

**Subject:** Re: Inquiry into the Strategic Review of Current SEN provision and Transformation Agenda

■■■

V briefly, if we'd made it we would have asked the following

1. is the committee satisfied that DE plan reduces the very long waiting time for a diagnosis of SEN
2. Is the committee happy that agencies like NIADD which supports families with ADHD have been adequately consulted?
3. in regard to the professional development in SEN of those in initial teacher education, is the committee happy that there is a clear agreement on the depth of knowledge required across all providers? Has the issue been raised with UCETNI?

I hope you might mention these points in the discussion

Best wishes
