### Clause 1: Provision of free period products: Department scheme

6 Do you agree with the proposed duty described in Clause 1?

Strongly Disagree

7 Do you think the duty takes account of all necessary factors e.g. dignity, accessibility, choice, differently able people, travel arrangements, consultation and advertisement of arrangements for provision of period products?

Do you agree/disagree with proposed duty in Clause 1:  
Strongly Disagree

8 Would you add, detract from or otherwise amend any element of Clause 1?

Yes

If yes, what amendment would you make? :

If u still want your votes... Why not post out to every eligible person a certain amount or allow on prescription? Then it is at least traceable. And This research is based on school children - then they should only be free to school children.

I think ur data is incorrect - you are saying that 3 out of 4 girls in Northern Ireland have missed a class due to not being able to afford sanitary ware?? Maybe has forgotten to bring some ?? Would be more appropriate?  
Or parents unable to Prioritise spending? What mobile phone do these children own?  
Have you not learnt from making prescriptions free - the estimated cost more than trebled as people take more than they need and don't care about waste when they don't have to pay for things!

The 5p bag charge is a great example- that you don't need to charge much to reduce waste! But you need to charge something!!!
