

I as a citizen of Northern Ireland will stand strongly with the other life loving people in our land in condemning your abhorrent and wicked insinuations that precious life and any other compassionate groups that love women and their unborn children are harassing anyone. Therefore I am completely and unreservedly against your scheming Abortion Service Free Access Zones! Do women not have a right to know the truth? Do they not have a right to both sides of this evil bloodbath business that has been enforced on the people of Northern Ireland without their consent but has been welcomed by the so called politicians especially the Republicans and Nationalists parties under the guise of health care. The mind boggles. We are supposed to live in a democracy but it is all one sided. You people are supposed to work for the people not against them. Murder is murder and no disguising it as healthcare will change that. Let's go back to Draconian laws where the people that are right are wrong and don't have a say to help vulnerable women. The amount of mental health problems because as a result of women aborting their babies through misinformation is an absolute disgrace. You people don't care about anyone only yourselves with your power tripping nonsense. As I have stated I strongly oppose this absolute ridiculous notions to the 'Abortion Zones' bill criminalising Pro-lifers that have nothing but love and compassion for these women and their unborn babies in the womb. Please be open hearted and open minded in your dealings and recall that the majority of people in Northern Ireland are pro-life and always have been and will be!!
