Subject: RE: DSC Provisionally Agreed Text - COM/2024/561 - 27 February 2026 deadline

Good afternoon, [REDACTED]

We have discussed this with the policy experts at the Office for Product Standards and Safety.

The initial assessment of impact is unchanged and remains valid in relation to the provisionally agreed text.

OPSS don't yet have a final text and can only start detailed analysis once it is published. There are some indications that this could be late March / early April but this is obviously subject to change with nothing confirmed.

I trust that helps but am happy to discuss.

Regards
