Dear Sir,

We are writing to support Paul Givan's Severe Foetal Impairment Abortion (Amendment) Bill.

There are many things which could be said about the abortion of children with impairments such as Cleft Lip and Club Foot or Down's Syndrome.

Firstly, none of these are fatal and there are many people living valuable and fulfilled lives with these disabilities, e.g. Heidi Crowther.

Are they of less worth than others?

Do they not have the basic human right to life?

Are we on the road to sex-selective abortions?

Will we eventually have abortion for population control?

The fact that these abortions are proposed for full-term foetuses is horrendous! This is not just tantamount to murder, it is murder.

In the interest of brevity we conclude here.
