

I am making this submission to the Committee in support of the Severe Fetal Impairment Abortion (Amendment) Bill.

It seems to me that all the discussions and debates concerning abortion focus on the woman's rights and not on the baby's right to life. We are talking about another human being's life and what right have we to decide who should live and who should die?? Just because the baby is not perfectly formed does not mean he or she cannot live a worthwhile life.

Has any thought been given to the physical, emotional and psychological damage done to the mother of having an abortion in the later stages of pregnancy up to full term??

- Sadly, the UK Government ignored the vote in the Northern Ireland Assembly and went ahead with imposing a new regime that effectively introduced abortion up to birth for babies with disabilities including Down's syndrome, cleft lip and club foot.

Please listen to the people of Northern Ireland who do not want babies killed just because they are disabled.
