

Northern Ireland
Assembly

Constituency Profile

Belfast North - December 2012

About this Report

Welcome to the 2012 statistical profile of the Constituency of Belfast North produced by the Research and Information Service (RaIS) of the Northern Ireland Assembly.

The data contained in this report has been extracted from NISRA's Northern Ireland Neighbourhood Information Service (NIS) – follow the link from www.nisra.gov.uk and directly from government websites.

The report includes a demographic profile of Belfast North as well as key indicators of Health, Education, the Economy, Employment, Low Income, Crime and Traffic and Travel. For each indicator, this profile presents:

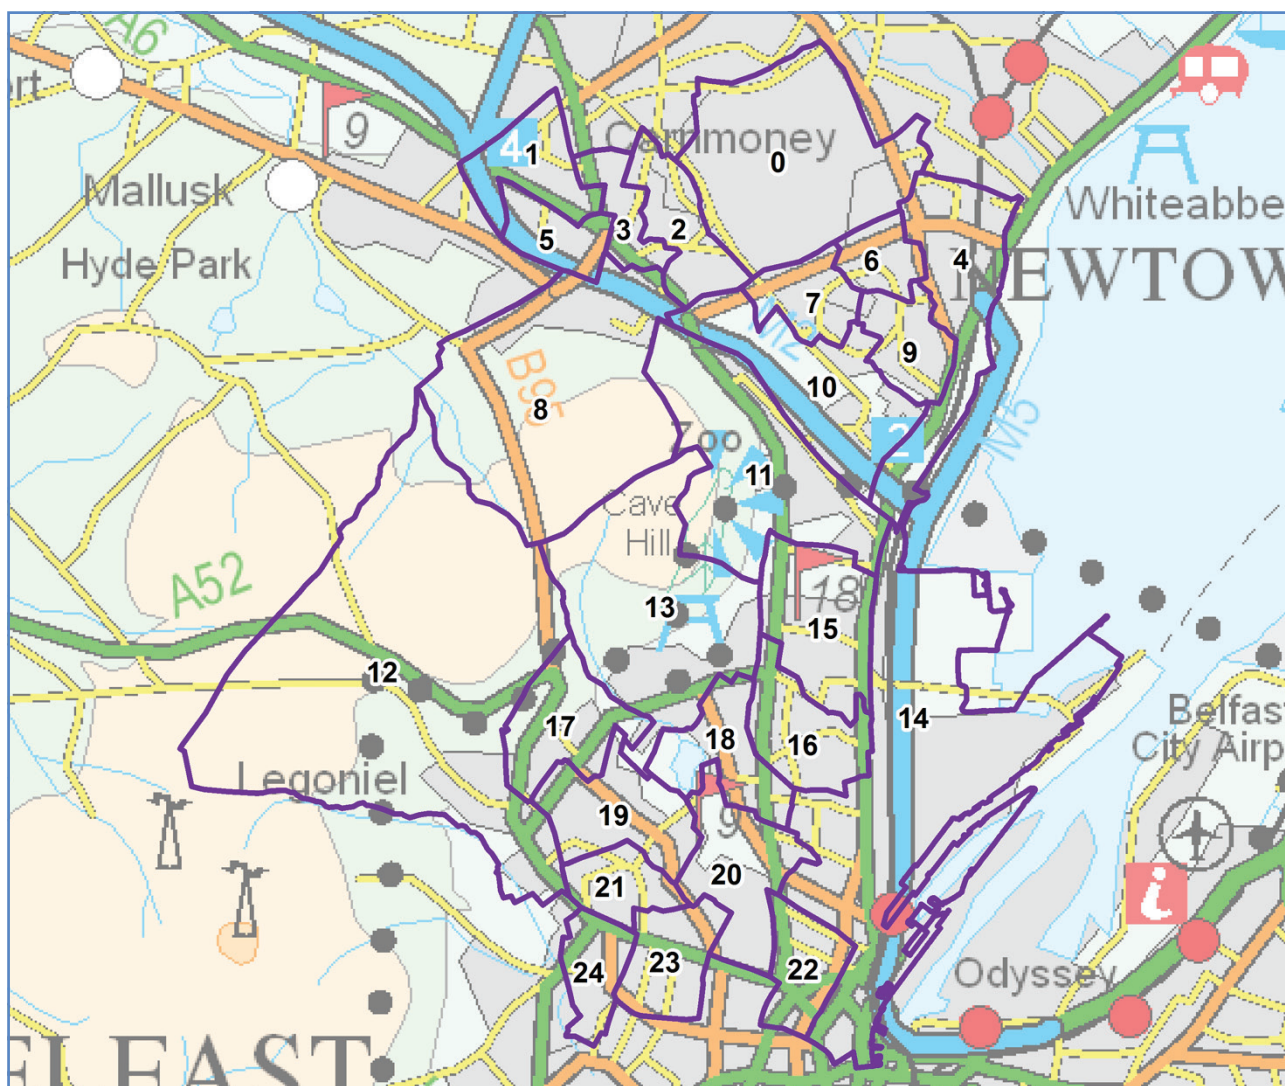

- The most up-to-date information available for Belfast North;
- How Belfast North compares with the Northern Ireland average;
- How Belfast North compares the other 17 Constituencies in Northern Ireland; and,
- Small area information, at ward level, demonstrating similarities and differences within the Constituency of Belfast North and highlighting any 'hotspots' that might exist.

Since 2011, new indicators have been added to this report, namely – children living in poverty and road traffic accidents.

The summary tables on pages iii-iv show the latest data for each indicator as well as the previous years' data and change over the period.

Please note the data presented in this report is based on the new Constituency boundaries which came into force following the May 2011 Assembly elections. As such, it is comparable with the 2011 Constituency Profile but not the 2010 Profile due to boundary changes.

This report presents a statistical profile of the Constituency of Belfast North which comprises of the 25 wards as shown overleaf.

Crime – Overall crime rate

In 2011/12, a total of 9,346 criminal offences were recorded in the Belfast North area. This equates to an overall crime rate of 9,220 per 100,000 persons⁹. This is lower than in 2010/11 when the crime rate was 9,777 per 100,000 persons.

The crime rate for Belfast North was higher than the overall Northern Ireland rate of 5,746 per 100,000 persons.

Belfast North was the Constituency with the 3rd highest crime rate (ranked 3 out of 18, highest to lowest).

Overall crime rate per 100,000 persons, 2011/12

	Rate	Rank		%	Rank		%	Rank

Crime – Rates of specific types of crime

Violent Crime

