. Using discussion blocks at the beginning of the session to aid this development through discussions. Try to incorporate positive affirmations into the programme to aid in the development of her self worth.
SYC AYO - 001	Continue to carry out walk and talk exercises.
SYC AYO - 001	Continue to promote positivity and interest in how visits with family are going. It is clear to see the young persons confidence building so continue with interactive activities and discussions to encourage development.
SYC AYO - 001	Creating a risk assessment to allow the 1 to 1 sessions to be able to take place out doors during a walk. Completing a proposal for an extension of the programme to meet the needs of the young person and providing attentional support due to the number of changes that she will be going through in the next few weeks and months.
SYC AYO - 001	I was in contact with the foster parent after the session who informed me that the YP seemed upset after the session also and after discussions with the foster parent they opened up about how they were feeling. I also spoke with the foster parent about extended the 1 to 1 programme and she agreed that this would be beneficial and that it would be a good idea to include some walks and outdoor activities as this is something that the young person hasn't been doing much of over the lockdown period and it has been very difficult to motivate them. this will be included the proposal for extension of 1 to 1.
SYC AYO - 001	The young person seems to be opening up a lot more and is more confident in discussing struggles and issues she may have. YP mentioned that she hadn't been sleeping well, I asked was there any reasons and offered a safe space to discuss any worries but she said she just wasn't sleeping until very late, this is something to keep an eye on over the next few weeks and try to figure out the cause, it could be something as simple as staying on her phone to late or watching TV but we will work closer on this next week
SYC AYO - 001	The YP seems to be getting on well during the programme and seems to be becoming more comfortable to talk about how she is feeling and discussing what she does and doesn't understand.
SYC AYO - 001	Young person discussed school work and frustrations with getting work done and contact with teachers. Staff member to help with school work were possible and if needed make contact with school for any additional support needed for young person.

