Subject: FW: DSC research request -

Hi Marie,

We refer to the Committee's request seeking the following in advance of 12 December 2024:

An analysis of the likely cost implications posed by Directive EU 2024/2853 for businesses based in GB which supply products to Northern Ireland, including likely impacts on the cost of liability insurance premiums and any other associated costs.

Unfortunately, we respectfully advise the Committee that RaISe is not in a position to undertake such an analysis given, for example, data and time limitations.

Moreover, RaISe sought to secure alternate existing sources that provided such analyses, but those searches didn't yield anything.

Regards,

Eileen