In 2011/12, there were 2,587 violent crimes against the person recorded in Belfast North, a rate of 2,552 per 100,000 persons. This was higher than the Northern Ireland rate of 1,711 per 100,000 persons. Belfast North was the Constituency with the 3rd highest violent crime against the person rate.

Criminal Damage

In 2011/12, there were 2,295 criminal damage offences recorded in Belfast North, a rate of 2,264 per 100,000 persons. This was higher than the Northern Ireland rate of 1,287 per 100,000 persons. Belfast North was the Constituency with the 2nd highest criminal damage rate.

Burglary

In 2011/12, there were 1,087 burglaries recorded in Belfast North, a rate of 1,072 per 100,000 persons. This was higher than the Northern Ireland rate of 586 per 100,000 persons. Belfast North was the Constituency with the 2nd highest burglary rate.

Offences against vehicles

In 2011/12, there were 623 offences against vehicles recorded in Belfast North.

Other theft¹¹

In 2011/12, there were 1,565 other theft offences recorded in Belfast North, a rate of 1,544 per 100,000 persons. This was higher than the Northern Ireland rate of 1,096 per 100,000 persons. Belfast North was the Constituency with the 3rd highest theft rate.

Drug offences

In 2011/12, there were 331 drug offences recorded in Belfast North, a rate of 327 per 100,000 persons. This was higher than the Northern Ireland rate of 209 per 100,000 persons. Belfast North was the Constituency with the 3rd highest drug offences rate.

	Belfast North		Northern Ireland
	Rate	Rank	Rate
Violent Crime	2,552	3	1,711
Criminal Damage	2,264	2	1,287
Burglary	1,072	2	586
Other Theft	1,544	3	1,096
Drug offences	327	3	209

Source: NISRA, NINIS (Notifiable Offences Recorded, PSNI)

11 The recorded crime offence group of other theft offences includes thefts that are not covered by other property crime offence groups (i.e. thefts from vehicles are included in offences against vehicles). Offences included are theft from a person (theft, including attempts, of a handbag, wallet, cash etc. directly from the victim, but without the use of physical force against the victim, or the threat of it), thefts of bicycles, shoplifting and other theft or unauthorised taking.

Crime – Anti-Social Behaviour

In 2011/12, there were 5,882 incidents of anti-social behaviour recorded in Belfast North. This equates to a rate of 5,803 per 100,000 persons.

The rate of anti-social behaviour incidents in Belfast North was higher than the Northern Ireland rate of 3,567 per 100,000 persons.

Belfast North was the Constituency with the 2nd highest rate of anti-social behaviour incidents.

