

Request for written submission on the CCC advice for NI in relation to the 2050 emissions reduction target.

I received this and had hoped to get a chance to look at the contents in detail but with both Covid and Brexit issues storming through the manufacturing sector we don't have the resources to look at it.

Please thank the Committee for the chance to input but we don't have the time or people needed to provide a useful response for the Committee at this point.

Best wishes

Stephen Kelly