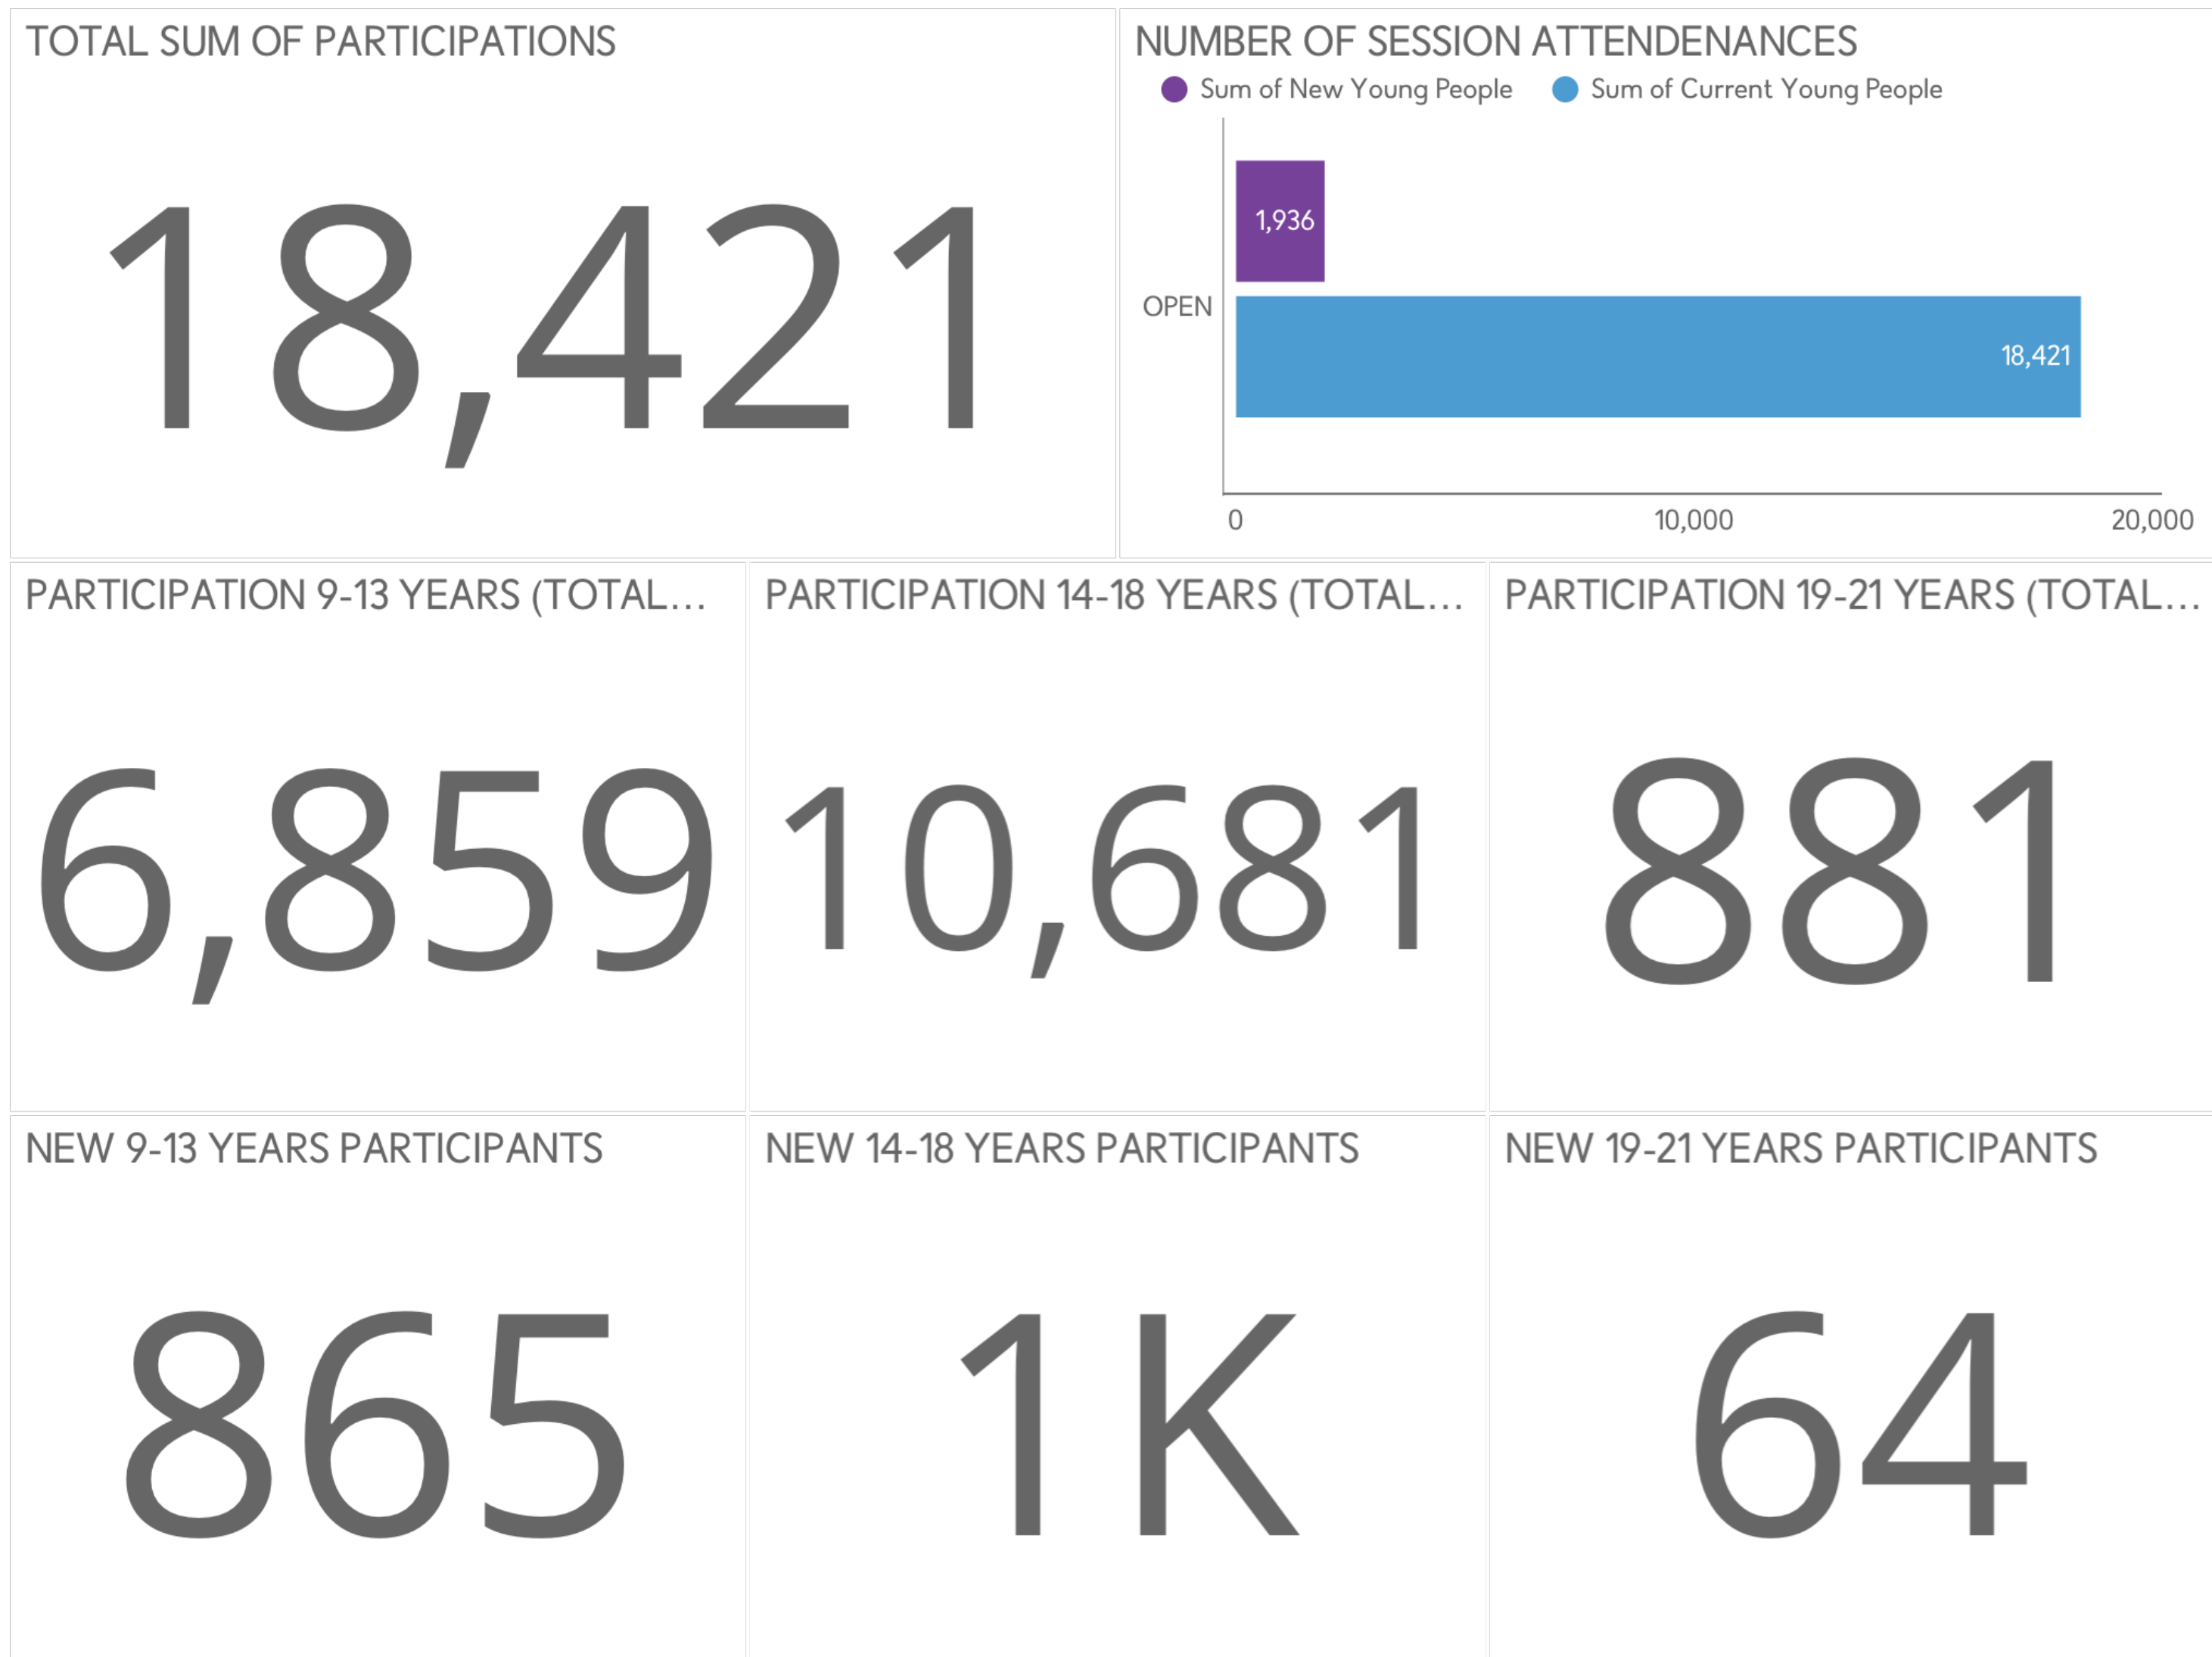

SYC AYO - 001	Young person is settling in well at school and glad to see her friends again great to see the young person a lot more talkative during this session and seemed more comfortable.
Woman's Aid One to One Programme	no issues
YES - 199177	a new approach may need to be taken if the level of engagement keeps lacking, maybe a referral on to a more specialized service, but will monitor the progress over the coming weeks
YES - 199177	no issues
YES - 199177	No issues arising
Yes - 130236	issues is young person is not engaging, will continue to try for the time slots that are available
Yes - 130236	Young person not wanted to come to session and making excuse, but young person is highly vulnerable so will continue to offer support for the allotted weeks

YMCA One to One A	young person to develop an understanding of emotions, how to express and manage their emotions. Alongside identifying goals to help support them with their education.
YMCA One to One B	n/a
YMCA One to One B	Therapeutic Intervention would be useful in this instance.
YMCA One to One B	Weight management, Curtis is extremely overweight and has mobility and speech issues resulting from his weight.
YMCA1	- self-confidence - frustrations around the online school and COVID - lack of support from a social worker. R has been expressing a lack of support from a social worker and being able to see family members due to lockdown restrictions we have been talking over these frustrations ensuring young person of lockdown but road maps and restrictions being less in future, we have been working on affirmation activities and encouraging a young person to identify positive qualities of self and creating space for encouragement and praise during the session. The young person has been working on an art piece to express positive qualities people have.
