

Hi.

I would like to submit mine and my wife's views that we are against the law that was introduced to Northern Ireland that would allow for fatal abortions to take place right up to birth.

This is horribly wrong. The unborn babies need our protection. I have had experience of people who have Downs Syndrome and they are the loveliest human beings on our planet, loving and affectionate and how dare people decide that they shouldn't live. For those who do suffer, it must put them in a place of feeling 'not wanted', and that is a horrible thought that apparently many are feeling.

I personally had a friend who was severely disabled and it was suggested that she should be aborted while in her mum's womb, yet she lived a very productive life, qualifying as a Psychologist and travelling the world, lecturing, and yet they said she would never walk.

As caring human beings, we just cannot sit back and say nothing, so we strongly support the views presented by the MLA Paul Girven
