

I am opposed to this bill, it does not reflect, the help pro life are offering to women, who can be given/offered a better alternative.

This bill simply needs to be scrapped. Women whom can be given alternative care, is now in jeopardy of losing that chance, with proven evidence that pro life have successfully helped women make the right decision it is now in danger of that help.

I believe it is a human right to be able to show solidarity and stand close by these clinics, to Women who find themselves in a position of difficulty, by the clinics that leaflets, prayers and comfort are freely on offer.

Has there been any previous police difficulty with pro life? I believe not.

I believe that pro life, respect the laws, that are already in place, and therefore, feel this is unfair and an extremely dangerous way to control freedom of speech and more importantly the right to LIFE.

So therefore as a citizen of N.Ireland I am opposed to this bill, to ring fence the right to offer help at these clinics.
