

I am writing with concerns about this bill from a number of perspectives:

1. There is vagueness in the rubric re definition of influencing directly or indirectly;
2. There is already protections in place for protected buildings re access, e.g. hospitals for ambulance access, therefore no need for further legislation; and
3. Freedom of expression in a peaceful and non-criminal manner is protected in a democratic society. Anyone behaving in a manner outside of the law should naturally be subject to justice for breaking that law.
