

I wish to comment on the above bill amendment which I support. I feel we need to hold on to the anti discrimination towards the disabled which we have had for years. This act will undermine all the good which has been done for the disabled in that unkind people will be able to point a finger at women, having a disabled baby, who chose not to abort that baby. It will also have a detrimental effect on living disabled children. Society can be cruel to people who are "different" and I know if an incident when someone shouted to a disabled person "your mother should have aborted you". This bill will give rise to more abuse of that kind.
