Subject: Health (Miscellaneous Provisions) Bill

Marie,

I hope you are well. Following the evidence Dr Paul Darragh gave to the Committee last week in relation to the Health (Miscellaneous Provisions) Bill and in particular with regard to the inclusion of banning smoking in cars with children present, please find below a link to a Board of Science publication and the parliamentary brief on the BMA website which refers to countries where this legislation has already been introduced - I hope this is of use.
