

Regardless of which side one takes regarding Pro Life V pro Abortion I am horrified at the very idea that this bill could even be contemplated in what proports to be a democratic society.

I was of the understanding in a truly democratic society one has the freedom to peacefully express and demonstrate ones support or decent for any particular issue.

I really do not understand the need to impose 'Safe Zones' around abortion centres. I can't recall there ever having been a conviction for verbal or physical assault or abuse on any potential abortion client by a Pro Life supporter either near to or far from an abortion centre.

Most Pro abortion supporters like to be referred to as **Pro Choice**. By excluding people from abortion centre areas who can offer information for alternative options is denying the potential abortion client their democratic right to freedom of choice.

Go ahead with this anti democratic and potentially costly piece of legislation and very soon abortion will outprice itself.
