SCORR-0018-2025

26 June 2025

Dear Daniel,

Thank you for your letter of 13 June 2025 requesting further information to assist the Public Accounts Committee with their considerations, following the Evidence Session.

The responses available, at this time, to the questions asked in your letter, are provided in the attached Annex. A further response will follow in due course.

I hope you find this information useful.

Yours sincerely

RONNIE ARMOUR

Q1: Further details on the £91.6m bids to be made in the June monitoring round.

A1: Table below provides additional bids of £91.6m for the June Monitoring Round

Table: June Monitoring Round – Additional bids

| Programme Area | Proposed |
|--|----------|
| | Bid |
| | £ (m) |
| Inescapable Major Works and SEP – | 18.96 |
| contractual commitments. | |
| Inescapable Minor capital works delivery | 36.40 |
| Inescapable Youth | 3.35 |
| High Priority SEN Capital Investment | 10.63 |
| programme | |
| High Priority Major Works to advance on site | 11.50 |
| High Priority Transport | 6.00 |
| Inescapable Earmarked Strule | 4.75 |
| TOTAL: | 91.60 |

Q2: A list of the PFI schools and the contract end dates.

A2: See table below.

Table: PFI/PPP Contracts

Details of PFI/PPP Contracts

| Contract/Project name | Schools included in each contract / project | Completion / entry into service date | Length of contract | End of contract / hand-back date |
|---|---|--------------------------------------|--------------------|---|
| St Genevieve's High School PFI Project | St Genevieve's High School | 25/02/2022 | 25 Years | 24/02/2027 |
| Bangor Academy Nendrum College PPP Project | Bangor Academy Nendrum College | 29/02/2008 | 30 Years | 28/02/2038 |
| Belfast Strategic Partnering PPP Project | Orangefield Primary School Grosvenor Grammar School Ashfield Girls High School Belfast Boys Model School Belfast Model School for Girls | 18/05/2009 | 30 Years | 11/04/2039 |
| Derry Diocese St Cecilia's College St Mary's College PPP Project | St Cecilia's College St Mary's College | 03/09/2010 | 25 Years | 01/04/2036 |
| Down & Connor De la Salle Schools | Our Lady & St Patrick's College, Knock St Patrick's Grammar School Downpatrick St Mary's PS, Portglenone | 26/05/2010 | 26 Years | 31/03/2036 |

| | St Joseph's PS, Carryduff) | | | |
|---|--|------------|----------|------------|
| Drumglass High School PFI Project | Drumglass High School Dungannon Pathfinder Project | 01/09/2000 | 25 Years | 31/08/2025 |
| Holy Cross College PPP Project | Holy Cross College, Strabane | 29/07/2008 | 25 Years | 31/07/2023 |
| Wellington College Balmoral High School PFI Project | Wellington College Balmoral High School (now St Gerards ERC) | 02/01/2002 | 25 Years | 01/01/2027 |
| Lagan College Tor Bank Special School PPP Project | Lagan College Tor Bank Special School | 22/10/2012 | 25 Years | 17/06/2038 |

Q3: Further information on the pilot for the decorating and floor covering Work.

A3: In response to frustrations expressed by school leaders, EA is working to establish a process which will provide autonomy to schools in the delivery of low value maintenance works. Such an approach is not without risk, and to manage that this will initially be limited to internal decoration and replacement of floor finishes. EA is currently reviewing options for delivery which will provide delegated responsibilities and protect the interests of school leaders.

Q4: Further details on the new Term Service Contract.

A4: The new Term Service Contract (TSC) is for the provision of response, planned maintenance and minor building, mechanical and electrical maintenance works to our estate. The scope of the contract will include task orders with a value of up to £500k. The proposed contract period for all contracts awarded shall be for two years, with the option of additional period(s) for a total maximum contract duration of four years.

The awarded contracts will deliver works to schools and in doing so takes cognisance of the end user's needs. A Principal Reference Group (PRG) was established to ensure key stakeholders needs were understood and embedded into the new procurement. The PRG's survey captured the areas that any new contract must seek to improve the following.

- Quality of works,
- Responsiveness
- Value for money
- Health and safety
- Speed of completion of tasks
- Management reporting and tracking of tasks
- Flexibility of contractors on site on completing tasks
- Communications with Principals

An ambitious procurement strategy was undertaken by the EA, comprising of an 18-lot structure designed around the eleven council areas, with the Building and Mechanical & Electrical works procured separately within 6 procurement exercises. The implementation of these procurements will lead to the delivery of significant changes including completion of task orders in compliance with specified Managed Performance Measures (Key Performance Indicators). These measures will include elements such as:

- quality of workmanship;
- adherence to health and safety requirements;
- live reporting/tracking of maintenance works and;
- adherence to task order response and completion times
 - the inclusion of a Local Management Schools (LMS) addendum to the contracts for cost certainty i.e. the most requested maintenance activities have set prices fixed for the duration of the contract, to provide assurance and transparency to school leaders and:

live integration with EA management information systems, resulting in live reporting on all task orders whilst providing early warning of contractual non-performance.

