Subject: RE: CM: TEO DSC Provisionally Agreed Text - COM/2025/531 - Chemical Products

Good Morning,

To confirm - the conclusions reached in the initial Assessment of Impact as regards Proposed EU Regulation 2019/2009 (provided to DSC by the Department in September 2025) remains valid.

That is, that it does not appear likely that the application of this Regulation will have a significant impact specific to everyday life of communities in Northern Ireland in a way that is likely to persist.

Therefore, it is DfE's determination that a Revised Assessment of Impact is not required in relation to the provisionally-agreed text.

Many Thanks,