YMCA1	Through this intervention, something that has arisen is the lack of self-confidence and understanding of own strength. The young person is struggling to identify the positive affirmations about her self. This is something we are working on during sessions to build confidence and see the positives that she has rather than the negative qualities she often identifies. we have been working on implementing some positive affirmation card and using the I am art activity to discover a new language and identity new qualities about them self. negative relationships in school struggling to maintain relationships and concentration in class.
YMCAPORTADOWN001	-Issues around staying activity and find activities to do while at home. -Worries around lockdown extension - continued support around online learning and tools available
YMCAPORTADOWN001	-Time management and concentration during activites - Reliving past family trauma support being given during this time - Mental health struggles and creating coping skills during lockdown - lack of engagement with school during lockdown - Not being able have own space and freedom during lockdown.
YMCAPORTADOWN001	An issue that has arisen for the young person is lack of self-confidence in online learning and in everyday task young person lacks self-belief we have been working on understanding confidence and self-esteem. Completing task around young person identifying own skills and qualities. today session young person brought in their math essential skills work to go over and discuss this is a positive as week before she had express difficulties of online learning and did not want to do it at all. We managed to

YMCAPORTADOWN001	find some online resources for young person to help equip her for homework. We also had conversation around upcoming girls project and hopes for her to join in group she expressed interest and was excited for prospect. No issues this week left session feeling positive and mood was improved from week before.
YMCAPORTADOWN002	The young person has presented some anxiety-related issues that surround the ill health of his father, but also an issue of bullying which surfaced during the conversation.
YMCAPORTADOWN004	Bullying issue is over as far as the young person is concerned but it is something to monitor as it has been an ongoing issue. Check in with the young person in regards to his mental health and to ensure he is looking after himself.

YMCA Youth at Risk Programme Scorecard

1st April 2019- 30th Sept 2021

Various aspects of the project were very successful while others adversely affected by lockdown. Detached youth work (in line with the EA/PSNI joint protocol) was very successful due to the numbers of young people found on the streets during restrictions. 1 2 1 support & mentoring was also a valuable resource with many young people struggling through lock down. However, despite planning and organisation outdoor education sessions, project work and schools work were adversely affected by COVID due to lack of venues. Some of the work continued digitally via zoom and when restrictions allowed in the YMCA.

1. Number of young people engaged in outreach targeted programmes

Year 1:	93
Year 2:	101