Current update on the Building and Mechanical & Electrical procurements 1 – 6 is as follows:

| Procurement Procurement | Lot and District Council Area | Tender Published | Tender Return Date | Awarding Sequence | Statu s | Award Date | Successful Contractor | Estimated Contract Start Date | Actual Contract Start Date | Date Contract Signed & Sealed | Note |

Q7: Details of any work that the Department have done to establish best practice in dealing with the issues of school's maintenance.

A7: A full response will follow in due course.

Q8: Confirmation of how much of the estate is currently single glazed.

A8: 306 Schools surveyed to date of which there are 127 school locations reporting single glazing to window/doors at an estimated cost of £14m. (Includes VGs & GMIs)

Q9: Details of how many critical safety issues have been picked up through the approximately 40% of condition surveys now completed.

A9: Health & Safety issues identified during the condition survey which relate to Controlled and Maintained schools are reported to the Maintenance Helpdesk for remedial action. To date there has been circa. 870 Health & Safety issues identified against the 40% surveyed. Those Health & Safety issues relating to Voluntary Grammar & Grant Maintained Integrated are reported to DE and the relevant school authority directly.

Q10: A further breakdown of the suggested 40% uplift of costs, were the Strule project to be retrofitted to meet net zero.

A10:There is currently no fixed industry standard for the capital cost uplift required to deliver net zero buildings; however, a range of credible sources—including the UK Green Building Council, the Construction Leadership Council, and the Department for Education's net zero school pilots—indicate typical uplifts of between 20 per cent and 40 per cent, depending on project type, scale and the stage at which net zero requirements are introduced. For a complex, multi-school campus such as Strule Shared Education Campus, the estimated 40 per cent uplift is consistent with these benchmarks, particularly as it assumes a transition from a gas boiler-based design to a full net zero solution incorporating ground source heat pumps, Passive House design principles, and significant redesign and replanning. The estimate also reflects expected contractor premiums and inflationary costs and aligns with industry understanding that early alignment of net zero objectives at business case and concept design stage is critical to controlling such costs.

Key technical design changes that would have been required:

- Replacement of gas boilers with ground source heat pump systems, including extensive below-ground infrastructure and specialist plant space
- Redesign of building fabric to meet Passive House standards, including ultralow U-values, high-performance insulation and triple glazing
- Installation of mechanical ventilation with heat recovery (MVHR) systems to maintain indoor air quality under airtight conditions
- Structural and spatial changes to accommodate additional plant, ventilation ductwork and enhanced insulation build-ups
- Re-engineering of electrical systems to accommodate increased renewable generation (e.g. PV arrays) and fully electric building services
- Additional thermal and environmental modelling to inform compliance and optimise operational energy performance under net zero criteria

We remain confident that the current design, now well into construction, will deliver an excellent standard of low and zero carbon performance in line with BB101, Technical Booklet K and our CEEQUAL and BREEAM aspirations. Having already endured significant delays, further postponement of the project to accommodate this scale of redesign would be profoundly damaging to stakeholders, programme delivery and budget certainty.

Q11: Details of vacant properties across the schools' estate.

A11: The Department does not own any unused sites; however, the Education Authority owns those listed on the Table below.

Table: List of Unused Sites owned by EA

| Name of Asset | Location of Asset | Constituency of |
|----------------------|-----------------------------|------------------------|
| | | Asset |
| Former Ulidia | Somerset Street, Belfast, | Belfast South and |

Q12: Further information on the governance groups currently in place, or to be stood up as a result of issues identified.

A12: As referenced in the report, the Department has in place several reporting mechanisms, two of which, Capital Programme Oversight Group (CPOG) and Capital & Maintenance Investment (CMI) include the EA, two are internal DE high-level Governance meetings, Top Management Group (TMG) and Departmental Board.

The report quite correctly states that the Asset Management Forum has not met since 2019. However, CPOG has also not met for some time due to workload pressures and vacancies across IID. It will need to be reviewed and re-established as it has not met for some time. CMI continues to meet quarterly.

CPOG and CMI are attended by both the EA and DE Directors responsible for the delivery of the Capital Programme.

We propose to re-examine the mandate, chair and attendance of these groupings to ensure that they are providing the appropriate level of ownership and governance of the overall Capital Programme and Budget.

We will also review the role of the Asset Management Forum in the same context and consider whether its role is better subsumed within a refreshed CPOG.

We believe that controls at project and programme stream level are in place and operating effectively. We have seen considerable improvements in delivery times but need to look at overall Programme level governance and control.

We will continue to meet with EA colleagues to identify, develop and agree a more collaborative approach to strategic level engagement between the Department and the EA. This would include regular and more frequent meetings at Director and Assistant Director level.
