

This bill is harsh and cruel and is an unjust exercise of power and authority and it is aimed at the direct life saving work of those who are pro life. Additionally this bill places the work of pro life people into an offence making it illegal for these pro life people to do anything to support or influence anyone that may be attending an abortion clinic. Especially those who maybe unsure or in difficulty in life with a pregnancy who may just need help with their decision or support/guidance or someone to walk with them or offer them alternatives to abortion. These vigils are quiet and are not in any way disruptive from what I have saw passing by and on line also and undoubtedly is helping save lives of those who are unsure or uncertain of their decision. It is not in any manner harassing or intimidating people. It there as a support for women and children and families outside these centres. The bill goes against the Human Rights Act taking away people's right to express themselves and gather together and the good work and good intentions of pro life groups will be blocked and lives lost and destroyed. Children who will not have had a chance to live (the gift of life) and women who may later regret or suffer trauma because no one was there to help or advise or offer alternative solution to abortion.. This bill will directly impact on pro life good work and this bill is in itself an evil and will open doors to more bills that are damaging.. When we leave this world we will answer to our creator what we watched and allowed without going against these bills.

In no way do I support this bill.
