

Dear Sir/Madam,

I wish to acknowledge my support for the Severe Fetal Impairment Abortion (Amendment) Bill soon to be review. I don't normally comment on legislation but I want to offer my opinions that just as adults with disabilities in society are accommodated and not discriminated against, it would be completely in the face of anti-discrimination to sanction the murder of an unborn child because they have a disability. If such abominable practices were permitted it will imply to disabled adults that they are unwanted and less important than people with no disabilities. Please do not permit such a horrific piece of legislation affect our society.