Anti-social behaviour incident rate per 100,000 persons, 2011/12

	Rate	Rank		Rate	Rank		Rate	Rank

Traffic and Travel – Road Traffic Collisions and Casualties

In 2011/12, there were 460 road traffic collisions reported in Belfast North, a collision rate of 454 per 100,000 persons¹³. There were 718 casualties - 3 people were killed, 44 were seriously injured and 671 were slightly injured, a rate of 708 casualties per 100,000 persons.

The road traffic collision rate for Belfast North was higher than the overall Northern Ireland rate of 311 per 100,000 persons while the casualty rate was also higher than the Northern Ireland rate of 487 per 100,000 persons.

Belfast North had the 2nd highest collision rate.

Road traffic collision and casualty rate per 100,000 persons, 2011/12

	Collision Rate	Rank		Collision Rate	Rank		Collision Rate	Rank

Notes

Demographic Profile

Constituency population estimates are created from aggregating small area population estimates of their constituent electoral wards and sub-divisions of wards. Mid-year population estimates are created using multiple data sources: 2001 Census, births & deaths registrations, and health cards (for migration estimates). The mid-year population estimates are generally quoted in rounded form, this is because population counts from the census and subsequent updates involving births, deaths and migration cannot be precise. In general the precision of the population estimates could be considered to be no better than to the nearest 100.

<http://www.nisra.gov.uk/demography/default.asp41.htm>

Life expectancy of males and females

The expected years of life at birth based on the mortality rates of the period in question. The data is based upon the number of deaths provided by the General Register Office. DHSSPS calculates the sub Northern Ireland level figures. The dataset was derived using the Central Postcode Directory. All figures presented here are period life expectancies. Period expectation of life at a given age for an area in a given time period is an estimate of the average number of years a person of that age would survive if he or she experienced the particular area's age-specific mortality rates for that time period throughout the rest of his or her life. The figure reflects mortality among those living in the area in each time period, rather than mortality among those born in each area. It is not therefore the number of years a person in the area in each time period could actually expect to live, both because the death rates of the area are likely to change in the future and because many of those in the area may live elsewhere for at least some part of their lives.

Standardised mortality rates (cancer, respiratory disease, circulatory disease)

Standardised mortality rates are standardised to the mid-year population estimate for each of the grouped years. Rates will therefore vary from those published elsewhere that may use different standardisation (e.g. the HSC Inequalities Monitoring System publish rates standardised to the NI 2001 Census population). The data is based on the number of deaths for the calendar years grouped. The data is based upon the number of deaths provided by the General Register Office Mid-Year Population Estimates /Small Area Population Estimates provided by NISRA.

Diagnosis of new incidences of cancer

All newly diagnosed malignant cancers (C00-C97) occurring between 1993 and 2010 excluding non-melanoma skin cancer (NMSC) (C44). Data on cancer incidence are available from multiple sources, primarily pathological records, hospital discharges and death registrations from the General Registrar Office (GRO). This data is captured electronically, collated and quality assured on a regular basis to provide a population-based registry of cancer incidence for Northern Ireland. Tumour details are collected on cancer diagnoses according to the International Classification of Diseases, tenth revision (ICD10). Further information is available from the Northern Ireland Cancer Registry web site (www.qub.ac.uk/nicr).

People in receipt of disability-related benefits

The information is aggregated data from IAD 100% scans of Attendance Allowance, Disability Living Allowance, Incapacity Benefit and Severe Disablement Allowance data, and a 100% scan of MIDAS data for Employment and Support Allowance at 1992 ward level. Data has been rounded to the nearest ten.

Births to teenage mothers

The information is aggregated data from the GRO birth files, which are gathered when children are registered at the Registrar's Office. The dataset is updated as registrations take place, however the complete year's file is finalised in November. The dataset is gathered annually in December.

