

Hi, I am the grandfather of a beautiful baby boy who has downs syndrome.

When my daughter in law was told that their was something wrong with her baby she was offered an abortion which she turned down because that would be killing her baby and she is against abortion.

My daughter in law is not a Christian but says she has been against abortion all her adult life she has had five beautiful children and would not change any of them for the world.

I myself have seen videos of what takes place in aborting a baby and those in favour of abortion keep telling people that abortion is safe when that is far from the truth.

There have been many cases of mothers dying on the abortion table and also other mothers having difficulties with infections that have lead to death.

I believe that aborting a child because it has an imperfection like a cleft palette or a club foot is totally wrong as these things can easily be fixed.

I also believe that 99% of abortions are because the children will not fit in with peoples life styles.

I believe that because Britain has been aborting her children now since the sixties we would not have needed to bring other people in to work jobs that those aborted children could have done.

We have been murdering our children for ages now and if it keeps us it will only be a short step to murdering the elderly and inferim which will be the bracking of two of God's commandments and God will judge those who have facilitated the murder of our elderly and our children.

Yours in Christ
