Yes

I don't know.

Integration of Services

13 How well are palliative care services integrated across the health system, through primary, secondary and specialist care?

1500 characters:

Again I don't know but I do believe there should be a better system of health care recording that is accessible by the professionals.

14 Should palliative care be a regional service?Please outline your reasons in the box provided.

Yes

1500 characters:

I think if it is accessible in each region then yes. Patients and families want to be close to each other so smaller centres in more areas are far better for the mental health and wellbeing of the patients, families, carers and friends.

15 What can be done to improve integration?

1500 characters:

I don't understand the question.