Disease prevalence – Quality Outcomes Framework

The Quality and Outcomes Framework data has been obtained from the Payment Calculation and Analysis System (PCAS). PCAS is a Northern Ireland IT system, which supports the Quality and Outcomes Framework (QOF) payment process. QOF registers for 7 clinical areas have maintained consistent definition since April 2004: asthma, cancer, CHD, COPD, hypertension, hypothyroidism and stroke. The definition of diabetes, epilepsy and mental health changed slightly for 2006/07, and eleven new registers were introduced: atrial fibrillation, chronic kidney disease, dementia, heart failure 1, heart failure 3, depression 1, depression 2, learning disabilities, obesity, palliative care, and conditions assessed for smoking. In terms of diabetes, a small change was made with regard to the diagnosis codes which make patients eligible for the register. The definition of epilepsy was changed from patients aged 16+ to patients aged 18+ years. As of April 2006, the mental health register has been redefined from 'those with severe long-term mental health problems who require and have agreed to regular follow-up' to 'people with with schizophrenia, bipolar disorder and other psychoses'. A specific register has now been introduced to capture conditions assessed for depression. Of the 21 registers collected for QOF, 3 of these have been excluded from the data provided as these do not actually measure disease prevalence. The depression registers are concerned with case finding among diabetes and CHD patients; the smoking register does not allow prevalence to be derived but rather counts of the smoking status of these patients has been recorded. List sizes as at January, Prevalence as at 31 March (From 2009, National Prevalence Day was changed from 14 February to 31 March to bring it in line with National QOF Achievement Day). The QOF is a system to remunerate general practices for providing good quality care to patients. It is a fundamental part of the new General Medical Services contract introduced on 1st April 2004. The QOF measures achievement against a range of evidence-based indicators, with points and payments awarded according to the level of achievement. There are four main domains (clinical, organisational, patient experiences and additional services). Disease prevalence data is used within the QOF to calculate points and payments within the clinical domain areas. The aim of the prevalence adjustments is to deliver a more equitable distribution of payments in the light of different workloads that practices face in achieving the same number of quality points. A full set of QOF data tables and explanation of the QOF can be found at http://www.dhsspsni.gov.uk/index/hss/gp_contracts/gp_contract_qof.htm.

School leavers achieving at least two A-levels/five GCSEs (A*-C)

The dataset is collected from schools via their C2k administration system. The dataset is gathered annually in November. Data are shown by financial year. For 2008/09 and 2010/11 the qualifications of school leavers have been revised from the figures originally released to correct A-Level or equivalent figures that did not remove AS-qualifications that were taken in the same subject as an A2 qualification.

Further Education Enrolments

The information is data derived from the Further Education Statistical Record, a computerised return consisting of an individual record for each enrolment on a vocational course in Northern Ireland Further Education Institutions. The dataset is gathered annually at the 1st November and is a full year count of the previous academic year. Colleges collect the information on Enrolment forms. This information is entered onto the Colleges Management Information System. The Department extracts and validates this information from the colleges.

Higher Education Enrolments

The information refers to NI domiciled students enrolled at higher education institutions in the UK. The dataset is collected annually and is based on enrolments in higher education institutions in the UK on 1st December each year. The dataset is collected by the Higher Education Statistics Agency from higher education institutions throughout the UK and provided to the Department for Employment and Learning, Northern Ireland, for analysis. Figures for NI domiciled enrolments at England HEIs include enrolments at the Open University (OU), as the administrative centre of the OU is located in England, so it is treated as an English institution, even though the majority remain in NI and study via distance learning.

Invest NI Assistance

The information is aggregated data sourced from Invest NI administrative datasets. It represents the total amount of assistance offered to companies by Invest NI over the time period and the total planned investment related to these projects. The assistance/investment datasets are updated by letter of offer reports. Total offer locations exceed total number of offers, as some projects are located in more than one area. Data are shown by financial year.

Invest NI Enterprise Development Programme

The information is aggregated data sourced from the Enterprise Development Programme database. Data shows the numbers of individuals who completed training and subsequently started a businesses is updated from the Enterprise Development Programme Database. Please note: 1. Year is taken as the year an individual completed their training 2. Assistance is not necessarily offered within the year that the training was completed 3. Assistance may still be offered to individuals that completed training within the most recent years 4. Training was given to some clients who did not live in Northern Ireland and address details were either ROI or GB Data are collated on a financial year basis.

Redundancies

Redundancy Statistics: While the figures provided are likely to be an underestimate of total job losses, it is not possible to quantify the extent of the shortfall. Subject to the criteria mentioned above, employers must notify the Department of Enterprise, Trade and Investment of (a) redundancies proposed and (b) redundancies confirmed. Since all proposed redundancies do not actually take place, the confirmed total provides a better indication of real job losses. Proposed redundancies are notified to the Department using the Advance Notification - HR1 Form. Redundancies do not necessarily equate to job losses, for example, employees who do not qualify for a redundancy package, those on temporary contracts, will not be incorporated into the redundancy figures.

