

I am opposed to the abortion zone bill and the criminalisation of those who offer help and support to these women outside abortion facilities.

This was not published so many pro-lifers did not know of this 'call for evidence' submission by Friday 12 November - our elected representatives should ensure that all have a right to voice their opinions and beliefs.

How can we call ourselves civilised when we terminate a life in the womb and try to criminalise those who want to speak up for a child and give it safe access into the world.

I have been scarred for life by my foolish choices as a teenager, for I was with my girlfriend when we had our child aborted.
