

I am writing this E.mail tonight with a very heavy heart for all those who have been born with an abnormality/ disability such as myself . These very loose grounds for abortion that has been introduced to Northern Ireland with a lot more people against than for them is a disgrace. I therefore speak on my own behalf of how I as a person with Turner Syndrome, feel that although born with a Chromosomal abnormality and with support have been able to lead a relatively normal life. With this I feel that giving a choice only under strict circumstances is important. To think that had my parents been offered the choice when they found out of my condition my life would not have been is hard to think of. Where also is the Governments stance on protection of life , a bit hypocritical the extent they have been going to through this pandemic in the preservation of life on one had, but quite ready on the other to end a life before it has even begun shame on it !! So I ask that safeguards are upheld that only in extreme circumstances is abortion allowed and consider that my life like any person with out a any issues is just as important .
