

AQW 13598/11-15

For Written Answer on 23 July 2012

Sandra Overend has asked:

To ask the Minister of Education, in light of 1,400 of the 1,800 additional nursery school places being weighted in favour of private and voluntary providers, to detail (i) each private and voluntary nursery school provider; (ii) each statutory nursery school provider; (iii) the original Education and Training Inspectorate grading for each individual provider over each of the last two years; and (iv) whether there is research available to show differing educational outcomes for children who attend private as opposed to statutory nursery schools.

(i) Private and voluntary pre-school settings which provided funded places under the Pre-School Education Expansion Programme in the 2011/12 academic year:-

School name	Town

Silverstream Primary School	Statutory	2011/2012	Good

(iv) The Effective Pre-School Provision in NI (EPPNI) project was a longitudinal research study of children's progress and development from age three to eleven years, and how progress related to their pre-school centre experience and family background. A parallel study was carried out in England (Effective Pre-School and Primary Education - EPPE). The EPPNI and EPPE projects were the first large-scale studies in England, Scotland, Wales and the north of Ireland to investigate the effects of different kinds of pre-school provision, and to relate experience in pre-school centres to child development.

The EPPNI Summary Report is available on the Department of Education's website at www.deni.gov.uk/researchreport41.pdf
