Subject: RE: Coordinated return DSC/02/2025: Published EU Regulation - Construction Product Regulation (EU) 2024/3110

Good evening Marie,

Please see below response from Dfl when we asked for clarification on this:

“Dfl is a construction client and specifier of typical, extensively used construction products. In our specifications, generic terms are used, so that they are applicable as widely as possible. The new Regulation is not expected to have a significantly bearing on the availability or performance of products regularly specified by Dfl. Dfl does not have any expertise, lead role or function in the implementation or enforcement of this new Regulation”.

If we receive a response from DoF I will forward as soon as possible.

Kind Regards,