Unemployment Claimant Count

The claimant count consists of all people claiming JSA at Jobcentre Plus local offices. They must declare that they are out of work, capable of, available for and actively seeking work during the week in which their claim is made. The Claimant Count annual averages are not seasonally adjusted. Seasonally adjusted data is only available at government region level (eg Northern Ireland). Claimant count rates: Claimant Count Unemployment rates are expressed as a percentage of the working age population and are calculated by expressing the numbers of claimants at that time as a percentage of the resident working age population (16-64). The 'working age' definition, used in the calculation of claimant count rates, was changed in August 2010 to include those aged from 16 to 64 for both men and women. Please see link for further details http://www.detini.gov.uk/introduction_of_new_working_age_definition.pdf. Relationship between claimant count and unemployment: There is a large degree of overlap between the claimant count and unemployment although the latter figures are generally higher. People who are not claimants can appear among the unemployed if they are not entitled to unemployment related benefits. For example: (i) people who are only looking for part-time work (ii) young people under 18 who are looking for work but do not take up the offer of a Youth Training place (iii) students looking for vacation work (iv) people who have left their job voluntarily

Some people recorded in the claimant count would not be counted as unemployed. For example, in certain circumstances people can claim Jobseeker's Allowance while they have relatively low earnings from part-time work. These people would not be unemployed. Unemployment is only available at Northern Ireland level.

People claiming benefits (at least one of the main benefits)

The information is aggregated data from a database created by merging all the MIDAS 100% scans of the main Social Security Benefits. The dataset is a snapshot of the benefit at April 2012. Proportions calculated using latest available mid-year estimates.

People claiming income support

The information is aggregated data from unvalidated 100% MIDAS scans of Income Support data at postcode level. The figures may differ from forthcoming National Statistics which are based on validated ASD/IFD data. The dataset is a snapshot of the benefit at February 2012. Proportions based on working age population (16-59/64) and calculated using latest available mid-year estimates.

People claiming housing benefit

The information is aggregated data from Housing Executive scans of Housing Benefit data at 1992 ward level. The dataset is a snapshot of the benefit at June 2012. Proportions calculated using latest available mid-year estimates.

Children in Poverty

Children in Poverty - This is a snapshot of data on 31st August of each year. Notes: Children in IS/JSA families: Number of children living in families in receipt of Income Support or Income-Based Jobseekers Allowance. Children in families receiving WTC and CTC, and income <60% median income: Number of children living in families in receipt of both Child Tax Credit and Working Tax Credit whose reported income is less than 60 per cent of median income. Children in families receiving CTC only, and income <60% median income: Number of children living in families receiving Child Tax Credit only whose reported income is less than 60 per cent of median income. Children in families in receipt of CTC (<60% median income) or IS/JSA: Number of children living in families in receipt of Child Tax Credit whose reported income is less than 60 per cent of the median income or in receipt of Income Support or Income-Based Jobseekers Allowance. Percentage of Children in "Poverty": Number of children living in families in receipt of CTC whose reported income is less than 60 per cent of the median income or in receipt of IS or (Income-Based) JSA, divided by the total number of children in the area (determined by Child Benefit data).

Crime

Recorded Crime (Notifiable Offences Recorded) data are compiled from offence information that is submitted by police officers and entered onto a PSNI crime recording system. The data are presented on a financial year basis. The figures for Violence against the person with injury and Violence against the person without injury are subsets of the overall Violence against the person figures. Similarly, figures for Burglary in a dwelling and Burglary in a building other than a dwelling are subsets of the overall Burglary figures. Further information on this update and a user guide providing a background into police recorded crime can be found on the PSNI website via the following web address. http://www.psnipolice.uk/index/updates/updates_statistics/update_crime_statistics.htm

Anti-social Behaviour

Anti-Social Behaviour Incidents Recorded by the Police. The dataset is compiled from the force Command and Control system, where calls for service from members of the public are logged. ASB incidents (i.e. those calls for service which do not result in a recordable crime) are recorded according to agreed definitions and associated closing codes. Incident figures are based on operational Police information and consequently are subject to change. Incidents are attributed to PSNI Command Areas at the time of recording and are

therefore not dependent on postcode availability or quality and have not been matched with the CPD. Further information and further figures on Anti-Social Behaviour Incidents can be found on the PSNI website http://www.psni.police.uk/index/updates/updates_statistics/updates_antisocial_behaviour_statistics.htm Data are collected on a financial year basis. As such data for 2006 represents the financial year 2006/07.

Road Traffic Collisions and Casualties

The dataset is compiled from Collision Report Forms (CRFs) forms that are submitted by police officers and entered onto a database. These forms are completed by the officer when any collision involving death or personal injury occurring on a road or other public place is reported to them. Datasets are produced on a calendar year basis. Note: The data set excludes the following a) collisions resulting in damage only b) collisions in car parks and picnic areas c) collisions reported to the police 30 days or more after their occurrence d) collisions on a road closed to the public by order of the Department of the Environment, during the holding of motor car, motor cycle, pedal cycle races etc.

This document has been produced by Research and Information Service (RaISe) for the benefit of Assembly members and their staff.
